NEWSKILL GUNGNYR Pro Ivory (NS-KB-GUNGNYR-GAT-RED-IV)

Newskill Gungnyr Pro Ivory Opto-Mechanical Gaming Keyboard User Manual

Model: GUNGNYR Pro Ivory (NS-KB-GUNGNYR-GAT-RED-IV)

INTRODUCTION

This manual provides detailed instructions for the setup, operation, customization, and maintenance of your Newskill Gungnyr Pro Ivory Opto-Mechanical Gaming Keyboard. Please read this manual thoroughly to ensure optimal performance and longevity of your device.

PRODUCT OVERVIEW

The Newskill Gungnyr Pro Ivory is a full-layout opto-mechanical gaming keyboard designed for high-speed and reduced response times. It features a durable aluminum body, customizable RGB lighting, and hot-swappable Gateron Red switches. The included magnetic wrist rest enhances comfort during extended use.

Image: Newskill Gungnyr Pro Ivory keyboard showing its dimensions (43.8 cm length, 12.9 cm width, 4.2 cm height) and weight (900g for keyboard, 290g for wrist rest). It also highlights compatibility with Windows, Android, Mac, and Linux operating systems, and a 1.8m cable length.

Key Features:

- **Opto-Mechanical Switches:** Combines the best of mechanical and optical switches for extreme speed and reduced response time via laser activation.
- **Full Layout:** Includes a numeric keypad for complete functionality.
- **Anti-Ghosting Technology:** Ensures every key press is registered, even during simultaneous inputs.
- **Programmable Macro Keys:** Record and assign complex commands for quick execution.
- **Customizable RGB Lighting:** Per-key RGB backlighting with 6 pre-configured modes and software customization for the keyboard, its surround, and the wrist rest.
- **Magnetic Wrist Rest:** Provides comfort and proper wrist posture, featuring its own customizable RGB lighting.
- **Hot-Swappable Gateron Red Switches:** Linear and silent switches with over 100 million keystroke durability, easily interchangeable with other Gateron switches.

- **Durable Construction:** Aluminum body with matte, non-slip, robust, and textured keycaps.

MAGNETIC WRIST REST
COMFORT AND FIRMNESS FOR GOOD POSTURE

**AVERAGE LIFE OF GATERON SWITCHES:
100 MILLION PRESSES**

SETUP

1. **Unpacking:** Carefully remove the keyboard and its accessories from the packaging. Ensure all components, including the keyboard, wrist rest, and USB cable, are present.
2. **Connecting the Keyboard:** Connect the integrated USB cable from the keyboard to an available USB port on your computer or compatible device. The keyboard is plug-and-play and should be recognized automatically by most operating systems (Windows, macOS, Android, Linux).
3. **Attaching the Wrist Rest:** Align the magnetic wrist rest with the front edge of the keyboard. The magnets will secure it in place, providing ergonomic support.

OPERATING INSTRUCTIONS

Basic Key Functions:

The Gungnyr Pro Ivory features a standard full-layout keyboard. All keys function as labeled. For specific operating system functions, refer to your OS documentation.

RGB Lighting Control:

The keyboard offers extensive RGB lighting customization. You can switch between 6 pre-configured lighting modes directly from the keyboard. For advanced customization, including per-key lighting and effects for the keyboard's surround and wrist rest, use the dedicated Newskill software.

Macro Programming:

The Gungnyr Pro Ivory allows for quick and easy macro recording. Refer to the Newskill software for detailed instructions on how to create, assign, and manage your macros. This feature is designed to activate functions and key shortcuts with a single press.

Media Keys:

Dedicated media keys or function key combinations allow for easy control of audio playback (pause, play, skip tracks) and volume without interrupting your workflow or game.

CUSTOMIZATION

Software Customization:

Download the official Newskill software from the manufacturer's website to unlock the full potential of your Gungnyr Pro Ivory keyboard. The software allows for:

- Advanced RGB lighting effects and color customization.
- Creation and assignment of complex macros.
- Key remapping.
- Profile management for different applications or games.

Hot-Swappable Switches:

The Gungnyr Pro Ivory features hot-swappable Gateron Red switches, allowing you to change them without soldering. This enables you to customize the feel and sound of your keyboard to match your preferences. Compatible with other Gateron switch types.

MAINTENANCE

Cleaning:

- Disconnect the keyboard from your computer before cleaning.
- Use a soft, dry cloth to wipe down the keycaps and keyboard body.
- For deeper cleaning, use a can of compressed air to remove dust and debris from between the keys.
- Avoid using harsh chemicals or abrasive materials, as these can damage the keyboard's finish.

Switch Replacement:

To replace a switch, gently pull the keycap off using a keycap puller. Then, use a switch puller to carefully remove the switch from the keyboard. Insert the new switch, ensuring the pins align correctly, and press firmly until it clicks into place. Reattach the keycap.

TROUBLESHOOTING

| Problem | Possible Solution |
|---------|-------------------|
|---------|-------------------|

| Problem | Possible Solution |
|---------------------------------------|---|
| Keyboard not responding | <p>Ensure the USB cable is securely connected to both the keyboard and the computer.</p> <p>Try connecting the keyboard to a different USB port.</p> <p>Restart your computer.</p> <p>Test the keyboard on another computer to rule out system-specific issues.</p> |
| RGB lighting not working or incorrect | <p>Check the keyboard's built-in lighting controls (refer to software manual for key combinations).</p> <p>Ensure the Newskill software is installed and up-to-date.</p> <p>Verify lighting settings within the software.</p> |
| Macro keys not functioning | <p>Ensure the macros are correctly programmed and assigned using the Newskill software.</p> <p>Check if the correct profile is active.</p> |
| A specific key is not registering | <p>Remove the keycap and inspect the switch for any visible damage or debris.</p> <p>If the switch is hot-swappable, try replacing it with a known working switch.</p> <p>Clean the area around the switch.</p> |
