2. SETUP AND INSTALLATION

2.1 Unpacking

Carefully remove all packaging materials, including tape and temporary labels. Ensure no packing materials are left inside the refrigerator compartments.

2.2 Placement

Place the refrigerator on a level, stable surface away from direct sunlight and heat sources. Allow adequate clearance around the unit for proper ventilation. Refer to the dimensions below for planning your space.

2.3 Electrical Connection

Connect the refrigerator to a grounded electrical outlet. Do not use extension cords or adapters. Allow the refrigerator to stand upright for at least 4 hours before plugging it in to allow refrigerants to settle.

3. OPERATING YOUR REFRIGERATOR

3.1 Temperature Control

Your refrigerator features a MultiFlow Air System and ClimateKeeper Technology to maintain optimal temperatures. Use the internal control panel to adjust the temperature settings for both the fresh food and freezer compartments. The recommended fresh food temperature is 3°C (38°F) and freezer temperature is -18°C (0°F).

3.3 Water and Ice Dispenser

If your model is equipped with a water and ice dispenser, ensure the water supply line is connected and the water filter is properly installed. Refer to the installation guide for detailed instructions on connecting the water line.

3.4 Special Modes

- **TurboCool:** Quickly chills the fresh food compartment.
- **Sabbat Mode:** Disables certain functions like interior lights and alarms for religious observances.

4. MAINTENANCE AND CARE

4.1 Cleaning

Regular cleaning helps maintain the efficiency and appearance of your refrigerator. Unplug the appliance before cleaning.

- **Interior:** Use a mild soap and water solution. Rinse and dry thoroughly. Remove shelves and drawers for easier cleaning.
- **Exterior:** Wipe stainless steel surfaces with a soft cloth and a stainless steel cleaner. Avoid abrasive cleaners.
- **Condenser Coils:** Periodically clean the condenser coils located at the back or bottom of the refrigerator to ensure efficient operation.

4.2 Water Filter Replacement

If your model has a water filter, it should be replaced approximately every six months or when the filter indicator light illuminates. Refer to your specific model's instructions for filter location and replacement procedure.

4.3 Door Alarm

The door alarm will sound if a door is left open for an extended period, helping to conserve energy and maintain food freshness.

5. TROUBLESHOOTING

Before calling for service, please refer to the following common issues and their solutions:

Problem	Possible Cause	Solution
Refrigerator not cooling	Power supply issue; temperature settings incorrect; condenser coils dirty.	Check power connection; adjust temperature settings; clean condenser coils.
Unusual noises	Refrigerator not level; items vibrating inside; normal operating sounds.	Level the refrigerator; rearrange items; consult manual for normal sounds.
Water dispenser not working	Water supply turned off; water filter clogged; dispenser locked.	Check water supply valve; replace water filter; unlock dispenser.

If the problem persists after attempting these solutions, please contact customer service.
