Hot Wheels HDP06

Hot Wheels City Shark Attack Playset

Model: HDP06 - Instruction Manual

1. PRODUCT OVERVIEW

The Hot Wheels City Shark Attack Playset offers an exciting adventure where vehicles navigate a parking structure while evading a menacing shark. This playset features three activation points that randomly trigger the shark to emerge and attempt to capture cars. The objective is to reach the finish line and trap the shark, releasing any captured vehicles. The set includes one Hot Wheels vehicle and provides ample parking for additional cars (sold separately). It can be connected to other Hot Wheels sets and track pieces to create a unique Hot Wheels City. Colors and decorations may vary.

2. SAFETY INFORMATION

WARNING: Not suitable for children under 36 months due to small parts which may present a choking hazard.

- Adult supervision is recommended during play.
- Keep away from open flames or heat sources.
- Inspect the playset regularly for any damaged or loose parts. Discontinue use if damage is found.

3. PACKAGE CONTENTS

Please ensure all components are present before beginning assembly:

- Hot Wheels City Shark Attack Playset components (various plastic track pieces, tower, shark mechanism, base).

- 1 Hot Wheels Die-Cast Vehicle.
- Instruction Manual (this document).

4. SETUP AND ASSEMBLY

The playset requires assembly. Follow the steps below carefully. Refer to the diagrams for visual guidance.

1. **Unpack Components:** Carefully remove all pieces from the packaging and lay them out on a flat, clean surface.
2. **Assemble Base:** Connect the base pieces together as indicated by the molded tabs and slots. Ensure they click securely into place.
3. **Attach Tower:** Secure the main tower structure to the designated points on the base.
4. **Install Tracks:** Attach the various track sections to the tower and base, following the numerical or directional indicators on the pieces. Ensure all track connections are firm to prevent cars from derailing.
5. **Position Shark Mechanism:** Integrate the shark mechanism into its designated slot on the playset. Ensure it moves freely and can be activated.
6. **Connect Elevator/Launcher:** Attach the car elevator or launcher mechanism to the tower.

Figure 4.1: A hand demonstrating the operation of the car elevator, lifting a yellow Hot Wheels car.

Figure 4.2: A hand pressing a yellow button to launch a yellow Hot Wheels car down the track.

5. OPERATING INSTRUCTIONS

Engage in thrilling shark-evading action with your Hot Wheels cars:

1. **Place Car:** Position a Hot Wheels vehicle on the designated starting point, typically at the top of the elevator or launcher.
2. **Launch Car:** Use the elevator or press the launch button to send the car down the track.
3. **Evade the Shark:** As the car descends, it will pass through areas with activation points. These points randomly trigger the shark to lunge forward and attempt to "eat" the car.
4. **Trap the Shark:** Guide your car to the finish line. Successfully reaching the end will activate a mechanism that traps the shark in its cage, releasing any cars it may have captured.
5. **Reset and Replay:** Once the shark is trapped and cars are released, reset the playset by lifting the shark back into its starting position (if it doesn't reset automatically) and prepare for another round of play.

Figure 5.1: A yellow Hot Wheels car speeding down the track directly towards the open jaws of the shark.

Figure 5.2: The shark's jaws closing around a Hot Wheels car, demonstrating the capture mechanism.

6. MAINTENANCE

- **Cleaning:** Wipe the playset with a damp cloth to remove dust and dirt. Do not submerge in water.
- **Storage:** Store the playset in a cool, dry place away from direct sunlight when not in use.
- **Inspection:** Periodically check all connections and moving parts to ensure they are secure and functioning correctly.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Car gets stuck on track.	Loose track connection or debris on track.	Ensure all track pieces are securely connected. Clean the track surface.
Shark mechanism not activating.	Car not hitting activation point correctly or mechanism jammed.	Ensure car passes directly over activation points. Check for any obstructions in the shark mechanism.
Shark not trapping/releasing cars.	Mechanism not fully engaged or misaligned.	Verify that the car reaches the finish line with sufficient speed. Check for proper alignment of the trapping cage.

8. SPECIFICATIONS

Model Number: HDP06

Dimensions (L x W x H): 26 x 54.1 x 48.8 cm (approximately 10.2 x 21.3 x 19.2 inches)

Weight: 2.06 kg (approximately 4.54 lbs)

Recommended Age: 4 years and up

Educational Value: Color Recognition

Main Material: Plastic, Metal

Assembly Required: Yes

Batteries Required: No

Scale: 1:64 (for included vehicle)

9. WARRANTY AND SUPPORT

For warranty information or customer support, please refer to the contact details provided on the product packaging or visit the official Hot Wheels website. Keep your proof of purchase for any warranty claims.
