

SLOPEHILL 8802

SLOPEHILL Dog Training Collar with Remote (Model 8802)

User Instruction Manual

INTRODUCTION

This manual provides comprehensive instructions for the safe and effective use of your SLOPEHILL Dog Training Collar with Remote, Model 8802. Please read this manual thoroughly before operating the device to ensure proper training and the well-being of your dog.

IMPORTANT SAFETY INFORMATION

Warning:

- Do not leave the collar on your dog for more than 8 hours per day! Prolonged wear can lead to skin irritation.
- Regularly check your dog's neck for any signs of irritation or sores. If found, discontinue use until the skin heals.
- The remote is not waterproof. Avoid exposing it to water. The receiver collar is IP68 waterproof.
- This training collar is designed for dogs aged 3 months or older, weighing over 8 pounds.
- Always start training with the lowest stimulation levels and gradually increase if necessary.
- Never use the shock function as punishment. It should be used as a corrective measure during training.

PACKAGE CONTENTS

- Remote Transmitter
- Receiver Collar(s) (Quantity may vary based on purchase)
- Adjustable Nylon Collar Strap
- USB Charging Cable
- Test Light Tool
- Contact Points (Short and Long)
- Silicone Conductive Caps

- User Manual (This document)

PRODUCT OVERVIEW

Remote Transmitter

- **LCD Display:** Shows channel, battery level, and stimulation intensity.
- **Shock Button:** Delivers static stimulation.
- **Vibration Button:** Delivers vibration stimulation.
- **Beep Button:** Emits an audible tone.
- **Light Button:** Activates the anti-lost light on the receiver collar.
- **Channel Button (CH):** Switches between receiver collars (up to 3).
- **Intensity Adjustment Buttons (+/-):** Adjusts vibration and shock levels (0-99).
- **Keypad Lock Switch:** Prevents accidental operation.

Receiver Collar

- **Contact Points:** Deliver static stimulation.
- **LED Indicator Light:** Shows power status, charging status, and mode activation.
- **Charging Port:** For recharging the collar.
- **Power Button:** Turns the receiver on/off.

- **Anti-lost Light:** Helps locate your dog in low light conditions.

SETUP

1. Charging the Devices

Before first use, fully charge both the remote transmitter and the receiver collar(s).

1. Connect the USB charging cable to the charging ports on both the remote and receiver.
2. Plug the USB cable into a standard USB power adapter (not included).
3. The LED indicator on the receiver will be red during charging and turn green when fully charged. The remote's battery icon will show full.
4. Charging typically takes about 2 hours. A full charge provides approximately 45 days of standby for the remote and 15-20 days of use for the receiver.
5. Ensure the silicone plug of the charging port on the receiver is tightened after charging to maintain IP68 waterproofing.

Image: Remote and receiver collar connected to a USB charging cable, illustrating the long-lasting battery life.

2. Pairing the Remote and Receiver

The devices are typically pre-paired from the factory. If re-pairing is needed or you are adding an additional collar:

1. Turn on the remote transmitter.
2. Select the desired channel (CH1, CH2, or CH3) using the 'CH' button on the remote.
3. With the receiver collar turned off, press and hold the power button on the receiver until the LED indicator flashes rapidly.
4. While the receiver LED is flashing, press any stimulation button (Beep, Vibration, or Shock) on the remote.
5. If pairing is successful, the receiver's LED will stop flashing and remain solid green for a few seconds, then turn off.

3. Installing Contact Points and Silicone Caps

Choose the appropriate length of contact points based on your dog's coat thickness. For most dogs, the shorter points are sufficient. For dogs with thicker coats, use the longer points to ensure proper contact.

- Screw the chosen contact points into the receiver collar.
- Place the conductive silicone caps over the contact points. These caps make the stimulation softer and more comfortable for your dog while still being effective.

Image: Instructions for installing silicone conductive prongs and ensuring proper collar fit on a dog.

4. Fitting the Collar

Proper fit is crucial for effectiveness and your dog's comfort.

1. Center the receiver under your dog's neck, ensuring the contact points touch the skin.
2. Adjust the strap so it is snug but not too tight. You should be able to fit one finger comfortably between the strap and your dog's neck.
3. The collar strap is adjustable from 8 to 26 inches, suitable for dogs weighing 8 to 140 lbs. Trim any excess strap length if necessary.
4. To prevent pressure sores, reposition the receiver on your dog's neck every 1 to 2 hours.

7 Training Modes

Correct Dog's Bad Behaviors in Time

OPERATING INSTRUCTIONS

1. Turning On/Off

- **Remote:** Press any button to activate. It will automatically enter sleep mode after a period of inactivity.
- **Receiver:** Press and hold the power button until the LED indicator lights up. Press and hold again to turn off.

2. Training Modes

The SLOPEHILL training collar offers 7 distinct training modes:

- **Beep Mode:** Delivers an audible tone. Useful for attracting attention or as a warning.
- **Vibration Mode:** Delivers a gentle vibration. Can be used as a mild correction or attention-getter.
- **Low Shock Level (0-50):** Provides a static stimulation at lower intensity levels.
- **High Shock Level (51-99):** Provides a static stimulation at higher intensity levels.
- **No Shock Mode:** Activates a safety feature that prevents accidental static stimulation.
- **Light Mode:** Activates the anti-lost light on the receiver collar.
- **Keypad Lock Mode:** Locks the remote's buttons to prevent unintended commands.

3. Adjusting Intensity Levels

Use the '+' and '-' buttons on the remote to adjust the vibration and static stimulation levels from 0 to 99. Always start at the lowest level and observe your dog's reaction. Increase the level only if your dog does not respond.

4. Using the Anti-Lost Light

Press the 'Light' button on the remote to activate the LED light on the receiver collar. This feature is useful for locating your dog in the dark or for increasing visibility during night walks.

IP68 Waterproof Receiver Collar

5. Multi-Dog Training

The remote transmitter can control up to 3 receiver collars. Use the 'CH' button to switch between channels (CH1, CH2, CH3) to train multiple dogs individually.

MAINTENANCE

- **Cleaning:** Wipe the collar and receiver with a damp cloth. Do not use harsh chemicals.
- **Battery Care:** Recharge the devices regularly, even if not in frequent use, to maintain battery health. Avoid overcharging.
- **Waterproofing:** The receiver collar is IP68 waterproof, suitable for swimming and bathing. However,

ensure the charging port's silicone plug is securely closed. The remote is NOT waterproof.

- **Contact Points:** Periodically check the contact points for cleanliness and ensure they are securely attached.
