SUPVAN E10, E11

SUPVAN E10 & E11 Label Maker Tape User Manual

Model: E10, E11 Series Label Maker Tape

INTRODUCTION

This manual provides essential information for the proper use and care of your SUPVAN E10 & E11 compatible label maker tape. This continuous laminated thermal label tape is designed for durability and versatility in various labeling applications.

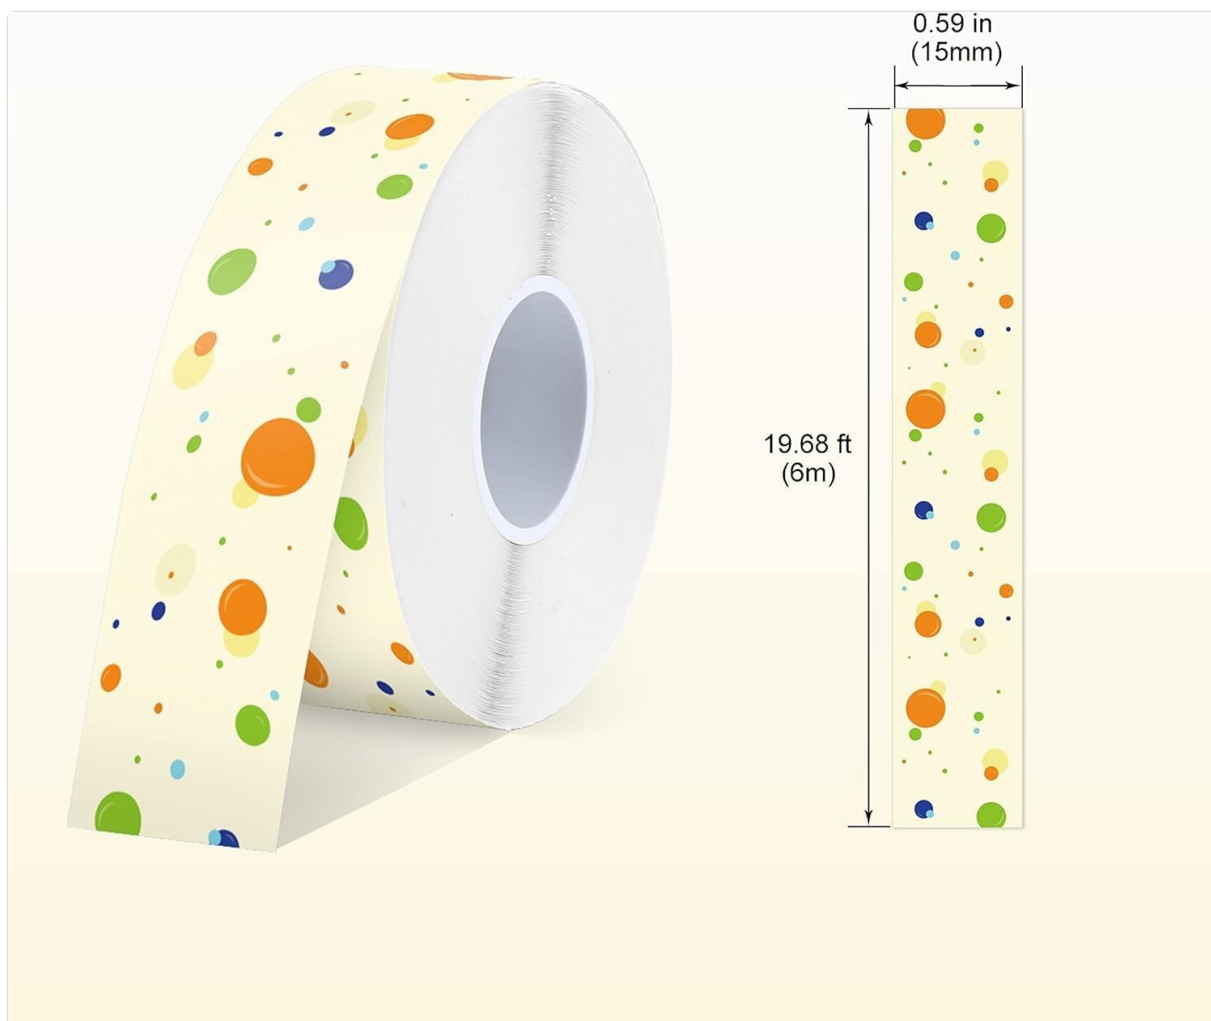

Image: A roll of SUPVAN label tape with dimensions 0.59 inches (15mm) width and 19.68 feet (6m) length, featuring a black on dots pattern.

PRODUCT FEATURES

- **Compatibility:** Designed for use with SUPVAN E10 and E11 label makers.

- **Dimensions:** 0.59 inches (15mm) width by 19.7 feet (6m) length.

- **Genuine Quality:** Constructed from multi-layer synthetic material for enhanced resistance.

- **Durability:** Resists water, oil, and extreme temperatures, offering a 5-year extended durability.

- **Safety:** BPA-free, complying with safety standards for baby products, suitable for food, cosmetics, and consumables labeling.

- **Adhesion:** Features strong adhesiveness for secure placement.

- **Residue-Free Removal:** Easy to tear off without leaving adhesive residue.

- **Smart RFID Auto-Detection:** Enables instant size recognition by compatible printers, minimizing misalignment and waste.

| WATER-PROOF | OIL-PROOF | LOW-TEMPERATURE RESISTANCE | SCRATCH-RESISTANT |

COMPATIBILITY

This label tape is specifically designed for seamless integration and optimal performance with SUPVAN E10, E11, and E16 label makers. Ensure your label maker model is compatible before installation.

Compatible with SUPVAN E10/E11/E16 Label Maker

Image: Displays several SUPVAN label makers and a variety of label tape rolls, illustrating product compatibility.

SETUP: INSTALLING THE LABEL TAPE

1. **Open the Label Maker:** Locate the tape compartment on your SUPVAN E10 or E11 label maker and open the cover.

2. **Insert the Tape Cassette:** Place the label tape cassette into the compartment, ensuring it clicks securely into place. The tape should feed smoothly from the cassette.

3. **Close the Cover:** Close the label maker cover firmly until it latches.

4. **Automatic Detection:** The label maker's RFID auto-detection feature will recognize the tape size and type automatically.

OPERATING INSTRUCTIONS

To create and print labels using your SUPVAN E10 or E11 label maker with this tape, follow these general steps:

1. **Connect to App:** Ensure your label maker is connected to the SUPVAN mobile application via Bluetooth.

2. **Design Your Label:** Use the app to input text, select fonts, add icons, and customize your label design. The app offers various templates and customization options.

3. **Preview and Print:** Preview your label design within the app. Adjust settings such as print density or number

of copies if necessary.

4. **Initiate Printing:** Tap the 'Print' button in the app. The label maker will print the label onto the installed tape.

5. **Cut the Label:** Use the label maker's integrated cutter to separate the printed label from the continuous roll.

6. **Apply Label:** Peel off the backing and apply the label to your desired surface.

MAINTENANCE

- **Storage:** Store unused label tape rolls in a cool, dry place away from direct sunlight and extreme temperatures to preserve adhesive quality and print integrity.

- **Handling:** Avoid touching the printing surface of the tape to prevent smudges or oil transfer that could affect print quality.

- **Cleaning:** If the label maker's print head or tape path becomes dirty, refer to your label maker's specific cleaning instructions. Do not attempt to clean the tape itself.

TROUBLESHOOTING

- **Poor Print Quality:** Ensure the tape is correctly installed and the label maker's print head is clean. Check print density settings in the app.

- **Tape Not Detected:** Verify the tape cassette is fully seated in the compartment. The RFID chip on the cassette should be properly aligned for automatic detection.

- **Labels Not Sticking:** Ensure the application surface is clean, dry, and smooth. Avoid applying labels to textured or oily surfaces.

- **Tape Jamming:** Check for any obstructions in the tape path. Ensure the tape is not creased or damaged before insertion.

SPECIFICATIONS

Attribute	Detail
Brand	SUPVAN
