## Baby Brezza BRZ0107

# Baby Brezza Fast Baby Bottle Warmer Instruction Manual

Model: BRZ0107

## INTRODUCTION

The Baby Brezza Fast Baby Bottle Warmer is designed to safely and efficiently warm breastmilk, formula, and baby food. It features PerfectWarm precision warming technology with two distinct warming settings to preserve nutrients and ensure optimal temperature for your baby's feeding needs.

## IMPORTANT SAFETY INFORMATION

- Read all instructions before using the appliance.
- Do not touch hot surfaces. Use handles or knobs.
- To protect against electrical shock, do not immerse cord, plugs, or appliance in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner.
- The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off", then remove plug from wall outlet.
- Do not use appliance for other than intended use.
- Extreme caution must be used when moving an appliance containing hot liquids.

## PRODUCT OVERVIEW

The Baby Brezza Fast Baby Bottle Warmer is designed for convenience and safety, offering two distinct warming modes:

- **Steady Warm Mode:** Utilizes a warm water bath to safely warm or defrost breastmilk. This method helps preserve essential nutrients, unlike steam heat which can degrade breastmilk proteins.
- **Quick Warm Mode:** Employs steam heat for rapid warming of formula or baby food, achieving desired temperatures

in as little as 2 minutes.

The warmer features 9 pre-programmed settings, allowing precise warming based on the volume of liquid, starting temperature (room temperature or cold), and bottle material (plastic or glass). It automatically shuts off once the warming cycle is complete.

## SETUP

- 1. Unpack:** Carefully remove all components from the packaging.
- 2. Clean:** Before first use, clean the warming basket and lid with warm, soapy water. Rinse thoroughly and allow to air dry. Wipe the main unit with a damp cloth.
- 3. Placement:** Place the warmer on a stable, level surface away from heat sources and direct sunlight.
- 4. Power:** Plug the power cord into a suitable electrical outlet.

## OPERATING INSTRUCTIONS

The warmer is designed for ease of use with intuitive controls.

### 1. Preparing the Bottle/Food

- Fill your baby bottle with breastmilk or formula, or prepare baby food in a suitable jar.
- Place the bottle or jar into the warming basket.
- Use the included measuring cup to add the appropriate amount of water to the warming chamber. The water level should align with the fill line indicated on the unit, corresponding to the volume of liquid in the bottle.

Warming basket fits all bottle sizes, food jars and storage bags

Image: The warming basket accommodates various bottle sizes, milk storage bags, and baby food jars.

### 2. Selecting Warming Mode and Settings

1. **Power On:** Press the power button ( ) to turn on the warmer. The display will illuminate.
2. **Select Starting Temperature:**

- Press the "Room Temp" button (Δ) if the liquid is at room temperature.
- Press the "Cold" button (⌘) if the liquid is refrigerated or frozen.

3. **Select Liquid Volume:** Use the up/down arrows (or repeatedly press the temperature button) to select the volume of liquid (in ounces) you are warming. The display will show the selected volume.

4. **Choose Warming Method:**

- For breastmilk, press the "Steady Warm" button (⤒). This uses a warm water bath.
- For formula or baby food, press the "Quick Warm" button (⤓). This uses steam heat.

**Choose from 9 pre-programmed settings based on:**

**FORMULA OR  
BREASTMILK**

**BOTTLE STARTING  
TEMPERATURE**

**# OF OUNCES**

**Warmer picks warming time, auto-shuts off when done**

Image: The control panel with buttons for room temperature, cold, quick warm, and steady warm settings. The digital display shows the selected settings and countdown timer.

### **3. Starting and Completing the Warming Cycle**

1. Once the settings are selected, the warmer will automatically calculate and display the warming time.
2. The warming cycle will begin. The display will count down the remaining time.

3. When the cycle is complete, the warmer will beep and automatically shut off.
4. Carefully remove the bottle or jar using the warming basket. Always test the temperature of the liquid before feeding your baby.

## COMPATIBILITY

The Baby Brezza Fast Baby Bottle Warmer is designed for universal compatibility, fitting a wide range of feeding containers:

- Virtually all types and sizes of baby bottles (glass, plastic, silicone).
- Most milk storage bags (frozen or thawed).
- Standard plastic and glass baby food jars.

## MAINTENANCE & CLEANING

Regular cleaning ensures optimal performance and hygiene.

1. **Unplug:** Always unplug the warmer from the electrical outlet and allow it to cool completely before cleaning.
2. **Exterior:** Wipe the exterior of the warmer with a damp cloth. Do not immerse the main unit in water.
3. **Warming Basket & Lid:** The warming basket and lid can be washed with warm, soapy water. Rinse thoroughly and air dry. These parts are generally top-rack dishwasher safe, but hand washing is recommended for longevity.
4. **Descaling:** Mineral deposits can build up in the warming chamber over time. To descale, mix 2 oz (60ml) of white vinegar with 4 oz (120ml) of cold water and pour into the warming chamber. Let it sit for 30 minutes, then pour out the solution. Rinse the chamber thoroughly with clean water. Repeat monthly or as needed.

## TROUBLESHOOTING

Problem	Possible Cause	Solution
Warmer does not turn on.	Not plugged in; power outage.	Ensure unit is securely plugged into a working outlet. Check household circuit breaker.
Bottle is not warm enough.	Incorrect settings (volume, starting temp, material); insufficient water.	Verify selected settings match liquid volume, starting temperature, and bottle material. Ensure adequate water is added to the chamber.
Bottle is too hot.	Incorrect settings (volume, starting temp, material); too much water.	Verify selected settings. Reduce water slightly if consistently overheating. Always test temperature before feeding.
Mineral deposits/scale buildup.	Hard water usage.	Perform descaling procedure as described in the Maintenance section. Use distilled water to prevent future buildup.

## SPECIFICATIONS

- **Model Number:** BRZ0107
- **Item Weight:** 2.27 pounds
- **Capacity:** 9 Fluid Ounces
- **Wattage:** 200 watts

- **Upper Temperature Rating:** 104 Degrees Fahrenheit
- **Product Dimensions:** 6.5 x 6.5 x 11.5 inches
- **Material Type:** Plastic
- **Power Source:** Corded Electric

## WARRANTY & SUPPORT

This product comes with a **1-year limited warranty**. Please note that the warranty is not valid if the product is shipped or used outside the US.
