Atticus 10561

Atticus Empero Nutsedge Killer User Manual

Model: 10561 | Brand: Atticus

PRODUCT OVERVIEW

Atticus Empero Nutsedge Killer is a highly effective turf herbicide containing 75% halosulfuron-methyl, designed to control tough nutsedge in established lawns, ornamental turfgrass, and landscape areas. It works by traveling down to the root system tubers for complete weed kill. Gentle on most warm- or cool-season turf, it's easy to measure and mix, and is rainproof after 4 hours. People and pets can re-enter treated areas once dry.

Key Features:

- **Trusted Performer:** Empero contains 75% halosulfuron-methyl, the active ingredient trusted for control of tough nutsedge.
- **Total Nutsedge Takedown:** Empero travels down to the root system tubers for complete top-to-bottom weed kill.
- **Use on Nearly Any Lawn:** Empero is gentle to most any established warm- or cool-season turf – including bluegrass, fescue, Bermudagrass, zoysia, and more – allowing for confident application.
- **Simple Measure and Mix:** Add 1 level scoop Empero and 2 teaspoons surfactant (Not Included) per gallon of water. Empero's rapid dissolving granules ensure thorough mixing.
- **Enjoy Your Outdoor Space – Quickly:** Pets and people are clear to re-enter the treated area once the spray solution has dried.
- **Ready for Unpredictable Weather:** Empero sets quickly and is ready for rain after 4 hours, preventing wash away from sudden showers.

SAFETY INFORMATION

Keep people and pets out of the treated area until the spray solution has dried. Do not apply if rain is expected within 4 hours. Always read and follow label instructions.

PREPARATION & MIXING

Empero Nutsedge Killer comes in rapid-dissolving granules for easy preparation.

1. Add 1 level scoop of Empero Nutsedge Killer and 2 teaspoons of surfactant (not included) per gallon of water.
2. Mix thoroughly until granules are fully dissolved.

SIMPLE MEASURE, SIMPLE MIX

- ✓ MEASURING SCOOP INCLUDED
- ✓ RAPID-DISSOLVE GRANULES

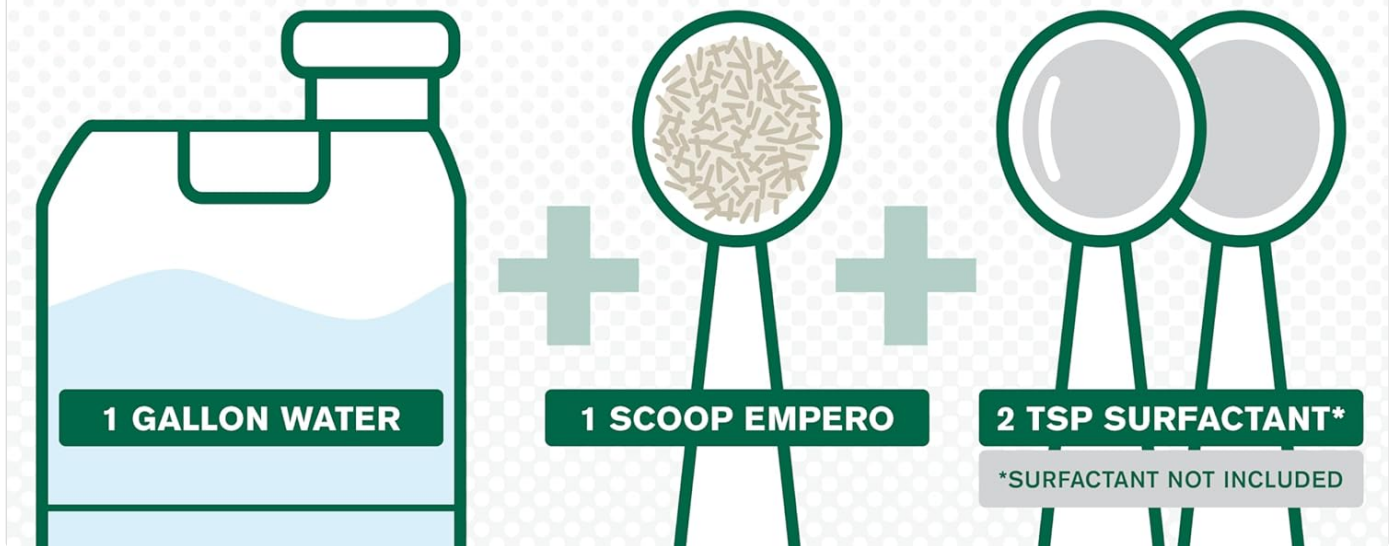

Figure 1: Simple Measure, Simple Mix. This graphic shows the components needed for mixing: 1 gallon water, 1 scoop of Empero granules, and 2 teaspoons of surfactant.

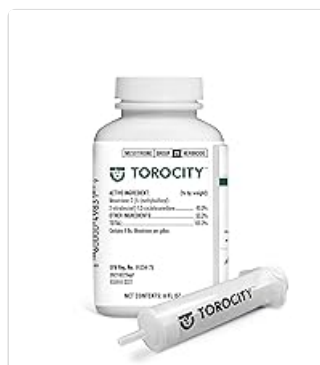

Figure 2: Mixing Instructions. This image visually represents the mixing ratio: 1 scoop Empero + 1 gallon water + 2 tsp surfactant. Each gallon treats 1,000 sq ft.

APPLICATION INSTRUCTIONS

Apply the mixed solution to areas affected by nutsedge. Ensure thorough coverage of the weed foliage.

- Apply to established warm- or cool-season turf, including bluegrass, fescue, Bermudagrass, and zoysia.
- Ensure the entire leaf surface of the target weed is wet with the spray solution.
- Avoid double spraying areas to prevent thinning of grass. Using a blue dye (not included) can help track sprayed areas.

Figure 3: Targeting Nutsedge. This image shows nutsedge plants within a lawn, highlighting the specific weeds to target for application.

Figure 4: Wet Entire Leaf Surface. This illustration emphasizes the importance of thoroughly wetting the leaves of the nutsedge for effective treatment.

POST-APPLICATION CARE

After application, allow the spray solution to dry completely before re-entry.

- Pets and people can re-enter the treated area once the spray solution has dried.
- The product is rainproof after 4 hours, meaning it will remain effective even if rain occurs after this period.
- Avoid watering or cutting the lawn for 2-3 days after application for optimal results.

GET BACK TO BACKYARD FUN, FAST

PEOPLE AND PETS
MAY ENJOY THE
TREATED AREA
ONCE SPRAY
HAS DRIED

Atticus

Figure 5: Get Back to Backyard Fun, Fast. This image depicts a dog and child on a lawn, illustrating that people and pets can safely return to the treated area once the spray has dried.

TROUBLESHOOTING

If nutsedge persists after initial application, consider the following:

- Ensure proper mixing ratios were followed, including the use of a surfactant.
- Verify that the entire leaf surface of the nutsedge was thoroughly wetted during application.
- Check weather conditions; avoid application if rain is expected within 4 hours of treatment.
- For very dense or stubborn nutsedge, a second application may be necessary after a suitable interval as per label instructions.

SPECIFICATIONS

Attribute	Detail
Brand	Atticus
Model Number	10561
Item Weight	1.33 Ounces
Item Form	Granule
Active Ingredients	Halosulfuron-methyl (75%)
Coverage	5000 square feet
UPC	850037486038
Package Dimensions	5.2 x 2.83 x 2.13 inches
Country of Origin	USA
