Tineco Floor ONE S5 Blue

Tineco Floor ONE S5 Smart Cordless Wet Dry Vacuum Cleaner and Mop

Model: Floor ONE S5 Blue

Brand: Tineco

Introduction | Setup | Operating Instructions | Maintenance | Troubleshooting | Specifications | Warranty & Support

1. Introduction

The Tineco Floor ONE S5 is a smart cordless wet dry vacuum cleaner and mop designed for efficient cleaning of hard floors. It combines vacuuming and mopping functions to tackle both wet and dry messes, including sticky spills and pet hair. Equipped with Tineco's proprietary iLoop Smart Sensor Technology, the device intelligently adjusts suction power, water flow, and brush roller speed based on the detected debris level, ensuring optimal cleaning performance and leaving floors streak-free.

2. Setup

2.1 Unpacking and Assembly

Carefully remove all components from the packaging. Ensure all parts listed in the "What's Included" section are present before proceeding with assembly.

- Main body of the vacuum cleaner
- Handle assembly
- Clean water tank
- Dirty water tank
- Brush roller
- Charging base (3-in-1 docking station)
- Cleaning tool
- Deodorizing & cleaning solution
- Dry filter
- Replacement brush roller

Figure 2.1: Included components for the Tineco Floor ONE S5.

Attach the handle assembly to the main body until it clicks securely into place. Ensure the clean and dirty water

tanks are properly seated in their respective compartments.

2.2 Charging the Device

Place the Tineco Floor ONE S5 on its 3-in-1 docking station. Connect the power adapter to the docking station and plug it into a wall outlet. The digital display will indicate charging status. A full charge provides approximately 35 minutes of runtime.

2.3 Filling the Clean Water Tank

Remove the clean water tank from the device. Fill the tank with clean tap water up to the MAX line. For optimal cleaning and deodorizing, add the recommended amount of Tineco cleaning solution to the clean water tank. Reinsert the tank securely into the device.

3. Operating Instructions

3.1 Powering On and Off

Press the power button located on the handle to turn the device on. Press it again to turn the device off. The digital display will illuminate upon activation.

3.2 iLoop Smart Sensor Technology

The Tineco Floor ONE S5 features iLoop Smart Sensor Technology, which automatically detects the level of debris and adjusts suction power and water flow accordingly. The digital display will show a blue ring when the floor is clean and a red ring when debris is detected, indicating areas that require more attention.

Figure 3.2: Comparison of Tineco iLoop Smart Sensor's adaptive suction versus others.

3.3 Cleaning Performance

The exclusive brush roller design allows for enhanced edge cleaning, reaching close to baseboards and into hard-to-reach corners. The real fresh water cleaning system ensures that floors are always washed with clean water, preventing the spread of dirty water. Floors dry quickly and are left streak-free.

Figure 3.3: Enhanced brush head design for superior edge cleaning.

Figure 3.4: Real fresh water cleaning system in action.

The dual-tank system keeps clean and dirty water separate, ensuring you are always cleaning with fresh water and solution. The clean water tank is 30% larger than previous models, allowing for cleaning of larger areas without interruption. The device can clean up to 2500 sq ft on a single charge.

Figure 3.6: The Floor ONE S5 effectively vacuums and washes various types of messes simultaneously.

4. Maintenance

4.1 Self-Cleaning Function

The Tineco Floor ONE S5 features a hands-free self-cleaning function. After use, place the device on its docking station and activate the self-cleaning cycle. This function automatically flushes the inner tubing and brush roller, ensuring thorough cleaning and preventing odors. Centrifugal drying effectively removes water from the roller after cleaning.

Figure 4.1: Mess-free self-cleaning process.

4.2 Dirty Water Tank and Filter Cleaning

Regularly empty and rinse the dirty water tank after each use. The pet hair strainer within the dirty water tank makes pet hair removal quick and easy. The disk filter should also be cleaned regularly to maintain optimal suction and performance. Refer to the full user manual for detailed instructions on filter removal and cleaning.

4.3 Brush Roller Maintenance

While the self-cleaning function is effective, occasional manual inspection and cleaning of the brush roller may be necessary, especially if excessive debris or hair accumulates. Use the provided cleaning tool to remove any tangled hair or stubborn dirt from the brush roller.

5. Troubleshooting

This section provides general guidance for common issues. For detailed troubleshooting steps, please refer to the comprehensive user manual or contact Tineco customer support.

Problem	Possible Cause	Solution
Device does not turn on	Battery is low or depleted; device not properly charged.	Ensure the device is fully charged on the docking station. Check power connection.
Poor suction or cleaning performance	Dirty water tank full; clean water tank empty; brush roller tangled; filter clogged.	Empty dirty water tank. Refill clean water tank. Clean brush roller and filter.
Water leakage	Water tanks not properly installed; seals are damaged.	Ensure both clean and dirty water tanks are securely in place. Inspect seals for damage.
Unpleasant odor	Dirty water tank not emptied/cleaned; brush roller not cleaned.	Perform self-cleaning cycle. Thoroughly clean dirty water tank and brush roller.
