Radioddity WF-100C Lite

Raddy WF-100C Lite 13-IN-1 Wireless Weather Station User Manual

Model: WF-100C Lite | Brand: Radioddity

1. INTRODUCTION

Thank you for choosing the Raddy WF-100C Lite 13-IN-1 Wireless Weather Station. This device provides comprehensive environmental monitoring, offering accurate indoor and outdoor measurements directly to your console and via online weather services. This manual will guide you through the setup, operation, and maintenance of your weather station.

Figure 1: The Raddy WF-100C Lite Weather Station includes a main console, an outdoor sensor array, and supports smartphone app integration.

Key Features:

- Accurate Measurements:** Monitors indoor/outdoor temperature and humidity, wind speed and direction, precipitation, barometric pressure, and dew point.
- Clear Color Display:** Large, slim console with a clear layout for easy data viewing.
- Easy Installation:** Step-by-step instructions for straightforward setup.
- 13-in-1 Outdoor Sensor:** Reliable wireless sensor with a bubble level, thermo-hygrometer radiation shield, solar panel, rain gauge, anemometer, and wind vane.
- WiFi Connectivity:** Real-time data synchronization with Weathercloud & Wunderground for monitoring on mobile, PC, or tablet.

2. PACKAGE CONTENTS

Please verify that all components are present and in good condition upon unpacking.

Figure 2: All components included in the Raddy WF-100C Lite package.

- Main Display Console
- 13-in-1 Outdoor Sensor Array (includes Anemometer, Wind Vane, Rain Gauge, Thermo-Hygrometer, Solar Panel, Bubble Level)
- Mounting Pole
- Mounting Base
- Power Adapter for Console
- Mounting Hardware (screws, nuts, etc.)
- User Manual (this document)

3. SETUP AND INSTALLATION

3.1 Initial Setup

Before permanent installation, it is recommended to set up the console and outdoor sensor in close proximity to ensure they connect successfully.

- Power the Outdoor Sensor:** Insert 3 AA Li-ion batteries (recommended, not included) into the outdoor sensor's battery compartment. Ensure correct polarity.
- Power the Main Console:** Plug the provided power adapter into the console and a wall outlet. For backup, install 3 AAA alkaline or Li-ion batteries (not included) into the console's battery compartment.
- Sensor-Console Pairing:** The console will automatically search for the outdoor sensor. Once connected, outdoor data will appear on the display. This may take a few minutes.

3.2 Outdoor Sensor Installation

Choose a location for the outdoor sensor that is open, free from obstructions, and allows for accurate wind, rain, and temperature measurements. The wireless transmission range is up to 100 meters (330 feet).

**BIS ZU 330FT (100M)
ÜBERTRAGUNGSREICHWEITE**

Figure 3: Example of outdoor sensor installation for optimal data collection.

- Mounting Location:** Select a high, open area, away from buildings, trees, and other obstacles that could interfere with wind, rain, or sunlight.
- Assemble the Sensor:** Attach the outdoor sensor array to the mounting pole using the provided hardware.
- Leveling:** Use the integrated bubble level on the sensor to ensure it is perfectly horizontal for accurate rain and wind measurements.
- Secure Installation:** Mount the assembly securely using the mounting base and hardware. Ensure it can

withstand strong winds.

Figure 4: The 13-in-1 outdoor sensor array with its various components.

3.3 Console Placement

Place the main console indoors in a location where you can easily view the display and where it is within range of the outdoor sensor.

4. OPERATION

4.1 Display Overview

The color display provides a clear overview of all measured data. Familiarize yourself with the different sections:

ANPASSBARER WETTERMONITOR (13-IN-1)

WINDRICHTUNG

LUFTDRUCK

DURCHSCHNITTLICHE WINDGESCHWINDIGKEIT

REGENFALL

AUSSENTEMPERATUR / AUSSENFEUCHTE

RADDY

WETTERVORHERSAGE

INNENTEMPERATUR/INNENFEUCHTE

MOND PHASE

TAUPUNKT / FÜHLT SICH WIE INDEX AN

DATUM / TAG / UHRZEIT

*Orange als anpassbar markiert

Figure 5: Main console display showing various weather parameters.

- **WEATHER / RAIN RATE:** Current rainfall data.
- **GUST / AVERAGE:** Wind gust and average wind speed.
- **OUTDOOR:** Outdoor temperature and humidity.
- **MOON PHASE:** Current moon phase.
- **PRESSURE:** Barometric pressure.
- **FORECAST:** 12-hour weather forecast icons.
- **DATE / TIME:** Current date and time.
- **INDOOR:** Indoor temperature and humidity.
- **DEW POINT / FEELS LIKE:** Dew point or 'feels like' temperature.

4.2 Basic Operations

- **Adjustable Brightness:** The display features adjustable brightness levels (low, mid, high) for comfortable viewing in various lighting conditions.
- **Alarms:** Set customizable high/low alerts for various weather parameters.
- **Date/Time:** The date format and display of dew point or 'feels like' temperature can be adjusted.

4.3 WiFi Connectivity and Online Services

The WF-100C Lite supports real-time data synchronization with popular weather services like Weathercloud and Wunderground.

KABELLOSE VERBINDUNG

Informieren Sie sich jederzeit auf Wetterseiten

Figure 6: Monitor your weather data remotely via Weathercloud or Wunderground.

1. **Connect to WiFi:** Follow the on-screen instructions or refer to the detailed WiFi setup guide (usually available online) to connect your console to your home WiFi network.
2. **Register with Weather Services:** Create an account on Weathercloud or Wunderground.
3. **Synchronize Data:** Link your weather station to your online account. This allows you to track current data, view historical trends (up to 500 days), and analyze graphs from your mobile phone, PC, or tablet.

5. MAINTENANCE

5.1 Cleaning the Outdoor Sensor

Regular cleaning ensures accurate readings, especially for the rain gauge and anemometer.

- **Rain Gauge:** Periodically check and clean the rain collector funnel for debris (leaves, insects) that could

block the tipping bucket mechanism.

- **Anemometer/Wind Vane:** Ensure the wind cups and wind vane rotate freely. Remove any obstructions.
- **Radiation Shield:** Keep the thermo-hygrometer radiation shield clean to prevent inaccurate temperature and humidity readings.

5.2 Battery Replacement

- **Outdoor Sensor:** Replace the 3 AA batteries in the outdoor sensor when the low battery indicator appears on the console.
- **Main Console:** Replace the 3 AAA backup batteries in the console as needed.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
No outdoor data on console	Sensor not paired, low sensor battery, out of range, interference.	Check sensor batteries. Bring sensor closer to console to re-pair. Reduce interference sources.
Inaccurate temperature/humidity	Sensor exposed to direct sunlight/heat, dirty radiation shield.	Relocate sensor to a shaded area. Clean the radiation shield.
Incorrect wind speed/direction	Obstructions, sensor not level, debris in anemometer.	Ensure sensor is in an open area. Check bubble level. Clean wind cups.
Rainfall not registering	Debris in rain collector, tipping bucket stuck.	Clean the rain collector funnel and check the tipping bucket mechanism.
WiFi connection issues	Incorrect password, weak signal, router issues.	Verify WiFi password. Move console closer to router. Restart router.

7. SPECIFICATIONS

Feature	Detail
Model Number	WF-100C Lite
Product Dimensions (L x W x H)	13.46 x 16.26 x 1.52 cm (Console); 1.94 kg (Total)
Connectivity Technology	Wireless, Wi-Fi
Power Source	Battery Powered (Outdoor Sensor: 3x AA; Console Backup: 3x AAA), AC Adapter (Console)
Special Features	Adjustable Brightness, Alarm, Clock, Customizable Alert, Pre-calibrated, Large Screen

Feature	Detail
Measurements	Temperature, Humidity, Wind Speed, Wind Direction, Precipitation, Barometric Pressure, Dew Point, Moon Phase, 12-hour Forecast
Outdoor Sensor Components	Anemometer, Wind Vane, Rain Gauge, Thermo-Hygrometer, Solar Panel, Bubble Level
Wireless Range	Up to 100 meters (330 feet)
Color	Black
Manufacturer	Radioddity
Country of Origin	China

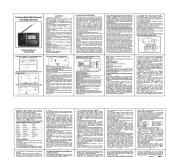

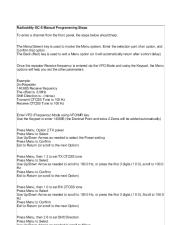

8. WARRANTY AND SUPPORT

For warranty information, please refer to the documentation provided with your purchase or contact the seller directly. If you encounter any issues not covered in this manual, please reach out to Radioddity customer support for assistance.

You can often find additional support and FAQs on the manufacturer's official website or through the online weather service platforms (Weathercloud/Wunderground) if your query relates to data synchronization.
