2. IMPORTANT SAFETY INFORMATION

Please read all instructions carefully before using the appliance. Failure to follow these safety guidelines may result in electric shock, fire, or serious injury.

- Always unplug the appliance from the power outlet when not in use, before assembling or disassembling parts, and before

cleaning.

- Do not immerse the main unit, cord, or plug in water or any other liquid. Only the removable parts are washable.
- This appliance is for household use only. Do not use outdoors.
- Keep the appliance and its cord out of reach of children.
- Do not operate any appliance with a damaged cord or plug, or after the appliance malfunctions or has been damaged in any manner.
- Avoid contact with moving parts.
- Use only attachments recommended or sold by the manufacturer.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
- Always ensure the lid is securely locked in place before operating.
- Surfaces may become hot during use. Do not touch hot surfaces directly. Use handles or knobs.

4. SETUP

Before first use, follow these steps:

1. **Unpack:** Carefully remove all components from the packaging.
2. **Clean:** Wash the blending jar, blade assembly, lid, spatula, and egg rack with warm soapy water. Rinse thoroughly and dry. Wipe the main unit base with a damp cloth. Do not immerse the base in water.
3. **Assemble:** Place the blade assembly into the blending jar. Ensure it is securely seated.
4. **Position:** Place the blending jar onto the main unit base, ensuring it clicks into place.

5. OPERATING INSTRUCTIONS

5.1. Steaming and Pureeing (Automatic)

This function allows for fully automatic steaming followed by pureeing, ideal for fresh vegetable or fruit purees.

1. **Prepare Ingredients:** Wash, peel, and chop vegetables or fruits into small pieces (approx. 1-2 cm cubes).
2. **Add to Jar:** Place the chopped ingredients into the blending jar. Do not overfill; ensure the maximum fill line is not exceeded.
3. **Fill Water Tank:** Open the water tank lid on the main unit. Fill the water tank with distilled or purified water up to the desired level, corresponding to the steaming time needed (refer to recipe or ingredient guidelines). Close the water tank lid securely.
4. **Secure Lid:** Place the lid onto the blending jar and twist to lock it in place.
5. **Select Function:** Plug in the appliance. On the control panel, select the desired steaming time (e.g., 15, 20, 25, 30 minutes) or the 'AI' (Automatic) function if available, which will steam and then automatically puree.
6. **Start:** Press the start button. The appliance will begin steaming. Once steaming is complete, if 'AI' was selected, it will automatically switch to pureeing. If a specific time was chosen, you may need to manually activate the pureeing function after steaming.

7. **Serve:** Once pureeing is complete, unplug the appliance. Carefully remove the lid and blending jar. Use the spatula to transfer the fresh puree to a bowl.

5.2. Pureeing Only

Use this function for already cooked ingredients or fresh soft fruits.

1. **Add Ingredients:** Place cooked or soft ingredients into the blending jar.
2. **Secure Lid:** Place the lid onto the blending jar and twist to lock it in place.
3. **Select Function:** Plug in the appliance. Select the 'Puree' function on the control panel.
4. **Start:** Press the start button. The appliance will blend until smooth.
5. **Serve:** Unplug the appliance. Carefully remove the lid and blending jar. Transfer the puree to a bowl.

5.3. Reheating and Defrosting

This function uses steam to gently reheat or defrost baby food.

1. **Prepare Food:** Place the food to be reheated or defrosted into a heat-resistant container (e.g., a small bowl) that fits inside the blending jar.
2. **Add Water:** Fill the water tank with distilled or purified water according to the desired reheating time.
3. **Place Container:** Place the container with food inside the blending jar.
4. **Secure Lid:** Place the lid onto the blending jar and twist to lock it in place.
5. **Select Function:** Plug in the appliance. Select the 'Reheat' or 'Defrost' function on the control panel.
6. **Start:** Press the start button. The appliance will generate steam to warm the food.
7. **Check Temperature:** Once complete, carefully remove the container and check the food temperature before serving to your baby.

5.4. Bottle Sterilization

This function uses steam to sterilize baby bottles and accessories.

1. **Prepare Items:** Wash bottles, nipples, and other accessories thoroughly before sterilization.
2. **Place in Jar:** Place the clean bottles and accessories upside down in the blending jar. Ensure they are arranged to allow steam circulation.
3. **Add Water:** Fill the water tank with distilled or purified water to the recommended sterilization level.
4. **Secure Lid:** Place the lid onto the blending jar and twist to lock it in place.
5. **Select Function:** Plug in the appliance. Select the 'Sterilize' function on the control panel.
6. **Start:** Press the start button. The appliance will generate steam to sterilize the items.
7. **Cool Down:** Once complete, allow the items to cool down before handling. Use tongs to remove them.

5.5. Egg Cooking

Use the included egg rack to steam eggs.

1. **Place Eggs:** Place eggs onto the egg rack.
2. **Add Water:** Fill the water tank with distilled or purified water to the appropriate level for steaming eggs (refer to desired doneness).
3. **Place Rack:** Place the egg rack with eggs into the blending jar.
4. **Secure Lid:** Place the lid onto the blending jar and twist to lock it in place.
5. **Select Function:** Plug in the appliance. Select a steaming time on the control panel.
6. **Start:** Press the start button. The appliance will steam the eggs.
7. **Cool Down:** Once complete, carefully remove the eggs and cool them before peeling.

6. MAINTENANCE AND CLEANING

Regular cleaning ensures optimal performance and longevity of your appliance.

1. **Unplug:** Always unplug the appliance before cleaning.
2. **Disassemble:** Remove the blending jar, blade assembly, and lid from the main unit.
3. **Wash Removable Parts:** Wash the blending jar, blade assembly, lid, spatula, and egg rack with warm soapy water. Rinse thoroughly under running water. These parts are generally dishwasher safe on the top rack, but hand washing is recommended for longevity.
4. **Clean Main Unit:** Wipe the main unit base with a damp cloth. Do not immerse the main unit in water or any other liquid.
5. **Descaling Water Tank:** Over time, mineral deposits may build up in the water tank. To descale, fill the water tank with a mixture of 1 part white vinegar and 2 parts water. Let it sit for 30 minutes, then run a steaming cycle without food. Rinse the tank thoroughly several times with clean water. Perform descaling regularly, depending on water hardness in your area.
6. **Dry and Store:** Ensure all parts are completely dry before reassembling or storing the appliance. Store in a cool, dry place.

7. TROUBLESHOOTING

If you encounter issues with your Easybaby 4-in-1 Baby Food Processor, refer to the following table:

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power outlet issue; jar/lid not correctly assembled.	Ensure plug is firmly in outlet; check power outlet with another device; ensure blending jar and lid are securely locked in place.
No steam is produced.	Water tank empty; mineral buildup in water tank.	Fill water tank with water; descale the water tank as per cleaning instructions.

Problem	Possible Cause	Solution
Food is not pureed smoothly.	Too much food in jar; ingredients not steamed enough; blade not properly installed.	Reduce food quantity; steam for a longer duration; ensure blade assembly is securely in place.
Leaking from the jar.	Lid not properly sealed; jar not correctly seated on base.	Ensure lid is twisted and locked securely; ensure blending jar is firmly seated on the main unit base.
