Philips Hue 65-Inch TV LightStrip + Hue Bridge

Philips Hue 65" Smart TV Light Strip with Bridge User Manual

MODEL: 65-INCH TV LIGHTSTRIP + HUE BRIDGE

Brand: Philips Hue

1. Introduction

The Philips Hue 65" Smart TV Light Strip with Bridge is designed to enhance your home entertainment experience by providing immersive, color-changing LED backlighting for your television. This system syncs with your TV content, music, and gaming, creating a dynamic and engaging atmosphere. It features White and Color Ambiance LEDs capable of producing millions of colors, with gradient capabilities for seamless color transitions. Control is intuitive via the Philips Hue App or voice commands through compatible smart assistants.

2. Setup

This section guides you through the installation and initial setup of your Philips Hue 65" Smart TV Light Strip and Bridge.

2.1. What's Included

- One Philips Hue 65" TV smart LED light strip
- Mounting brackets for the light strip
- One Philips Hue Bridge

2.2. Physical Installation

Attach the TV light strip to the back of your 65-inch TV using the included mounting brackets. These brackets are designed to allow the light strip to bend easily around corners, ensuring optimal placement for light projection. Ensure the light strip is securely fastened to prevent detachment.

Seamless voice control

Works with Amazon Alexa and the Google Assistant

2.3. Connecting the Hue Bridge

The Philips Hue Bridge is essential for full functionality, including syncing with content and advanced control features. Connect the Hue Bridge to your home network and power source as per the instructions provided with the Bridge.

2.4. App Setup

Download the Philips Hue app from your device's app store. Follow the in-app instructions to connect your Hue Bridge and light strip. This app allows you to personalize light settings, set up voice control, and manage your lighting system.

3. Operating

Once set up, your Philips Hue Light Strip offers various ways to enhance your viewing and listening experience.

3.1. Content Syncing

The Philips Hue system, when paired with a Hue Sync Box (sold separately), provides real-time, color-accurate ambient TV lighting. This technology ensures no delays, creating an immersive experience for movies, music, and video games by mirroring the colors on your screen.

Easy to install and personalize in the Philips Hue app

3.2. App Control and Personalization

Use the Philips Hue app to customize your lighting. You can select from millions of colors, adjust brightness, and create custom scenes. The gradient-enabled light strip produces multiple colors simultaneously, offering a seamless blend of light.

3.3. Voice Control

Set up voice control within the Hue app to use simple voice commands with Amazon Alexa or Google Assistant. This allows for convenient hands-free control of your lighting.

Fitting 65" to 70" TVs

4. Maintenance

To ensure the longevity and optimal performance of your Philips Hue Light Strip and Bridge, follow these general maintenance guidelines:

- **Cleaning:** Gently wipe the light strip and Bridge with a soft, dry cloth. Avoid using abrasive cleaners or solvents, as these can damage the surfaces.
- **Dust Accumulation:** Periodically check for dust accumulation on the light strip, especially in hard-to-reach areas behind the TV. Dust can affect light output and heat dissipation.
- **Cable Management:** Ensure all cables are neatly organized and not pinched or strained, which can lead to damage over time.

5. Troubleshooting

If you encounter issues with your Philips Hue Light Strip or Bridge, consider the following common troubleshooting steps:

- **Lights Not Responding:** Check if the light strip and Bridge are properly powered and connected. Ensure your Wi-Fi network is active and the Hue Bridge is connected to the router.
- **App Connectivity Issues:** Restart the Philips Hue app. If the issue persists, try restarting your smartphone and the Hue Bridge. Ensure your app is updated to the latest version.
- **Sync Box Not Working:** Verify that the Hue Sync Box is correctly connected to your TV and input devices. Check its power supply and network connection. Refer to the Hue Sync Box manual for specific troubleshooting steps.
- **Voice Control Problems:** Ensure your voice assistant (Alexa, Google Assistant) is properly linked to your Philips Hue account in the respective app. Check your internet connection and the voice assistant device's functionality.
- **Flickering Lights:** This can sometimes be caused by loose connections or power fluctuations. Check all physical connections. If the issue continues, contact Philips Hue support.

For more detailed troubleshooting, refer to the official Philips Hue support resources online.

6. Specifications

Feature	Detail
Brand	Philips Hue
Model	65-Inch TV LightStrip + Hue Bridge
Color	Multicolor (White and Color Ambiance)
