NAVIFORCE NF9182-GREEN

NAVIFORCE NF9182-GREEN Analog-Digital Watch User Manual

Model: NF9182-GREEN | Brand: NAVIFORCE

INTRODUCTION

This user manual provides comprehensive instructions for the NAVIFORCE NF9182-GREEN Analog-Digital Watch. Please read this manual carefully before using your watch to ensure proper operation and to maximize its lifespan. Keep this manual for future reference.

PRODUCT OVERVIEW

The NAVIFORCE NF9182-GREEN is a robust analog-digital watch designed for men, featuring a durable stainless steel band and a zinc alloy case. It combines precise Japanese quartz movement for analog timekeeping with digital displays for additional functions.

Key Features:

- Analog and Digital Time Display
- Alarm Function
- Calendar Display
- Stopwatch Function
- Lap Timer
- 3ATM Daily Water Resistance (Splash/Rain Resistant)
- Hardened Mineral Glass
- Environmental Vacuum Plating
- Double Lighting (Luminous pointer and LED lighting)

Initial Inspection:

Upon unboxing, inspect the watch for any visible damage. Ensure all buttons and the crown operate smoothly. The watch comes pre-installed with a high-quality imported Japanese movement and battery.

Adjusting the Band:

The stainless steel band is adjustable to fit various wrist sizes. If the band is too long, links can be removed by a professional watchmaker or using a watch link removal tool. Ensure the double-fold buckle is securely fastened after adjustment.

OPERATING INSTRUCTIONS

The NAVIFORCE NF9182-GREEN watch features multiple functions controlled by its crown and side buttons. Refer to the diagram below for button identification (specific button functions may vary slightly based on exact model revision, but general principles apply).

Setting Analog Time:

1. Pull out the crown (usually located on the right side of the watch) to the first or second click position (depending on the model, one click for date, two for time).
2. Rotate the crown to adjust the hour and minute hands to the desired time.
3. Push the crown back in to its original position to start the analog timekeeping.

Using Digital Functions (Alarm, Calendar, Stopwatch, Lap Timer):

The digital displays and functions are typically controlled by the push-buttons located on the sides of the watch case. The specific sequence for setting each digital function (Alarm, Calendar, Stopwatch, Lap Timer) will involve pressing a 'Mode' button to cycle through functions and 'Adjust'/'Set' buttons to change values.

- **Alarm:** Press the mode button until "ALM" or "Alarm" appears. Use other buttons to set the alarm time and activate/deactivate it.
- **Calendar:** The digital display shows the current date and day. This is usually automatically set when the time is set, or can be manually adjusted in a specific mode.
- **Stopwatch:** Press the mode button until "STW" or "Stopwatch" appears. Use the start/stop button to begin and end timing, and a reset button to clear.
- **Lap Timer:** Often integrated with the stopwatch function, allowing you to record lap times without stopping the main timer.
- **LED Lighting:** Press the designated light button (often top-left) to illuminate the digital display for visibility in low light conditions.

MAINTENANCE

Cleaning:

Wipe the watch regularly with a soft, dry cloth to remove dust and smudges. For the stainless steel band, a slightly damp cloth can be used, followed by immediate drying. Avoid using chemical cleaners or abrasive materials.

Water Resistance (3ATM):

This watch is rated for 3ATM (30 meters) water resistance. This means it is suitable for daily use and can withstand splashes, rain, and hand washing. **It is NOT suitable for showering, swimming, diving, or any prolonged water immersion.** Do not operate buttons or the crown when the watch is wet.

Storage:

When not in use, store the watch in a cool, dry place away from direct sunlight, extreme temperatures, and strong magnetic fields. Consider using a watch box or pouch to protect it from scratches.

Battery Replacement:

The watch is powered by a high-quality imported Japanese movement and battery. When the battery needs replacement, it is recommended to take the watch to a qualified watch repair professional to ensure proper sealing and water resistance are maintained.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Analog hands not moving.	Battery depleted or crown pulled out.	Push crown back in. If still not working, replace battery by a professional.
Digital display is blank or dim.	Battery low or depleted.	Replace battery by a professional.
Water condensation inside watch.	Exposure to excessive moisture or temperature changes.	Avoid exposing watch to steam or hot water. If condensation persists, seek professional repair immediately to prevent damage.
Buttons are stuck or unresponsive.	Dirt/debris accumulation or internal mechanism issue.	Clean around buttons. If problem persists, seek professional repair.

For issues not listed above, or if solutions do not resolve the problem, please contact NAVIFORCE customer support or a certified watch repair center.
