SUPVAN KATASYMBOL E10/E11/E16 Extended Thermal Self-Adhesive Labels User Manual

This manual provides detailed instructions for the proper use and care of your SUPVAN KATASYMBOL thermal self-adhesive labels.

1. PRODUCT OVERVIEW

These SUPVAN KATASYMBOL thermal labels are designed for use with SUPVAN E10, E11, and E16 label printers. They feature a self-adhesive backing and utilize thermal printing technology, eliminating the need for ink or toner. This specific product is a 15 mm x 6 m roll with a charming hearts pattern.

A roll of SUPVAN thermal labels with a heart pattern, alongside examples of printed labels demonstrating various uses like branding, reminders, numbering, icons, app editing, and barcodes.

2. KEY FEATURES

- **Compatibility:** Designed for SUPVAN E10, E11, and E16 label makers. This roll measures 15 mm x 6 m and features a hearts pattern.
- **Durability:** Constructed with a multi-layer synthetic design, these labels offer a lifespan of over 5 years. They are waterproof, oil-proof, possess high adhesive strength, and resist both high and low temperatures.
- **Versatile Applications:** Suitable for a wide range of uses in home, office, and school environments. They meet applicable baby product standards, making them safe for labeling food, cosmetics, and various household items.
- **Cost-Effective and High Quality:** Utilizing thermal printing technology, these labels require no ink or toner, leading to cost savings while providing clear and crisp print clarity.
- **Ease of Use:** The "Katasymbol" application automatically identifies the label type and size. It offers access to over 600 templates, 35 fonts, and more than 1000 icons for customization. *Note: Do not remove the smart chip sticker on the back of the label roll, as the application requires it for proper identification.*

A visual representation of the labels' durability, highlighting their resistance to water, oil, low temperatures, and scratches, ensuring longevity and reliability.

3. COMPATIBILITY

These thermal labels are specifically designed to be compatible with the following SUPVAN label printers:

- SUPVAN E10 Label Printer
- SUPVAN E11 Label Printer
- SUPVAN E16 Label Printer

An image displaying several SUPVAN E10, E11, and E16 label printers in different colors, alongside various rolls of compatible labels, illustrating the range of compatible devices.

4. SETUP AND INSTALLATION

4.1. Loading the Label Roll

Follow these steps to correctly load the label roll into your SUPVAN label printer:

1. Open the label compartment of your SUPVAN E10/E11/E16 label printer.
2. Insert the label roll into the compartment, ensuring the printing surface faces the print head.
3. Feed the leading edge of the label tape through the printer's output slot.
4. Close the label compartment securely.
5. **Important:** Ensure the smart chip sticker on the back of the label roll is not removed, as the "Katasymbol" application uses it for automatic identification of label type and size.

5. OPERATING INSTRUCTIONS

5.1. Using the Katasymbol Application

The "Katasymbol" application is essential for designing and printing your labels. Follow these steps to operate your label printer with the app:

1. Download and install the "Katasymbol" application on your smartphone or tablet from your device's app store.
2. Ensure your SUPVAN label printer is powered on and successfully connected to your device via Bluetooth.
3. Open the "Katasymbol" app. The app should automatically detect the label type and size from the installed roll.
4. Select a template from the extensive library of over 600 available options.
5. Customize your label design using the app's features, including adding text (choose from 35 fonts),

incorporating icons (over 1000 available), and integrating graphics.

6. Preview your label design to ensure it meets your requirements.
7. Initiate printing directly from the application.

For more detailed app-specific instructions, refer to the "Katasymbol" application's in-app help section or the digital manual provided with your label printer.

The Katasymbol application interface, demonstrating various customization options for labels, including text, barcodes, graphics, frames, dates, and QR codes.

6. APPLICATIONS

These versatile thermal labels are suitable for a wide range of organizational and identification needs across various environments.

6.1. Home Organization

- Labeling storage bins for toys, clothes, or general household items.
- Organizing kitchen pantry items, spices, and food containers.
- Identifying personal belongings to prevent mix-ups.

Examples of labels used for domestic organization, such as categorizing family items in storage bins, organizing kitchen ingredients, and general household labeling.

6.2. Office and School Use

- Labeling files, folders, and documents for efficient archiving and retrieval.
- Organizing office supplies and equipment.
- Personalizing school supplies, books, and lunchboxes for students.
- Creating temporary signs or notices.

Labels applied to various school items such as notebooks, water bottles, and lunchboxes, demonstrating their utility in educational environments.

Labels used in an office setting for organizing files, binders, and various desk items, showcasing their effectiveness in professional environments.

7. MAINTENANCE AND CARE

Proper care and maintenance will ensure the longevity and optimal performance of your SUPVAN thermal labels:

- Store label rolls in a cool, dry place away from direct sunlight to preserve adhesive quality and printability.
- Avoid exposing labels to extreme temperatures or high humidity, which can affect their performance.
- Do not touch the printing surface of the labels unnecessarily to prevent smudges or damage to the thermal coating.
- Ensure the label printer's print head is clean for optimal print quality. Refer to your printer's manual for specific cleaning instructions.

The labels are designed to be waterproof and oil-proof, allowing for easy cleaning of labeled items without

compromising the label's integrity.

8. TROUBLESHOOTING

8.1. Common Issues and Solutions

Poor Print Quality / Faded Text

Ensure the label roll is correctly inserted with the printing surface facing the print head. Check if the printer's print head is clean. Verify that the "Katasymbol" app settings are correct for the label type.

Labels Not Detected by App

Confirm that the smart chip sticker on the back of the label roll has not been removed. Ensure the label printer is properly connected via Bluetooth and the app is updated to the latest version.

Labels Not Sticking Properly

Ensure the surface where the label is applied is clean, dry, and smooth. Avoid applying labels to heavily textured or oily surfaces. The labels are designed for high adhesive strength, but surface conditions are crucial.

Labels Jamming in Printer

Check for any obstructions in the label path. Ensure the label roll is not too tight or loose in the compartment. Make sure the label roll is compatible with your specific printer model.

For further assistance, please refer to the SUPVAN official website or contact customer support.

9. SPECIFICATIONS

Attribute	Value
Brand	SUPVAN
Model Number	BFE15*6m
Label Dimensions	15 mm x 6 m
Material Type	Paper (Thermal)
Color/Pattern	Hearts
Adhesive Type	Self-Adhesive
Durability Features	Waterproof, Oil-proof, High/Low Temperature Resistance
Compatibility	SUPVAN E10, E11, E16 Label Printers
