Comfee KWH-COMFEE'-CC01

COMFEE' Hood Filter Instruction Manual

Model: KWH-COMFEE'-CC01

PRODUCT OVERVIEW

This instruction manual provides essential information for the proper use and maintenance of your COMFEE' Hood Filter, model KWH-COMFEE'-CC01. This filter is designed to be compatible with COMFEE' hood models KWH-SLIF17SS-60 and KWH-SLIF17B-60.

The primary function of this filter is to assist in the elimination of odors and smoke generated during cooking, contributing to a cleaner kitchen environment.

SETUP AND INSTALLATION

The COMFEE' hood filter is designed for easy installation. Please follow these steps carefully:

1. **Safety First:** Before beginning installation, ensure your range hood is completely powered off and unplugged from the electrical outlet to prevent any electrical hazards.
2. **Locate Filter Compartment:** Identify the filter compartment on your COMFEE' range hood. This is typically located on the underside of the hood.
3. **Remove Old Filter (if applicable):** If replacing an existing filter, carefully unlatch or slide out the old filter. Dispose of the old filter responsibly.
4. **Insert New Filter:** Position the new COMFEE' KWH-COMFEE'-CC01 filter into the designated slot. Ensure it sits flush and securely within the compartment. The filter is made of cotton and is flexible, allowing for a snug fit.
5. **Secure Filter:** Latch or slide the filter into place until it is firmly secured and does not move freely.
6. **Restore Power:** Once the filter is securely installed, plug your range hood back into the electrical outlet and restore power.

OPERATING INSTRUCTIONS

The COMFEE' hood filter operates passively as part of your range hood's ventilation system. No specific user operation is required for the filter itself once installed.

- Ensure your range hood is turned on during cooking to maximize the filter's effectiveness in capturing odors and smoke.
- For optimal performance, use the appropriate fan speed setting on your range hood for the type of cooking being performed.

MAINTENANCE

Regular maintenance of your hood filter is crucial for maintaining effective air purification and extending the life of your range hood. This filter is made of cotton and is designed for replacement, not washing.

- **Replacement Frequency:** The frequency of filter replacement depends on your cooking habits. For average use, it is recommended to replace the filter every 3 to 6 months. For heavy cooking, more frequent replacement may be necessary.
- **Signs of a Clogged Filter:**
 - Reduced airflow from the hood.
 - Noticeable increase in cooking odors lingering in the kitchen.
 - Visible grease or dirt accumulation on the filter surface.
- **Disposal:** Dispose of used filters according to local waste disposal regulations.

TROUBLESHOOTING

If you experience issues related to your hood filter, consider the following common problems and solutions:

Problem	Possible Cause	Solution
Poor odor/smoke removal	Filter is saturated or clogged.	Replace the filter with a new COMFEE' KWH-COMFEE'-CC01 filter.
Reduced airflow from hood	Filter is clogged with grease/debris.	Replace the filter. Ensure proper installation.
Filter does not fit	Incorrect filter model or improper alignment.	Verify that you have the correct filter (KWH-COMFEE'-CC01) for your hood model (KWH-SLIF17SS-60 or KWH-SLIF17B-60). Re-attempt installation, ensuring correct orientation.

IMPORTANT SAFETY INFORMATION

- Always disconnect power to the range hood before installing or replacing the filter.
- Do not attempt to wash or reuse a saturated filter, as its effectiveness will be compromised.
- Keep filters out of reach of children.
- This filter is designed for specific COMFEE' range hood models. Using it with incompatible models may lead to reduced performance or damage.
