- **Material Benefits:** The HDPE material is designed to be waterproof and resistant to common outdoor wear, including splintering, cracking, chipping, and peeling. The hardware is anti-rust for extended outdoor use.

7. TROUBLESHOOTING

- **Wobbly Chair:** If the chair feels unstable after assembly, ensure all bolts are fully tightened. Sometimes, loosening all bolts slightly, placing the chair on a level surface, and then re-tightening them in sequence can resolve wobbling.
- **Difficulty with Assembly:** If you encounter difficulties during assembly, double-check the instruction diagrams and ensure you are using the correct parts for each step. Some users have found it helpful to reverse the order of certain bolt insertions (e.g., inserting from the inside out) for better alignment.
- **Missing Parts:** If any parts are missing from the package, refer to the contact information in the 'Warranty & Support' section to request replacements.
