SAFETY INFORMATION

Please observe the following safety guidelines during assembly and use:

- Always ensure all parts are present before beginning assembly.
- Do not overtighten screws, as this may damage the material.
- For wall-mounted items, ensure the mounting hardware is appropriate for your wall type and that the cabinet is securely fastened to wall studs or using suitable anchors.
- Keep small parts away from children during assembly to prevent choking hazards.
- Do not exceed the maximum weight capacity for shelves.

OPERATING INSTRUCTIONS

Adjustable Shelf

The enclosed storage area features an adjustable shelf. To adjust its height, remove the shelf and reposition the shelf pins into the desired pre-drilled holes on the cabinet sides. Ensure the shelf is level and securely seated on all four pins before placing items on it.

Door Adjustment

The cabinet doors can be adjusted to ensure proper alignment and spacing. Refer to the troubleshooting section and accompanying videos for detailed guidance on adjusting door gaps and alignment.

MAINTENANCE

To maintain the appearance and longevity of your UTEX Bathroom Wall Cabinet, simply wipe it with a damp cloth. Avoid using harsh chemicals or abrasive cleaners, as these may damage the finish.

TROUBLESHOOTING

If you encounter issues with door alignment, the following adjustments can be made:

Issue 1: Gaps between cabinet doors or sides are too large, or doors overlap.

You can adjust the gap by turning the center screw on the hinge. Turning this screw will fine-tune the door spacing, allowing you to achieve an even gap between the doors and the cabinet sides.

Issue 2: Cabinet doors are sticking out or sinking into the cabinet.

To correct this, turn the innermost screw on the hinge. This adjustment moves the hinge forward or backward, which will help align the door flush with the cabinet frame.
