8. TROUBLESHOOTING

Problem	Possible Cause	Solution
Dryer does not turn on.	No power supply.	Check if the power cord is securely plugged into a working outlet. Test the outlet with another appliance.
Reduced airflow or overheating.	Blocked air intake filter.	Unplug the dryer and clean the air intake filter as described in the Maintenance section.
Hair is still frizzy.	Incorrect heat/speed setting or technique.	Experiment with different heat and speed combinations. Ensure you are using the ionic technology effectively by directing airflow downwards. Finish with a cool shot to seal the cuticle.
