SETUP AND INSTALLATION

The portable air conditioner is designed for easy setup. It includes a window kit for exhaust ventilation and features built-in handles and 360° casters for convenient movement and positioning.

Window Kit Installation

1. Attach the exhaust hose to the unit and the window exhaust adapter.
2. Adjust the window slider kit to fit your window opening.
3. Secure the window exhaust adapter into the window slider kit.
4. Ensure all connections are tight to prevent air leakage.

The power cord length is 6 feet, providing flexibility for placement near an electrical outlet.

OPERATING INSTRUCTIONS

Your portable air conditioner offers multiple modes and control options for optimal comfort.

Control Panel and Remote Controls

- **Power Button:** Turns the unit on or off.
- **Mode Button:** Cycles through Air Conditioning, Dehumidifier, and Fan modes.
- **Temperature Adjustment:** Use the up/down arrows to set the desired temperature (68°F to 80°F).
- **Fan Speed:** Select from 3 fan speeds (Low, Medium, High) in any mode.
- **Timer:** Set the unit to turn on or off automatically within a 24-hour period.

Wi-Fi Connectivity (JHS App)

The unit can be controlled remotely using the JHS app on your smartphone. Follow the app's instructions to connect your device to the air conditioner's Wi-Fi network. This allows you to adjust temperature, change modes, and set the timer from anywhere.

MAINTENANCE

Regular maintenance ensures optimal performance and longevity of your unit.

Filter Cleaning

The unit is equipped with a removable washable pre-filter. It is recommended to clean the filter regularly (e.g., every two weeks, depending on usage) to maintain air quality and cooling efficiency.

1. Turn off and unplug the unit before cleaning.
2. Locate and remove the washable filter.
3. Rinse the filter under running water to remove dust and debris.
4. Allow the filter to air dry completely before reinserting it into the unit.

TROUBLESHOOTING

If you encounter issues with your portable air conditioner, refer to the following common solutions:

- **Unit does not turn on:** Ensure the power cord is securely plugged into a working outlet. Check if the circuit breaker has tripped.
- **Unit is not cooling:** Verify that the desired temperature is set lower than the room temperature. Check if the exhaust hose is properly installed and not blocked. Clean the air filter if it is dirty. Ensure windows and doors are closed.
- **Water leakage:** Check the drainage plug and ensure it is properly sealed. If the unit has a continuous drain option, ensure the hose is correctly connected and not kinked.
- **Excessive noise:** Ensure the unit is placed on a flat, stable surface. Check for any obstructions in the fan or exhaust areas.
- **Wi-Fi connectivity issues:** Ensure your router is working and the unit is within range. Follow the JHS app's pairing instructions carefully.

For persistent issues, contact customer support.
