OEMIRY OM-WF01 / OM-WF02

OEMIRY Replacement Filters for OM-WF01 / OM-WF02 Faucet Water Filter User Manual

INTRODUCTION

This manual provides instructions for the installation, operation, and maintenance of OEMIRY Replacement Filters. These filters are designed for use with the OEMIRY Faucet Filtration Systems models OM-WF01 and OM-WF02.

Ensure you have the correct replacement filters for your system to maintain optimal water quality and system performance.

PRODUCT FEATURES

- **Compatibility:** Specifically designed for OEMIRY Faucet Filtration System models OM-WF01 and OM-WF02.
- **Advanced Filtration:** Utilizes multistage filtration with premium coconut activated carbon block for effective reduction of heavy metals, chemical impurities, sediment, and chlorine.
- **Fast Flow Rate:** Achieves a water flow of up to 0.5 gallons per minute.
- **Extended Service Life:** Each filter provides up to 3 months or 320 gallons of filtered water, depending on water conditions.
- **Certified Quality:** External testing certification includes ANSI and NSF standards.

NSF/ANSI 42
Certified

INSTALLATION (FILTER REPLACEMENT)

Replacing the filter cartridge in your OEMIRY Faucet Filtration System is a simple process. Follow these steps for proper installation:

1. Ensure the water supply to the faucet filtration system is turned off.
2. Locate the filter housing on your OEMIRY Faucet Filtration System (OM-WF01 or OM-WF02).
3. Twist the existing filter cartridge counter-clockwise to unlock and remove it from the housing.
4. Insert the new replacement filter cartridge into the housing.
5. Twist the new filter cartridge clockwise to lock it securely into place. You should feel a click or resistance indicating it is properly seated.
6. Turn on the water supply and check for any leaks. Flush the new filter with water for a few minutes to remove any carbon fines.

OPERATING INSTRUCTIONS

Once the replacement filter is installed, your OEMIRY Faucet Filtration System is ready for use. The system allows you to switch between filtered and unfiltered water.

- To obtain filtered water, activate the switch on your faucet filtration system.
- To obtain unfiltered tap water, deactivate the switch.

The advanced filtration technology ensures that water passing through the filter is treated to reduce impurities, providing clean and healthy drinking water.

MAINTENANCE

Regular filter replacement is crucial for maintaining the performance and effectiveness of your OEMIRY Faucet Filtration System.

- **Filter Lifespan:** Each replacement filter is designed to last for approximately 3 months or filter up to 320 gallons of water. This duration may vary based on local water quality and usage.
- **Replacement Schedule:** It is recommended to replace the filter cartridge every 3 months to ensure continuous optimal filtration.
- **Indicator:** If you notice a decrease in water flow, a change in taste, or an odor in the filtered water before the 3-month period, it may indicate that the filter needs to be replaced sooner.

Easy Replacement

Image: Two replacement filters shown with a graphic indicating recommended replacement intervals of 1-3 months for a single filter and 2-6 months for a pack of two, depending on usage.

TROUBLESHOOTING

This section addresses common questions and issues related to the OEMIRY Replacement Filters.

- **TDS Value:** The OEMIRY Faucet Filtration System is designed to reduce harmful contaminants while retaining beneficial minerals. Therefore, it will **not** significantly reduce the Total Dissolved Solids (TDS) value of your water. If TDS reduction is a primary concern, consider an OEMIRY Reverse Osmosis (RO) system, such as model OM-ROF03 or B0DNDV2JKF.

- **Reduced Water Flow:** If you experience a noticeable reduction in filtered water flow, it typically indicates that the filter cartridge is nearing the end of its lifespan and requires replacement.
- **Unusual Taste or Odor:** A return of unpleasant taste or odor in your filtered water suggests that the filter's capacity to remove impurities has been exhausted. Replace the filter cartridge immediately.
- **Leaks After Replacement:** Ensure the new filter cartridge is properly seated and twisted clockwise until secure. Check that all connections are tight. If leaks persist, remove and re-install the filter, ensuring the O-rings are correctly positioned and not damaged.

SPECIFICATIONS

Brand	OEMIRY
Compatible Models	OM-WF01 / OM-WF02 Faucet Filtration Systems
Material	Coconut Activated Carbon
Product Dimensions	1.9"D x 1.9"W x 3.5"H
Item Weight	2.24 ounces
External Testing Certification	ANSI, NSF
Product Benefits	Reduces Chlorine, Heavy Metals, Sediment, Taste & Odor
Filter Lifespan	Up to 3 months or 320 gallons (varies by water conditions)

WARRANTY AND SUPPORT

Specific warranty details for OEMIRY Replacement Filters are not provided within this manual. For warranty information, product support, or to purchase additional replacement filters, please refer to the original product packaging or contact OEMIRY customer service directly.

You can typically find contact information on the manufacturer's official website or through the retailer where the product was purchased.
