SETUP AND INSTALLATION

The window kit is designed to fit most standard vertical and horizontal windows. Adjust the window slider kit to the length of your window opening and secure it. Ensure a tight seal to prevent air leakage.

drain port if needed.

3. General Cleaning

Wipe the exterior of the unit with a soft, damp cloth. Do not use harsh chemicals or abrasive cleaners. Ensure the unit is unplugged before cleaning.

Before storing the unit for an extended period, drain any accumulated water, clean the air filter, and cover the unit to protect it from dust.
