

SVITOO Infant Toddler Training Toothbrush

SVITOO Infant Toddler Training Toothbrush Instruction Manual

Model: Infant Toddler Training Toothbrush

INTRODUCTION

This manual provides essential instructions for the safe and effective use, care, and maintenance of your SVITOO Infant Toddler Training Toothbrush. Designed for children aged 12 months to 6 years, this toothbrush promotes early oral hygiene habits. Please read these instructions thoroughly before first use and retain for future reference.

PRODUCT FEATURES

- **Soft Bristles:** Features thousands of fine, dense bristles in the center of the brush head for effective cleaning, surrounded by soft silicone for gum massage.
- **Safety Baffle:** An included bear-shaped guard prevents the toothbrush from being inserted too deeply into the child's mouth, enhancing safety and keeping the brush head clean when placed down.
- **Ergonomic Handle with Suction Cup:** Designed for easy gripping by small hands. The integrated suction cup allows the toothbrush to stand upright on smooth surfaces for hygienic storage.
- **Food-Grade Materials:** Constructed from food-grade materials that have passed FDA testing, ensuring safety for your child.
- **Easy to Clean:** Polymer nanomaterials reduce bacterial reproduction, making the toothbrush simple to clean with warm water after each use.

SETUP

1. **Unpack:** Carefully remove the toothbrush and any accessories from the packaging.
2. **Inspect:** Before first use, inspect the toothbrush for any signs of damage or wear. Discard if damaged.
3. **Clean:** Wash the toothbrush thoroughly with warm water before its initial use.
4. **Attach Safety Baffle (Optional):** If desired, slide the bear-shaped safety baffle onto the toothbrush handle until it rests just below the brush head. This helps prevent over-insertion.

OPERATING INSTRUCTIONS

Always supervise your child during brushing.

1. **Apply Toothpaste:** Apply a pea-sized amount of fluoride-free toothpaste (for children under 2) or a rice-grain sized amount (for children 2-6) to the bristles. Consult your pediatrician or dentist for specific recommendations.
2. **Position the Brush:** Gently place the brush head against your child's teeth and gums.
3. **Brush Gently:** Use small, circular motions to clean all surfaces of the teeth and gums. The soft bristles are designed to be gentle on sensitive gums.
4. **Encourage Independence:** Allow your child to hold the ergonomic handle and participate in brushing under close supervision to foster good habits.
5. **Rinse:** After brushing, encourage your child to spit out the toothpaste and rinse their mouth with water.

MAINTENANCE AND CARE

- **Cleaning:** After each use, rinse the toothbrush thoroughly under warm running water to remove any toothpaste residue and food particles.
- **Storage:** Utilize the suction cup base to stand the toothbrush upright on a clean, dry surface, allowing it to air dry. This helps maintain hygiene and prevents contact with other surfaces.
- **Replacement:** For optimal hygiene and effectiveness, it is recommended to replace the toothbrush every month, or sooner if the bristles appear worn or damaged.
- **Sterilization:** Do not boil or microwave the toothbrush.

SAFETY INFORMATION

- Always supervise children during brushing to prevent accidents.
- Ensure the safety baffle is properly attached if you wish to prevent over-insertion.
- Do not allow children to chew on the toothbrush as a toy.
- Keep out of reach of infants when not in use.
- Discard the toothbrush immediately if any part becomes loose, damaged, or shows signs of wear.

TROUBLESHOOTING

If you encounter any issues with your SVITOO Infant Toddler Training Toothbrush that are not addressed in this manual, please contact customer support for assistance.

SPECIFICATIONS

Brand:	SVITOO
Model:	Infant Toddler Training Toothbrush
