- 1 x User Manual

Image: The ciciglow Vintage Corded Telephone base, its receiver, and the two telephone line cables (US and UK) included in the package, laid out for inspection.

3. INSTALLATION

Follow these steps to properly install your ciciglow Vintage Corded Telephone:

1. **Connect the Receiver:** Connect the telephone receiver to the telephone base using the coiled receiver connection cable. Ensure one end is inserted into the receiver and the other end into the socket marked for the receiver on the base.

2. **Connect the Telephone Line:** Connect the telephone power supply (line cable) to the socket marked with "TE cable" on the base. The other end of this cable plugs into your wall telephone jack. The product includes both US and UK telephone line cables for compatibility.

3. **Verify Connection:** After plugging the telephone into the wall socket, lift the handset and listen for a dial tone for a few seconds. If a dial tone is heard, the telephone is correctly connected and ready for use.

• Installation

1)Please note that Telephone receivers should be connected using a crimped cable with one end inserted into the receiver and the other end inserted into the base. Use the cable with the socket marked with the receiver.

2) Connect the telephone power supply (cable) to the socket marked with TE cable on the base and the plug. The other end goes into your phone supply.

3)After you plug the phone into the socket, check for proper connection by listening to the dial toneS for a few seconds through the handset of your mobile phone.When the dial tones is heard, the telephone can be used.

5. MAINTENANCE

Proper care will ensure the longevity of your telephone:

- **Cleaning:** Disconnect the telephone from its wall jack before cleaning. Clean the surface with a damp cloth. Do not use liquid cleaners or immerse the telephone in water.
- **Temperature:** Avoid exposing the telephone to extreme temperatures.
- **Water Resistance:** This product is not waterproof. Do not allow it to get wet or immerse it in water.

6. TROUBLESHOOTING

If you encounter issues with your telephone, refer to the following common problems and solutions:

Problem	Possible Cause	Solution

Problem	Possible Cause	Solution
No dial tone or unable to make calls.	- Telephone line cable not properly connected. - Receiver connection cable loose. - Issue with the telephone service line.	- Ensure both ends of the telephone line cable are securely plugged into the telephone base and the wall jack. - Check that the receiver connection cable is firmly inserted into both the receiver and the base. - Test with another phone if available, or contact your telephone service provider.
Rings but cannot answer/talk.	- Receiver connection cable issue. - Internal fault.	- Verify the receiver connection cable is correctly and firmly attached. - If the problem persists after checking connections, the unit may have an internal fault.
Poor call quality or static.	- Loose cable connections. - Interference.	- Ensure all cables are securely connected. - Move the telephone away from other electronic devices that might cause interference.
