Setup

Battery Installation

1. Locate the battery compartment on the back of the remote control.
2. Slide the battery cover downwards or in the direction indicated by an arrow to open it.
3. Insert two (2) AAA batteries, ensuring the positive (+) and negative (-) terminals align correctly with the markings inside the compartment.
4. Replace the battery cover by sliding it back into position until it clicks securely.

No programming or code entry is required. The remote is ready for use immediately after battery installation.

Maintenance

Cleaning

To clean the remote control, use a soft, dry cloth. For stubborn dirt, lightly dampen the cloth with water or a mild, non-abrasive cleaner. Avoid using harsh chemicals or abrasive materials, as these can damage the remote's surface or internal components.

Battery Care

- Replace batteries when the remote's response becomes sluggish or stops working.
- Always replace both batteries at the same time with new ones of the same type (AAA).
- If the remote will not be used for an extended period, remove the batteries to prevent leakage and potential damage.

Troubleshooting

- **Remote not responding:**
  - Check if the batteries are inserted correctly with the correct polarity.
  - Replace old batteries with new ones.
  - Ensure there is a clear line of sight between the remote control and the device's infrared receiver. Obstructions can block the signal.
  - Confirm the remote is pointed directly at the device.
- **Specific buttons not working:**
  - Ensure you are pressing the correct button for the desired function.
  - If the remote has mode buttons (e.g., TV, DVD), ensure the correct mode is selected for the device you are trying to control.
