This image displays the Hot Wheels Premium 1969 Chevy Chevelle SS 396 diecast model car, packaged in its blister card. The car is orange with black racing stripes, featuring a detailed metal body and Real Rider rubber tires. The packaging highlights its inclusion in the 'American Scene' Car Culture Series.

Setup

The Hot Wheels Premium diecast model comes pre-assembled and ready for display. No assembly is required. To set up your model:

1. Carefully remove the model from its packaging. Handle the blister card gently to preserve its condition if you intend to keep it.
2. Inspect the model for any visible defects or damage from shipping.
3. Place the model on a stable, flat surface for display. Ensure it is away from direct sunlight, extreme temperatures, and high humidity to prevent material degradation.

Operating Instructions

This diecast model is primarily intended for display and collection. While it features functional rolling wheels, it is not designed for rough play or high-impact activities. To ensure the longevity of the model:

- Handle the model by its body, avoiding excessive pressure on delicate parts like mirrors or spoilers (if present).
- Avoid dropping the model, as this can cause paint chips, bent axles, or broken components.
- If rolling the car, do so on smooth, clean surfaces to prevent damage to the Real Rider rubber tires.

Maintenance and Care

Proper care will help maintain the appearance and value of your diecast model:

- **Cleaning:** Use a soft, dry microfiber cloth to gently wipe away dust. For stubborn dirt, slightly dampen the cloth with water (no harsh chemicals) and gently clean, then dry immediately with a separate dry cloth.
- **Storage:** Store the model in a dust-free environment, such as a display case or its original packaging. Avoid storing in areas with extreme temperature fluctuations or high humidity, which can affect paint and material integrity.
- **Handling:** Minimize direct handling to prevent fingerprints and accidental damage. If handling is necessary, ensure your hands are clean and dry.

Troubleshooting

While diecast models are generally robust, minor issues can occur. Here are some common concerns and solutions:

- **Dust Accumulation:** Regularly clean with a soft, dry microfiber cloth. Consider a sealed display case for long-term protection.
- **Minor Scratches/Paint Chips:** These are typically permanent. Handle with care to prevent them. For collectors, the condition of the paint is crucial for value.
- **Loose Parts:** If a small part becomes loose, it may be reattached with a small amount of model-safe adhesive, applied carefully with a toothpick. This should only be attempted if you are comfortable with model repair.
