## ELEGANT BL-363672CO

# ELEGANT Corner Shower Enclosure Instruction Manual

MODEL: BL-363672CO

Brand: ELEGANT

## Introduction

---

Thank you for choosing the ELEGANT Corner Shower Enclosure. This manual provides detailed instructions for the safe and proper installation, operation, and maintenance of your new shower enclosure. Please read all instructions carefully before beginning installation and keep this manual for future reference.

## Safety Information

---

- Always wear safety glasses during installation.
- Handle glass panels with extreme care. Tempered glass, while strong, can shatter if struck at the edges.
- Ensure the installation surface (walls, floor) is structurally sound and level.
- It is highly recommended that two people perform the installation due to the weight and size of the glass panels.
- Use appropriate tools and follow all local building codes.
- Do not overtighten screws, as this may damage components.

## Package Contents

---

Before you begin, verify that all parts are included as listed in your product's instruction sheet. Typical components include:

- Tempered Glass Panels (Fixed and Sliding)
- Aluminum Wall Profiles and Rails
- Stainless Steel Handles
- Sliding Rollers/Wheels
- Magnetic Water Retaining Strips

- Screws, Wall Plugs, and Screw Covers
- Rail Adapters and Limit Blocks
- Water Retaining Strip

## Specifications

<b>Door Style</b>	Framed, Sliding
<b>Style</b>	Modern
<b>Finish Type</b>	Satin
<b>Product Dimensions</b>	36"D x 36"W x 72"H
<b>Material</b>	Stainless Steel
<b>Shape</b>	Square
<b>Color</b>	Black
<b>Unit Count</b>	1.0 Count
<b>Installation Type</b>	Screw-In
<b>Required Assembly</b>	Yes
<b>Number of Doors</b>	2
<b>Number Of Panels</b>	3
<b>Glass Thickness</b>	0.25 Inches (6mm)
<b>Handle Type</b>	Stationary

## Setup and Installation

Installation of the ELEGANT Corner Shower Enclosure requires careful attention to detail. We recommend reviewing the

official installation video and having at least two people for assembly, especially when handling glass panels.

Your browser does not support the video tag.

Video: Official ELEGANT Sliding Corner Shower Enclosure Installation Guide. This video provides a visual walkthrough of the assembly process.

### Key Installation Steps:

1. **Prepare the Area:** Ensure your shower base is installed and the walls are clean and ready.
2. **Mark Wall Profiles:** Position the wall profiles vertically on the wall according to your model size. Mark the hole positions, ensuring they are not too close to tile edges.
3. **Drill and Secure Wall Profiles:** Drill 6mm holes at the marked positions. Insert wall plugs with a hammer, then attach the wall profiles with screws and apply screw covers. Repeat for all wall profiles.
4. **Assemble Fixed Panels:** Secure the rails and glass panels together with screws. Install limit blocks and the water retaining strip.
5. **Install Fixed Panels:** Insert the assembled fixed panels into the secured wall profiles. This step is best performed by two people.
6. **Connect Fixed Panels:** Use the rail adapter and screws to connect the two fixed panels at the corner.
7. **Install Moving Panels (Doors):** Install the wheels onto the moving glass panels, then attach the decorative covers.
8. **Hang Moving Panels:** Carefully hang the moving panels by fitting the wheels onto the top rail. Press the button to fit the bottom wheels into the bottom rail.
9. **Install Handles:** Attach the stainless steel handles to the moving panels.
10. **Install Water Retaining Strips:** Install the magnetic water retaining strips on the vertical edges of the doors and the regular water retaining strips along the bottom edges.
11. **Final Securing:** Secure the fixed panels to the wall profiles using screws and decorative covers.
12. **Apply Silicone Sealant:** Apply silicone sealant to the outside edges of the profiles where they meet the wall and shower base. Allow at least 24 hours for the sealant to dry completely before use.

# Stainless Steel Handle

Simple to open and close

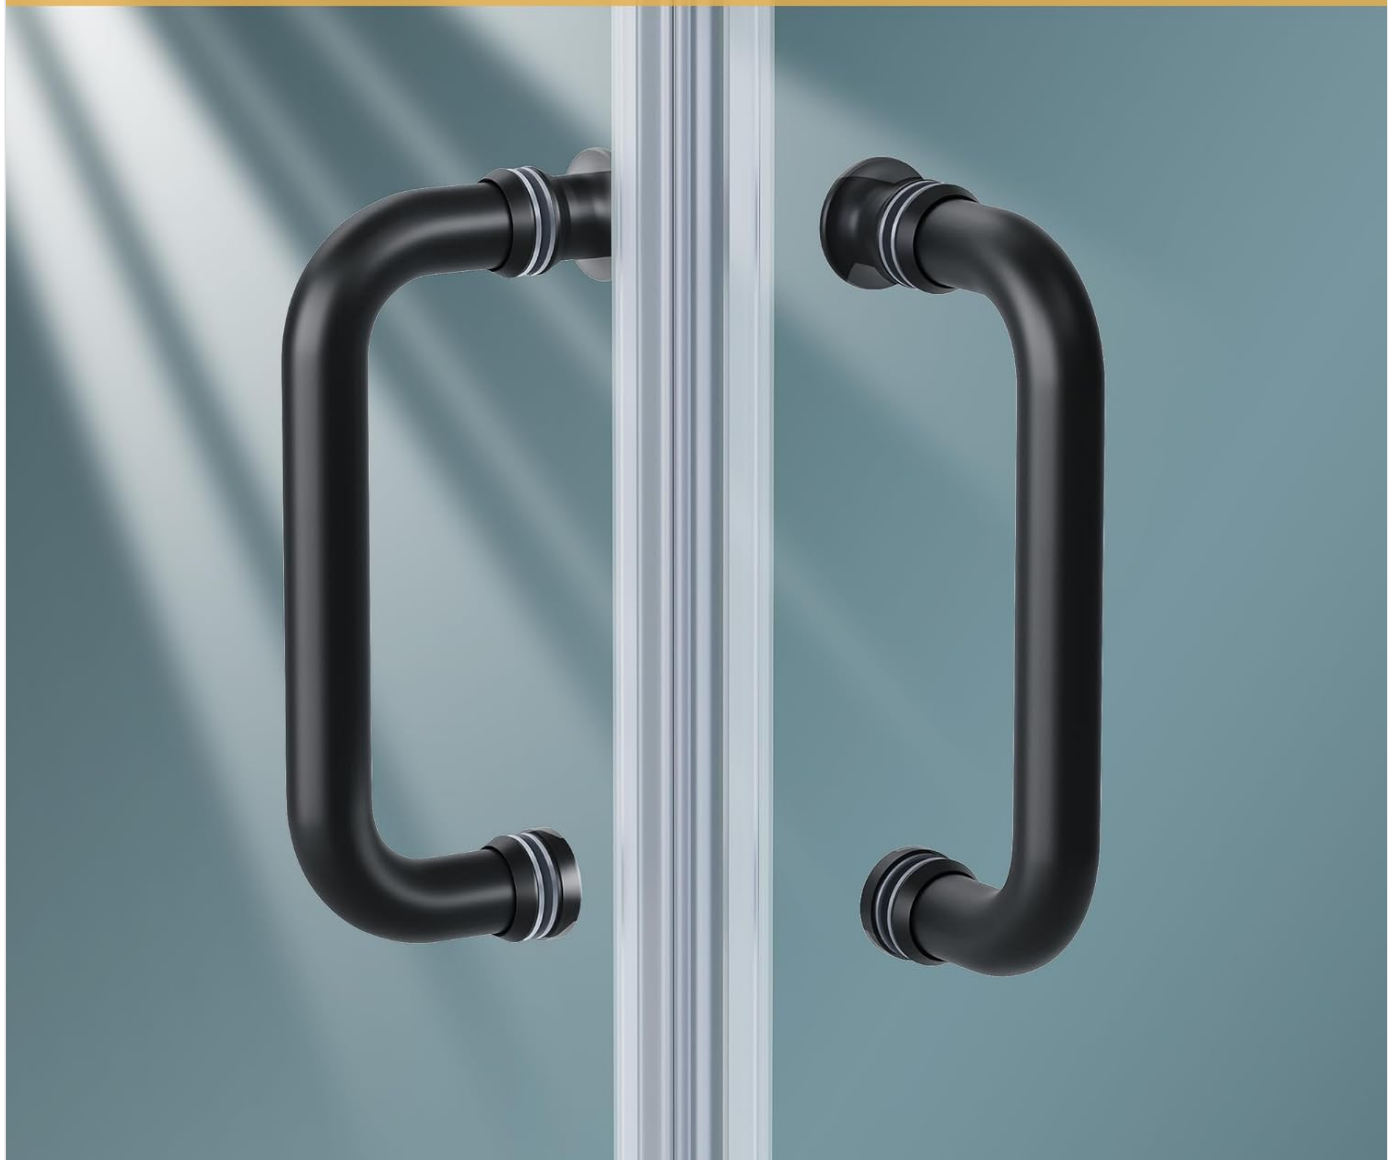

Image: Flexible adjustment of wall profiles allows for minor adjustments during installation.

# Sliding Smoothly

Stable structural track for smooth and quiet sliding

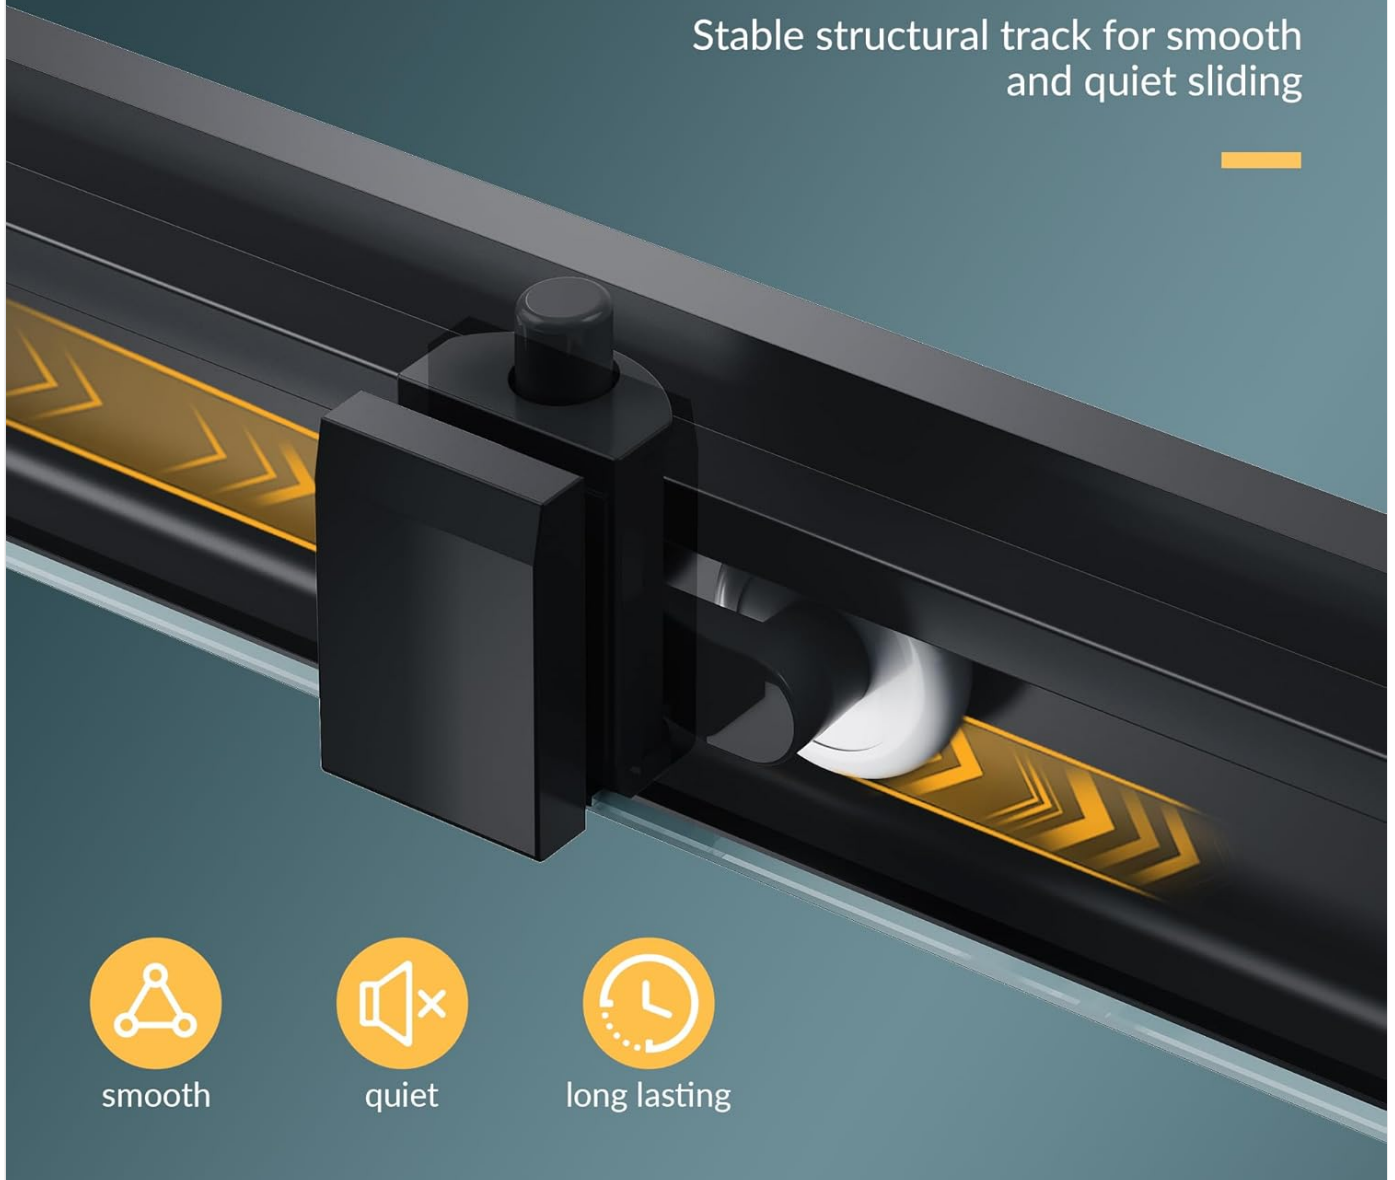

Image: The robust aluminum frame provides a stable and secure structure for the enclosure.

## Operating Instructions

The ELEGANT Corner Shower Enclosure features double sliding doors designed for smooth and quiet operation, providing a wide entrance.

- To open the doors, gently slide them along the top and bottom tracks. The doors are designed to slide effortlessly.
- To close the doors, slide them until the magnetic strips on the vertical edges meet and securely seal. This magnetic seal helps prevent water from leaking out.
- The stainless steel handles provide a comfortable grip for opening and closing the doors.

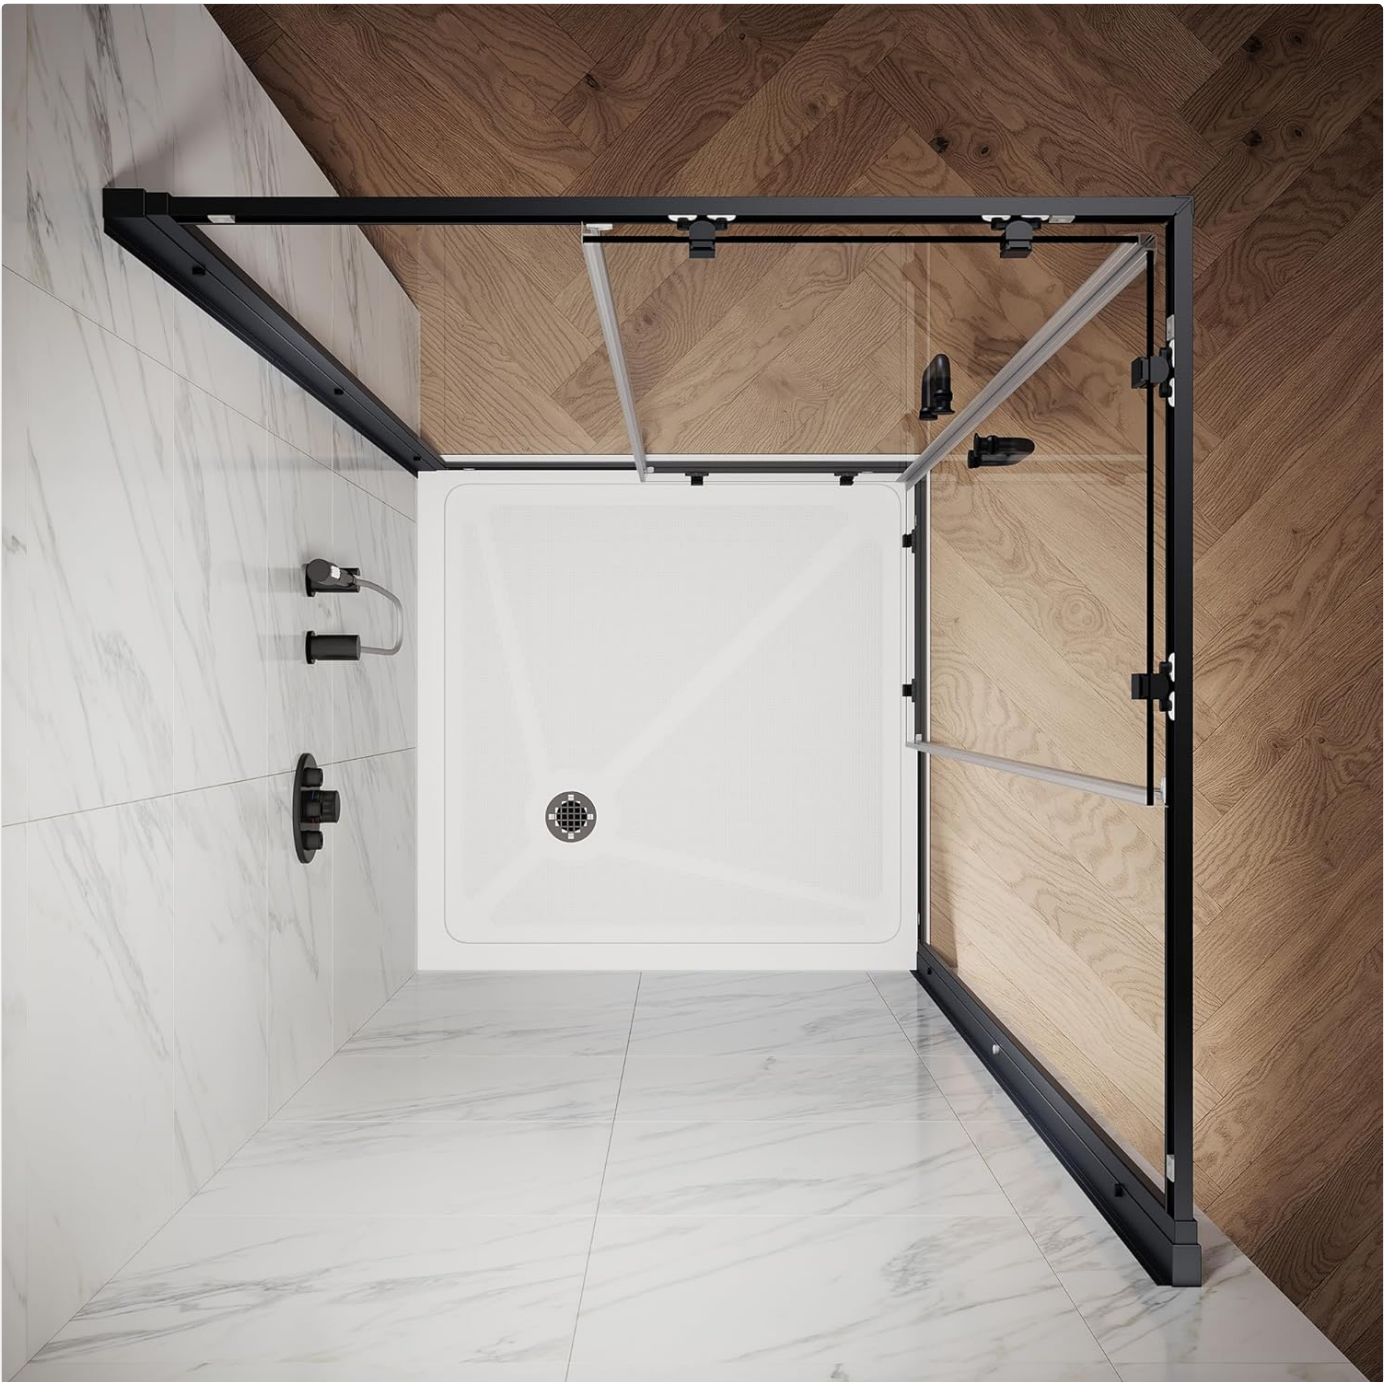

Image: The stable structural track ensures smooth and quiet sliding of the shower doors.

# Aluminum Frame

Builds a stable and safe structure

Image: The magnetic strip ensures the shower doors close securely, preventing water spillage.

## Maintenance

---

Proper maintenance will ensure the longevity and appearance of your ELEGANT Corner Shower Enclosure.

- **Cleaning Glass:** Clean the tempered glass panels regularly with a soft cloth and a mild, non-abrasive glass cleaner. Avoid harsh chemicals or abrasive pads that could scratch the glass or damage the frame finish.
- **Cleaning Frame:** Wipe down the black frame with a soft, damp cloth. Do not use abrasive cleaners or solvents.
- **Cleaning Tracks:** Keep the sliding tracks free of debris, soap scum, and hair to ensure smooth operation of the doors. The bottom rollers can be easily released for thorough cleaning by pressing a button.
- **Seal Integrity:** Periodically check the water retaining strips and silicone sealant for any signs of wear or damage. Replace if necessary to maintain a watertight seal.

Image: Easy cleaning of the bottom track by pressing a button to release the rollers.

## Troubleshooting

---

If you encounter any issues with your shower enclosure, refer to the following common solutions:

- **Water Leakage:** Ensure all silicone sealant is properly applied and fully cured. Check that the magnetic and regular water retaining strips are correctly installed and undamaged. Adjust door alignment if necessary.
- **Doors Not Sliding Smoothly:** Clean the top and bottom tracks thoroughly to remove any obstructions. Check that the rollers are free of debris and properly seated in the tracks. Lubricate tracks with a silicone-based spray if needed.
- **Difficulty During Installation:** The installation process can be complex. It is highly recommended to have two people for assembly, especially when lifting heavy glass panels. Refer to the detailed instructions and the official installation video for guidance. If issues persist, consider consulting a professional installer.

## Warranty and Support

---

ELEGANT products are designed for quality and durability. Your purchase includes a 30-day easy return policy. For any questions, concerns, or assistance with your ELEGANT Corner Shower Enclosure, please contact Elegant Home Supply customer support.
