Lamshaw Srichpk S32D (Compatible Device)

Lamshaw Screen Protector User Manual for Srichpk S32D Smartwatch

Your guide to installing and maintaining your Lamshaw Full Coverage TPU Clear Film Screen Protector.

1. Introduction

Thank you for choosing the Lamshaw Full Coverage TPU Clear Film Screen Protector. This product is specifically designed to provide superior protection for your Srichpk S32D Smartwatch screen, safeguarding it against scratches, shatters, and daily wear. This manual will guide you through the installation process and provide essential information for optimal use and maintenance.

2. Product Features

The Lamshaw Screen Protector offers advanced features to ensure the longevity and clarity of your smartwatch display:

- **Soft TPU Material:** Made from Thermoplastic Polyurethane, providing flexibility and full coverage.
- **Anti-Shatter & Anti-Scratch:** Designed to resist impacts and prevent scratches from everyday objects.
- **High Transparency:** Maintains the original brightness and color of your smartwatch screen.
- **High Sensitivity:** Ensures touch screen responsiveness is unaffected.
- **Bubble Self-Healing:** Minor bubbles may disappear over time, and larger ones can be pushed out during installation.

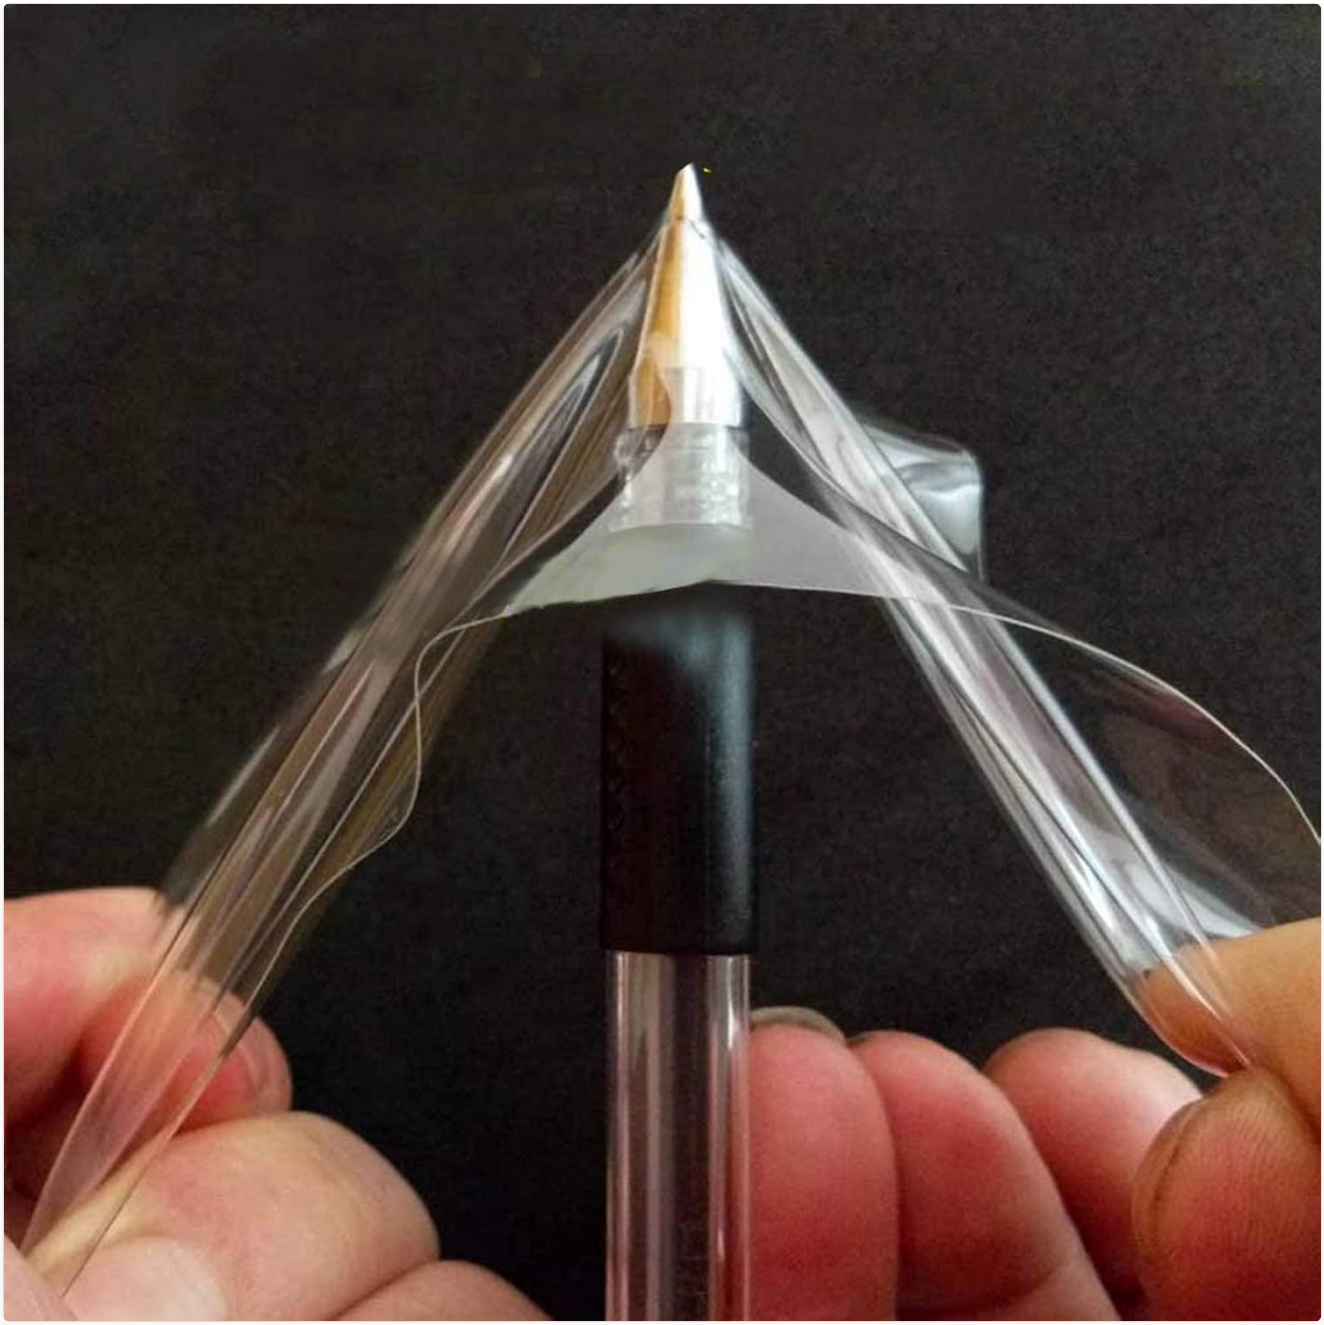

Image 2.1: A demonstration of the screen protector's flexibility, showing its ability to bend without creasing, highlighting its durable TPU material.

3. Package Contents

Your Lamshaw Screen Protector package includes:

- 6 x Lamshaw Full Coverage TPU Clear Film Screen Protectors
- Installation accessories (e.g., wet wipes, dry wipes, fiber cloth, dust removal stickers, squeegee card - specific contents may vary slightly)

4. Installation Guide

Follow these steps carefully for a smooth, bubble-free installation. Ensure your Srichpk S32D Smartwatch screen is clean and free of dust before beginning.

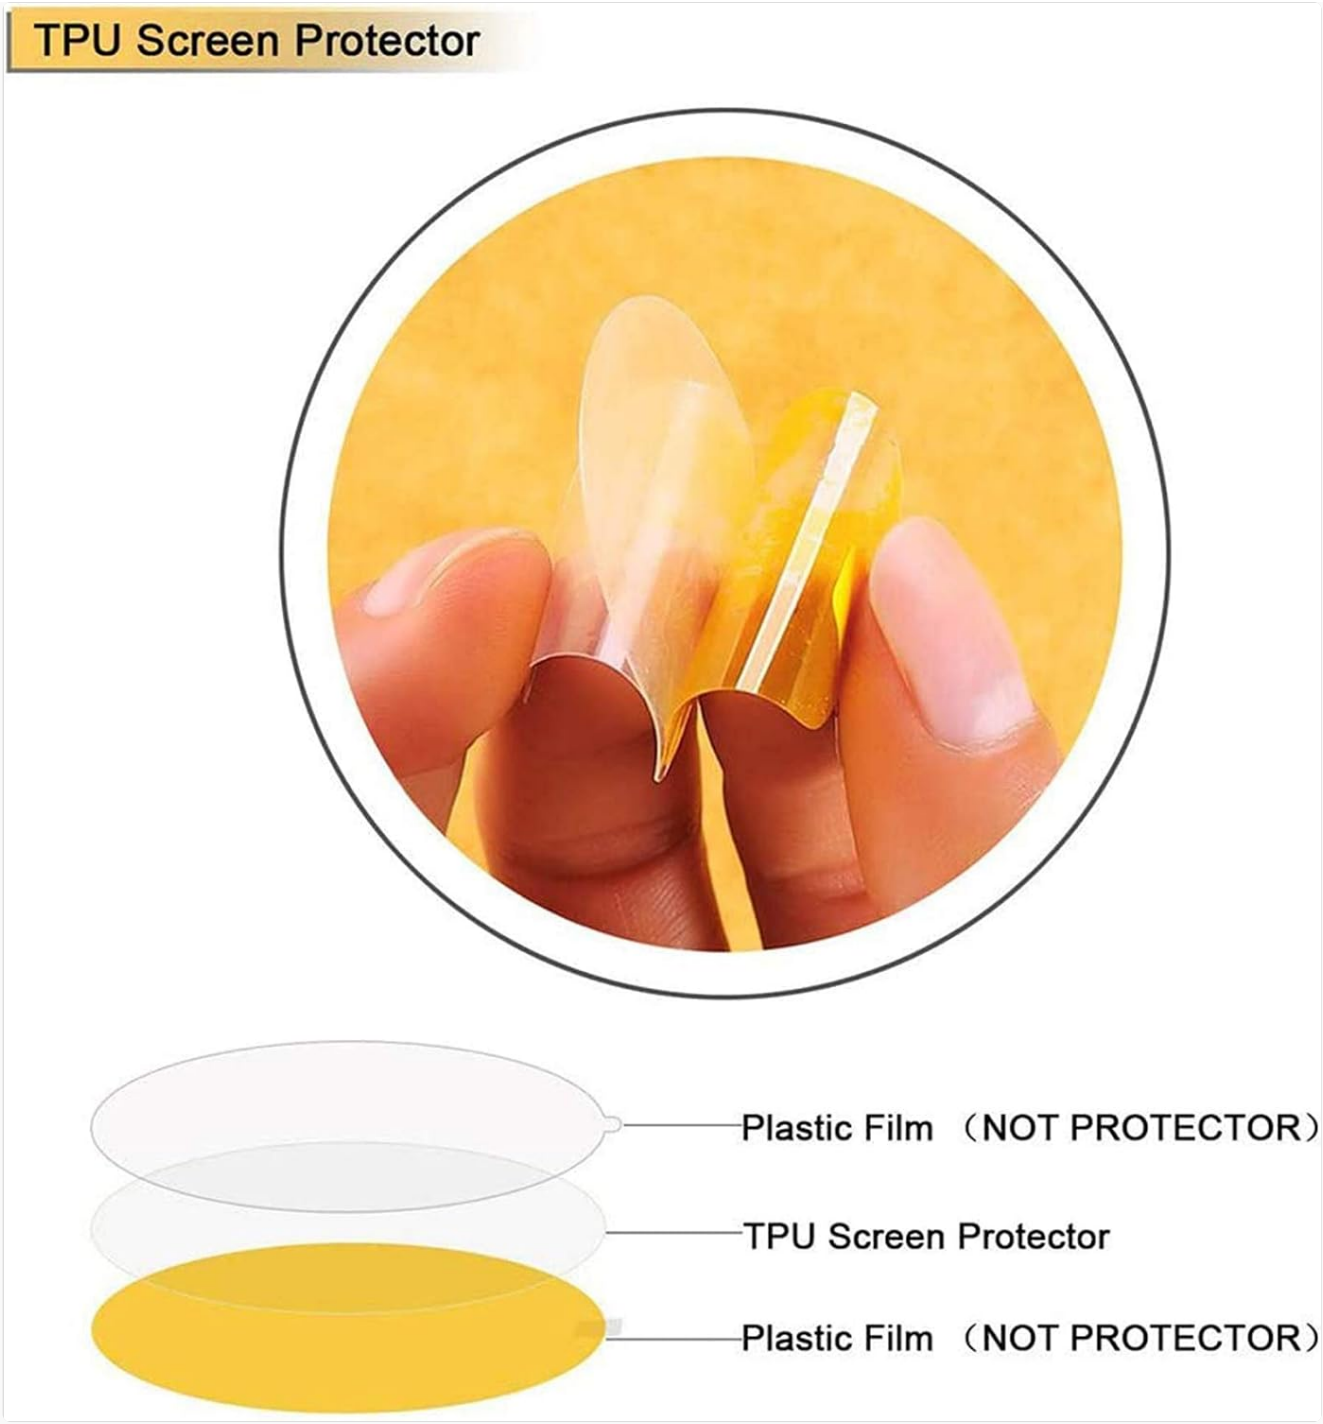

Image 4.1: A diagram illustrating the three distinct layers of the screen protector: two outer protective plastic films and the central TPU screen protector layer.

1. **Clean the Screen:**

   Use the wet wipe to thoroughly clean your smartwatch screen. Follow with the dry wipe to remove any moisture. Finally, use the fiber cloth to polish the screen and remove any remaining dust or smudges. Ensure the screen is completely dry and lint-free.

2. **Identify Layers:**

   The screen protector consists of three layers. You will find a "Back 1" (often red) layer, the middle TPU screen protector layer, and a "Front 2" (often black) layer. The middle layer is the actual protector and is stickier to the side of "Back 1".

3. **Peel "Back 1" Layer:**

   Carefully peel off the Red "Back 1" layer. This exposes the adhesive side of the TPU protector.

4. **Align and Apply:**

Align the exposed adhesive side of the protector with one edge of your smartwatch screen. Slowly lower the protector onto the screen, ensuring precise alignment. Use a squeegee card (or a credit card wrapped in a soft cloth) to gently push out air bubbles as you apply it from one side to the other.

5. **Press and Secure:**

   Once the protector is fully applied, press the entire screen with your hand, working from the center outwards to ensure full adhesion and to push out any remaining small bubbles.

6. **Peel "Front 2" Layer:**

   Finally, carefully peel off the Black "Front 2" layer. The middle TPU screen protector layer should now be securely adhered to your smartwatch screen.

Image 4.2: A visual guide demonstrating the six key steps for installing the screen protector, from cleaning the watch face to removing the final protective film.

5. Troubleshooting Installation Issues

If you encounter difficulties during installation, refer to these common issues and solutions:

- **Persistent Bubbles:**

If large bubbles remain after installation, gently lift the nearest edge of the protector and reapply, using the squeegee card to push the air out as you lay it back down. For small bubbles, the "bubble self-healing" property of the TPU material means they may disappear within 24-48 hours.

- **Protector Not Sticking / Peeling Wrong Layer:**

  Some customers mistakenly peel the "Front 2" layer first, which can make the protector seem non-sticky. If this happens, gently wrinkle the Red "Back 1" layer to separate it into two layers. Peel off the middle layer (the actual protector) and ensure it goes back onto the Black "Front 2" layer correctly. Then, restart the installation process by peeling the Red "Back 1" layer first.

- **Dust Under Protector:**

  Dust particles can cause bubbles. Ensure your installation environment is as dust-free as possible. If dust is trapped, you may need to carefully lift the protector, use a dust-removal sticker to dab the dust off the screen and the protector's adhesive side, and then reapply.

6. Care and Maintenance

To ensure the longevity and clarity of your Lamshaw Screen Protector:

- Clean the screen protector regularly with a soft, lint-free cloth.
- For stubborn smudges, lightly dampen the cloth with water or a screen cleaner designed for electronics.
- Avoid using harsh chemicals, abrasive materials, or sharp objects on the protector, as these can damage its surface.

7. Specifications

Attribute	Detail
Brand	Lamshaw
Compatible Devices	Srichpk S32D Smartwatch, Srichpk Smartwatch
Material	Thermoplastic Polyurethane (TPU)
Special Feature	Scratch Resistant
Screen Surface Description	Glossy
Number of Items	6
ASIN	B09PVDHBQS
Manufacturer	Lamshaw
Date First Available	January 1, 2022

8. Warranty and Support

Lamshaw is committed to providing high-quality products. For any questions, concerns, or support regarding your screen protector, please contact Lamshaw customer service through the retailer's platform where you purchased the product. Please refer to your purchase receipt for specific warranty details, if applicable.
