MAINTENANCE

To ensure your Sywhitta Utility Cart remains in excellent condition and provides long-lasting service, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the cart with a dry cloth to remove dust and light debris. For more stubborn marks, a damp cloth with mild soap can be used, followed by drying thoroughly. Avoid using abrasive cleaners or harsh solvents, as these may damage the plastic material.
- **Weight Capacity:** Always adhere to the maximum recommended load of 66 pounds (30 kg). Overloading can cause the shelves to bow or the cart to become unstable.
- **Wheel Care:** Periodically check the wheels for any accumulated hair or debris that might hinder smooth rotation. Clean as necessary.
- **Storage:** When not in use, store the cart in a dry environment to prevent any potential material degradation over time.

TROUBLESHOOTING

If you encounter any issues with your Sywhitta Utility Cart, please refer to the following common problems and solutions:

Cart Feels Flimsy or Unstable:

- **Check Assembly:** Ensure all pipes and shelves are fully inserted and securely connected. Sometimes, a loose connection can cause instability. Refer to the assembly instructions.
- **Weight Distribution:** Verify that the weight is evenly distributed across the shelves. Uneven loading can affect stability.
- **Overloading:** Confirm that the total weight on the cart does not exceed the maximum recommended load of 66 pounds (30 kg).

Wheels Not Rolling Smoothly or Locking:

- **Clear Obstructions:** Check the wheels for any hair, dust, or debris that may be caught in the casters. Clean them thoroughly.
- **Locking Mechanism:** Ensure the locking mechanism is fully disengaged for rolling and fully engaged for locking.

Missing or Damaged Parts:

- If you find any parts missing or damaged upon unboxing, please contact our customer service team immediately for assistance.

If these troubleshooting steps do not resolve your issue, please contact our customer service team for further assistance.
