## ULANZI ST-29

# ULANZI ST-29 Universal 2-in-1 Tablet and Smartphone Tripod Mount Instruction Manual

Brand: Ulanzi | Model: ST-29

## INTRODUCTION

Thank you for choosing the Ulanzi ST-29 Universal 2-in-1 Tablet and Smartphone Tripod Mount. This versatile adapter is designed to securely hold a wide range of mobile devices, from smartphones to tablets, allowing for stable mounting on tripods and other accessories. Its robust construction and thoughtful features make it an essential tool for content creators, photographers, and anyone seeking enhanced stability for their mobile devices.

## PRODUCT FEATURES

- Universal Compatibility:** Two-way adjustable design accommodates devices from 2.6 inches to 8.8 inches wide, suitable for most smartphones and tablets (e.g., iPhone, iPad Mini, iPad, iPad Air, iPad Pro, Surface Go). Note: Tablets are supported in landscape orientation only.
- Dual 1/4" Screw Holes:** Features 1/4-inch screw holes on both the back and bottom for flexible mounting on tripods, monopods, or other accessories. These can also be used to extend microphone or speaker stands.
- Cold Shoe Mount:** Integrated cold shoe on the top allows for easy attachment of LED video lights, microphones, monitors, or other photographic accessories, enhancing your setup for professional use.
- Compact and Lightweight:** Weighing only 0.14 lbs (64g), this adapter is highly portable while maintaining excellent load-bearing capacity for secure device holding.
- High Security & Protection:** Equipped with silicone non-slip pads and high-density sponge pads on the inside of the clip to protect your device from scratches and ensure a secure grip.

## SETUP INSTRUCTIONS

### 1. Attaching Your Device:

- Extend the spring-loaded clamp by gently pulling one side outwards.
- Carefully place your smartphone or tablet into the mount, ensuring it is centered and the silicone pads are in contact with your device's edges.
- Release the clamp to allow it to securely grip your device. For tablets, ensure landscape orientation.

### 2. Mounting on a Tripod:

- Locate the 1/4-inch screw holes on the back or bottom of the ST-29 mount.
- Align the desired screw hole with the 1/4-inch screw on your tripod or monopod.
- Rotate the mount clockwise onto the tripod screw until it is firmly secured. Do not overtighten.

### 3. Attaching Accessories (Cold Shoe):

- Slide your cold shoe compatible accessory (e.g., LED light, microphone) into the cold shoe mount located on the top of the ST-29.
- Tighten any locking mechanism on your accessory to secure it in place.

## Wide Stretch, also Clamps iPad

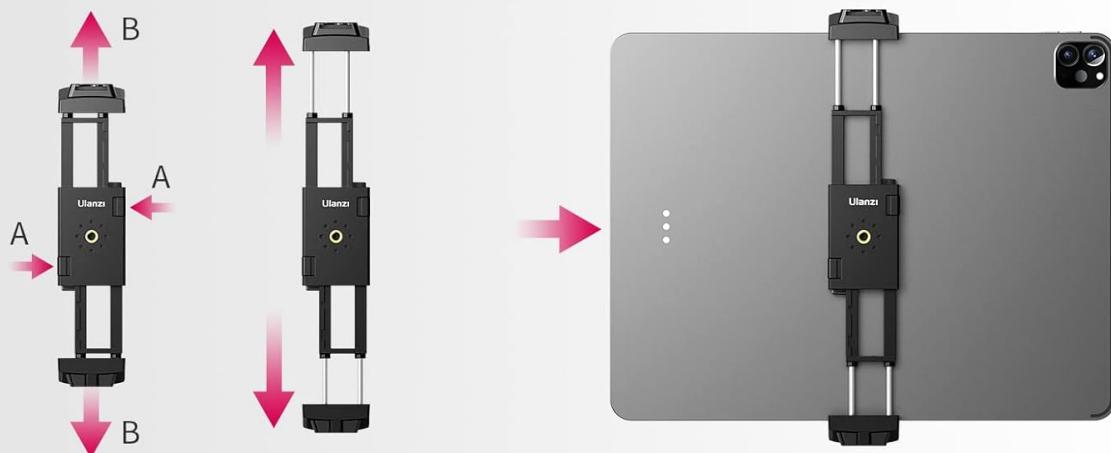

Both iPhone 13 mini and iPhone 13 Pro Max  
can be easily clamped

# Two Expansion Modes

Hidden expansion bracket, you can clip the tablet

*Image: Demonstrates the two expansion modes of the Ulanzi ST-29, illustrating how it can be adjusted to securely hold both smartphones and larger tablets.*

## OPERATING INSTRUCTIONS

- 1. Adjusting Device Orientation:** The mount allows for easy rotation when attached to a tripod head, enabling quick switching between horizontal (landscape) and vertical (portrait) orientations for your device. Ensure your tripod head supports this flexibility.
- 2. Using the 1/4" Screw Holes:** The multiple 1/4-inch screw holes provide flexibility for mounting the device in various positions on your tripod or rig. Experiment with different mounting points to achieve your desired angle and stability.
- 3. Accessory Integration:** Utilize the cold shoe mount for external microphones, LED lights, or other accessories to enhance your content creation. Ensure accessories are lightweight and properly secured to maintain balance.

## MAINTENANCE

- Keep the mount clean by wiping it with a soft, dry cloth.
- Avoid exposing the mount to extreme temperatures or harsh chemicals.
- Regularly check all screws and moving parts to ensure they are secure.
- Store the mount in its original packaging or a protective pouch when not in use to prevent damage.

## TROUBLESHOOTING

- **Device not holding securely:** Ensure the clamp is fully extended and properly gripping the device. Check that the device width is within the 2.6"-8.8" range. Verify that the silicone and sponge pads are intact.
- **Mount feels loose on tripod:** Ensure the 1/4-inch screw is tightened securely to the tripod head. If using an adapter, ensure the adapter itself is stable.
- **Accessories not fitting cold shoe:** Verify that your accessory is cold shoe compatible. Ensure it is slid in completely and any locking mechanism on the accessory is engaged.
