ABCCANOPY S 10FT 2Tiers Roma Sq Dark Gray3

ABCCANOPY 10x10ft Square Cantilever Patio Umbrella User Manual

Model: S 10FT 2Tiers Roma Sq Dark Gray3

INTRODUCTION

This manual provides detailed instructions for the assembly, operation, and maintenance of your ABCCANOPY 10x10ft Square Cantilever Patio Umbrella. Please read all instructions carefully before use to ensure safe and proper functionality.

The ABCCANOPY cantilever umbrella features a robust, multi-layered 240gsm polyester fabric canopy, designed for superior sun and heat protection. It includes a waterproof and UV-resistant coating. The double-top design enhances aesthetics and incorporates a wind vent for air circulation, which helps minimize wind pressure. A secure screw lock system keeps the ribs firmly in place. The umbrella offers 360-degree rotation and tilt functionality for optimal sun coverage.

SETUP INSTRUCTIONS

Before beginning assembly, ensure all parts are present and accounted for. Refer to the included hardware package for screws, gaskets, and tools. A weighted umbrella base is required for stability and is **not included** with the umbrella. A base weighing 220+ lbs is recommended.

Assembly Steps:

1. **Assemble the Cross Base:** Lay out the cross base components. Attach the central connector to the cross base using 4 thick screws and 4 gaskets. Align the holes and tighten securely.
2. **Attach the Main Pole:** Insert the lower section of the main pole into the central connector on the cross base. Secure it using 4 thick screws and 4 gaskets, ensuring proper alignment and tightness.
3. **Install the Umbrella Base (Sold Separately):** If using a separate weighted base (e.g., a 4-piece stand), attach the black knob and place the main pole assembly into the base. Secure it according to the base's instructions.
4. **Prepare the Canopy:** Carefully unwrap the umbrella canopy. Identify the four umbilical connecting rods. Unscrew the small screws on these rods.
5. **Insert Connecting Rods:** Insert the four connecting rods into the designated slots on the umbrella canopy,

ensuring correct orientation. Screw them in securely. Close the zippers on the canopy fabric around the rods.

6. **Attach Umbrella to Pole:** With assistance, carefully lift the folded umbrella canopy and attach it to the upper section of the main pole. Secure it using the two small screws provided to fix the umbrella in place.

OPERATING INSTRUCTIONS

Opening and Closing the Umbrella:

1. **To Open:** Release any securing straps. Use the crank handle located on the main pole to smoothly extend the canopy until it is fully open.
2. **To Close:** Rotate the crank handle in the opposite direction to retract the canopy. Once fully closed, secure the canopy with the attached strap to prevent it from unfurling in windy conditions.

Adjusting the Umbrella:

- **360° Rotation:** To rotate the umbrella, step on the foot pedal located at the base of the main pole. While holding the pedal down, gently rotate the umbrella to your desired position. Release the pedal to lock it in place.
- **Tilt Adjustment:** The umbrella features a 4-position tilt system. Locate the tilt handle on the main pole. Press the release button or lever and adjust the canopy to the desired tilt angle. Release to lock.

Foot Pedal Design

Allows 360 degree horizontal rotation for maximum coverage from the sun at any time.

MAINTENANCE

- **Cleaning the Canopy:** Clean the canopy with a damp cloth and mild soap. Avoid harsh chemicals that may damage the fabric or coating.
- **Drying Before Storage:** Ensure the canopy is completely dry before folding and storing to prevent mold and mildew growth.
- **Wind Conditions:** Always close the canopy in windy conditions to prevent damage to the umbrella and potential injury.
- **Seasonal Storage:** For prolonged periods of non-use or during severe weather, it is recommended to store the umbrella in a protected area or use a weather-resistant cover.

TROUBLESHOOTING

Umbrella does not open or close smoothly:

Check for any obstructions in the canopy or arm mechanisms. Ensure the crank handle is properly engaged and not stripped. Lubricate moving parts if necessary with a silicone-based spray.

Umbrella is unstable:

Verify that the weighted base is adequately filled (sand or water) and that all screws securing the pole to the base are tightened. Ensure the base is placed on a flat, level surface.

Canopy fabric appears loose or damaged:

Inspect the ribs and connecting rods for any bends or breaks. Ensure the fabric is properly attached to all points on the frame. For significant damage, contact customer support.

SPECIFICATIONS

Feature	Detail
Brand	ABCCANOPY
Model Name	POLYEATER-Sq
Model Number	S 10FT 2Tiers Roma Sq Dark Gray3
Size	10x10ft-Square
Canopy Diameter	120 Inches
