SETUP

Your mDesign Stackable Storage Containers Box arrives fully assembled and ready for immediate use. No tools or complex assembly steps are required.

Placement

- Place the unit on a flat, stable surface such as a kitchen counter, pantry shelf, inside a cabinet, or on a desk.
- Ensure adequate clearance for the drawers to pull out completely.

Stacking Multiple Units

For enhanced storage capacity, multiple mDesign Stackable Storage Containers Boxes can be securely stacked on top of each other. The design features integrated feet and recessed tops for stable stacking.

OPERATING

The storage box features two smooth-gliding pull-out drawers for easy access to your stored items.

Using the Drawers

- Gently pull the integrated handle on the front of each drawer to open.
- Push the drawer back in until it is fully closed to secure its contents.

Storage Applications

The clear design allows for quick identification of contents, making it suitable for a wide range of items:

- **Kitchen & Pantry:** Store spices, tea bags, snack packets, baking supplies, or small utensils.
- **Bathroom:** Organize cosmetics, toiletries, cotton balls, or small towels.
- **Office:** Keep pens, paper clips, sticky notes, or small office supplies tidy.
- **Craft Room:** Sort beads, threads, buttons, or other crafting essentials.

MAINTENANCE

To ensure the longevity and appearance of your storage containers, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the containers with a soft cloth and mild soap and water. Avoid abrasive cleaners or harsh chemicals, as these can scratch or damage the plastic.
- **Drying:** Dry thoroughly with a soft, clean cloth to prevent water spots.
- **Avoid Extreme Temperatures:** Do not expose the containers to extreme heat or cold, as this may cause warping or cracking.

TROUBLESHOOTING

If you encounter any issues with your storage containers, please refer to the following common solutions:

Problem	Possible Cause	Solution
Drawers are difficult to open or close.	Debris in the drawer tracks, or uneven weight distribution.	Remove drawers and inspect tracks for any obstructions. Clean with a damp cloth. Redistribute contents evenly within the drawer.
Stacked units feel unstable.	Units not properly aligned, or placed on an uneven surface.	Ensure each unit is perfectly aligned with the one below it. Place the entire stack on a completely flat and stable surface. Avoid stacking too high with heavy items.
