MAINTENANCE

- **Cleaning:** Wipe the steel frame and particleboard surfaces with a soft, damp cloth. Avoid using harsh chemicals or abrasive cleaners, as they may damage the finish. The fabric shelves can be spot cleaned with a mild detergent and water.
- **Regular Checks:** Periodically inspect all screws and connections to ensure they are tight. Retighten if necessary to maintain stability and safety.
- **Placement:** Avoid placing the hall tree in direct sunlight or near heat sources, as this can cause material degradation or discoloration over time.

TROUBLESHOOTING

Problem: The hall tree wobbles after assembly.

Solution: Ensure all screws are fully tightened. Check if the floor is uneven and adjust the leveling feet at the bottom of the frame until the unit is stable. If wobbling persists, disassemble and reassemble, ensuring all parts are correctly aligned.

Problem: Missing parts or damaged components upon arrival.

Solution: Do not attempt to assemble the product. Contact VASAGLE customer support immediately with your purchase details and a description of the missing or damaged parts. They will assist you with replacements.

Problem: Difficulty inserting screws or aligning holes.

Solution: Double-check the orientation of the parts against the assembly diagrams. Sometimes, parts may appear similar but have subtle differences in hole placement. Do not force screws; if resistance is met, re-evaluate the alignment.
