2. Safety Information

- **Guardrails:** The top bunk is equipped with full-length safety guardrails to ensure user safety during sleep. Ensure all guardrails are securely attached before use.
- **Ladder:** A sturdy 5-step inclined ladder provides easy access to the top bunk. Always use the ladder for entry and exit.
- **Weight Capacity:** The bed has a maximum weight capacity of 250 LBS. Do not exceed this limit.
- **Mattress Thickness:** The recommended mattress thickness is 6 inches. Using a thicker mattress may reduce the effective height of the guardrails.

3.3. Visual Assembly Steps (3D Renders)

These 3D renders provide a visual sequence of the assembly process. Please match the numbered parts to your product's components. Note that these renders depict a metal frame bed with stairs, which differs from your wooden Bellemave loft bed with an inclined ladder. Use these as a general guide for component placement and connection types.

1. **Step 1: Assemble the Bed Base Frame**

Connect the main horizontal and vertical frame pieces to form the initial bed base structure.

2. **Step 2: Attach Side Rails**

Secure the side rails to the assembled bed base, ensuring proper alignment.

3. **Step 3: Install Bed Slats**

Place and secure the bed slats across the frame to support the mattress.

4. **Step 4: Attach Ladder/Stair Structure**

Connect the ladder or stair unit to the main bed frame. (Note: Your Bellemave model features an inclined ladder, not stairs as shown in this generic render).

5. **Step 5: Install Desk and Shelves**

Assemble and attach the integrated desk and shelving units beneath the loft bed.

6. **Step 6: Final Tightening and Inspection**

Once all components are in place, carefully tighten all screws. Inspect the entire structure for stability and ensure all safety features are correctly installed.
