

Cornat TEC365071

Cornat Toilet Seat Replacement Kit Instruction Manual

Models: Tarox, Tarox Plus, Roda, Dolo, Calisto | Model Number: TEC365071

PRODUCT OVERVIEW

This Cornat replacement kit provides essential buffers for maintaining the stability and integrity of your toilet seat. Designed for specific Cornat toilet seat models, these plastic buffers ensure proper seating and prevent direct contact between the toilet seat and the ceramic bowl, reducing wear and noise.

The kit includes 4 seat buffers and 2 lid buffers, made from durable white plastic.

Compatibility: This kit is compatible with Cornat toilet seat models Tarox, Tarox Plus, Roda, Dolo, and Calisto.

SETUP AND INSTALLATION

Follow these steps to replace the buffers on your Cornat toilet seat:

- 1. Prepare the Toilet Seat:** Carefully remove the toilet seat from the toilet bowl if necessary for easier access. Place it on a clean, flat surface.
- 2. Remove Old Buffers:** Locate the existing buffers on the underside of the toilet seat and lid. Gently pry them out. Some may be pressed in, while others might be glued. Clean any residue from the buffer holes.
- 3. Identify New Buffers:** The kit contains two types of buffers: four for the seat and two for the lid. The seat buffers are typically larger and designed to support the seat's weight on the ceramic bowl. The lid buffers are usually smaller and support the lid when closed on the seat.
- 4. Install Seat Buffers:** Insert the four seat buffers into the designated holes on the underside of the toilet seat. Apply firm, even pressure until they are securely seated.
- 5. Install Lid Buffers:** Insert the two lid buffers into the designated holes on the underside of the toilet seat lid. Ensure they are also securely seated.
- 6. Verify Installation:** Once all buffers are installed, place the toilet seat back on the toilet bowl (if removed). Gently close the seat and lid to ensure they rest evenly and stably on the buffers.

Image: The Cornat Toilet Seat Replacement Kit, including four seat buffers and two lid buffers. These components are designed to provide stable support for your toilet seat and lid.

OPERATION

The buffers function passively by providing a cushioned contact point between the toilet seat/lid and the ceramic bowl. They absorb impact, prevent scratching, and ensure the seat remains stable during use. No active operation is required after installation.

MAINTENANCE

- **Cleaning:** Clean the buffers regularly with mild soap and water. Avoid abrasive cleaners or harsh chemicals, as these can damage the plastic material.
- **Inspection:** Periodically inspect the buffers for signs of wear, cracking, or flattening. Worn buffers can lead to an unstable toilet seat or damage to the ceramic.
- **Replacement:** If buffers show significant wear or damage, replace them promptly to maintain optimal performance and prevent potential issues.

TROUBLESHOOTING

Issue: Toilet seat feels unstable or wobbly.

Solution: Check if all buffers are securely in place. Ensure they are not worn or damaged. Verify that the correct type of buffers (seat vs. lid) is installed in the appropriate locations. If buffers are worn, replace them.

Issue: Buffers fall out of their holes.

Solution: Ensure the buffers are fully inserted and seated firmly. If the holes are too loose due to wear, or if the buffers are not the correct size for your specific toilet seat model, they may not hold. Confirm compatibility with your Cornat toilet seat model.

Issue: Seat or lid does not close evenly.

Solution: Inspect all buffers to ensure they are uniformly installed and not damaged. Uneven wear or improper installation can cause an uneven closure. Also, check the toilet seat hinges for proper alignment.

SPECIFICATIONS

Brand	Cornat
Model Number	TEC365071
Compatible Models	Tarox, Tarox Plus, Roda, Dolo, Calisto
Material	Plastic
Color	White
Components Included	4 Seat Buffers, 2 Lid Buffers
Product Dimensions (L x W x H)	13 x 8 x 2 cm (packaging dimensions)
Weight	20 grams
