MSI AMZ-SIDSPLS-0001

MSI Argento Grigio Granite Vanity Sidesplash Installation and Care Guide

Model: AMZ-SIDSPLS-0001

1. Introduction

This instruction manual provides essential information for the proper installation, use, and maintenance of your MSI Argento Grigio Granite Vanity Sidesplash. Designed to complement your vanity top, this sidesplash helps protect adjacent walls from water damage, ensuring a clean and durable finish for your bathroom space. Please read these instructions carefully before proceeding with installation.

3. Setup and Installation

The MSI Argento Grigio Granite Sidesplash is designed for countertop installation. Ensure the vanity top is securely in place before installing the sidesplash.

Required Tools and Materials (Not Included):

- Construction adhesive or silicone sealant suitable for stone
- Caulking gun
- Measuring tape
- Level
- Clean cloths
- Rubbing alcohol (for cleaning surfaces)

Installation Steps:

1. **Prepare the Surface:** Ensure the side of the vanity top and the adjacent wall where the sidesplash will be placed are clean, dry, and free of dust, grease, or debris. Wipe surfaces with rubbing alcohol if necessary and allow to dry completely.
2. **Test Fit:** Carefully place the sidesplash against the vanity top and wall to confirm proper fit and alignment. Ensure it sits flush and level.
3. **Apply Adhesive:** Apply a continuous bead of construction adhesive or silicone sealant along the back edge of the sidesplash that will contact the wall, and along the bottom edge that will contact the vanity top. Do not apply excessive adhesive.
4. **Position the Sidesplash:** Carefully press the sidesplash into position, aligning it with the edge of the vanity top and the wall. Apply firm, even pressure along its length.
5. **Secure and Seal:** Hold the sidesplash in place until the adhesive begins to set. Wipe away any excess adhesive or sealant immediately with a clean, damp cloth. For a watertight seal, apply a thin bead of silicone sealant along the seam where the sidesplash meets the vanity top and the wall. Smooth the sealant for a clean finish.

6. **Cure Time:** Allow the adhesive and sealant to cure completely according to the manufacturer's instructions before exposing the area to water.

Image 3.1: Side view of the sidesplash, illustrating its profile and thickness.

4. Operating and Use

The MSI Argento Grigio Granite Sidesplash functions as a protective barrier, preventing water from splashing onto and damaging the adjacent wall. Once properly installed, no further "operation" is required. Its primary role is passive protection and aesthetic integration with your vanity setup.

5. Maintenance and Care

To maintain the appearance and durability of your granite sidesplash, follow these care instructions:

- **Regular Cleaning:** Wipe the sidesplash with a clean, damp cloth and mild soap as needed. Avoid abrasive cleaners, harsh chemicals, or acidic substances, as these can damage the granite's polished finish and sealant.
- **Drying:** After cleaning, dry the surface with a soft cloth to prevent water spots.
- **Sealing:** Although the sidesplash comes pre-sealed, natural stone may require periodic re-sealing to maintain its stain resistance. Consult a stone care professional or product manufacturer for recommendations on re-sealing frequency, typically every 6-12 months depending on use and product.
- **Avoid Impact:** While granite is durable, avoid dropping heavy objects on the sidesplash or subjecting it to sharp impacts, which could cause chipping or cracking.

Image 5.1: Angled view of the sidesplash, showing its polished surface and natural stone variations.

6. Troubleshooting

This section addresses common concerns related to the sidesplash.

Problem	Possible Cause	Solution
Sidesplash does not sit flush.	Uneven wall or vanity surface; improper adhesive application.	Ensure surfaces are level before installation. Apply adhesive evenly. If already installed, carefully remove and re-install, shimming if necessary.
Water leakage behind sidesplash.	Inadequate or damaged sealant.	Inspect the sealant along the seams. Remove old sealant and reapply a fresh bead of silicone sealant. Ensure proper curing time.
Stains on granite surface.	Acidic substances; lack of proper sealing; prolonged exposure to liquids.	Clean spills immediately. For stubborn stains, consult a professional stone cleaner. Consider re-sealing the granite.
Chipping or cracking.	Impact damage; improper handling.	Granite is a natural stone and can chip or crack under impact. For significant damage, professional repair or replacement may be necessary.

7. Specifications

- **Brand:** MSI
- **Model Number:** AMZ-SIDSPLS-0001
- **Material:** Granite
- **Color:** Sandy
- **Dimensions:** 21 inches (Length) x 0.75 inches (Thickness) x 4 inches (Height)
- **Item Weight:** Approximately 7.19 pounds
- **Finish Type:** Polished
- **Installation Type:** Countertop
- **Included Components:** Sidesplash
