4. SETUP AND INITIAL USE

Your VELECO ZT16 mobility scooter comes fully assembled and ready for use. Follow these steps for initial setup:

1. **Unpacking:** Carefully remove the scooter from its packaging. Ensure all packing materials are removed.
2. **Initial Charge:** Before the first ride, fully charge the battery. Locate the charging socket (refer to the product overview diagram) and connect the provided charger. The charging indicator on the charger will show the charging status. A full charge typically takes several hours.
3. **Pre-Ride Check:** Before each use, perform a quick check:
 - Ensure tires are properly inflated.

- Check that brakes are functioning correctly.
- Verify that the lights are working.
- Confirm the battery level is sufficient for your planned journey.

4. **Seat Adjustment:** Adjust the seat height and backrest for a comfortable and secure riding position.

5. OPERATING INSTRUCTIONS

Operating your VELECO ZT16 is straightforward. Follow these guidelines for a smooth ride:

5.1. Starting the Scooter

- Insert the key into the ignition and turn it to the 'ON' position.
- The display panel will illuminate, showing the battery level and current speed mode.

5.2. Speed Control

- The scooter features two speed modes. Use the speed selector switch on the handlebar to toggle between modes (e.g., 'L' for Low, 'H' for High).
- Gently twist the throttle grip to accelerate. Release the throttle to slow down.

5.3. Reverse Gear

- To engage reverse, locate the reverse switch on the handlebar. Activate it to shift into reverse mode.
- Twist the throttle gently to move backward. Be cautious and check your surroundings when reversing.

5.4. Braking

- The scooter is equipped with front and rear brakes (drum brakes).
- To brake, gently squeeze the brake levers on the handlebar. Apply both brakes simultaneously for optimal stopping power and stability.
- For emergency stops, apply firm pressure to both brake levers.

6. SAFETY GUIDELINES

Your safety is paramount. Always adhere to these safety guidelines:

- Always wear appropriate safety gear, including a helmet, when operating the scooter.
- Do not exceed the maximum weight capacity of the scooter.
- Operate the scooter only on suitable surfaces. Avoid steep inclines, uneven terrain, or slippery conditions.
- Maintain a safe distance from other vehicles and pedestrians.
- Be aware of your surroundings and potential hazards.
- Do not operate the scooter under the influence of alcohol or drugs.
- Ensure all lights and reflectors are clean and functional, especially when riding in low light conditions.
- Always turn off the scooter and remove the key when not in use to prevent accidental activation.

7. MAINTENANCE

Regular maintenance will ensure the longevity and optimal performance of your VELECO ZT16 scooter.

- **Battery Care:**
 - Charge the battery regularly, even if the scooter is not used frequently.
 - Avoid completely draining the battery before recharging.
 - Store the scooter in a cool, dry place when not in use, and ensure the battery is charged.
- **Cleaning:** Clean the scooter regularly with a damp cloth. Avoid using high-pressure washers or harsh chemicals that could damage electrical components or paintwork.
- **Tire Pressure:** Check tire pressure periodically and inflate to the recommended levels (refer to tire sidewall or specifications section). Proper tire pressure ensures safety and extends tire life.
- **Brake Inspection:** Regularly inspect brake levers and cables for wear or damage. Ensure brakes respond promptly and effectively. If you notice any issues, have them serviced by a qualified technician.
- **General Inspection:** Periodically check all nuts, bolts, and fasteners to ensure they are tight. Inspect for any loose or damaged parts.

8. TROUBLESHOOTING
