- **AKM DSP:** Take your audio experience to a new level with advanced digital sound processing.
- **Screen Mirroring:** Display content from your smartphone directly onto the car stereo screen.

### 3.4 CANbus Decoding

The optimized CANbus decoding function allows the unit to display your car’s information, such as ACC control and reversing control.

## 4. MAINTENANCE

To ensure the longevity and optimal performance of your XTRONS Car Stereo, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the screen and exterior. Avoid abrasive cleaners or solvents that could damage the surface.
- **Temperature:** Do not expose the unit to extreme temperatures. The built-in cooling fan helps manage heat during operation.
- **Software Updates:** Periodically check the XTRONS official website for firmware updates to ensure the best performance and access to new features.
- **Connection Checks:** Ensure all cables and connections remain secure. Loose connections can lead to intermittent issues.

## 5. TROUBLESHOOTING

If you encounter issues with your XTRONS Car Stereo, refer to the following common troubleshooting steps:

Problem	Possible Cause	Solution
Unit does not power on.	Loose power connection, blown fuse, vehicle battery issue.	Check power cables and fuses. Ensure vehicle battery is charged. Consult a professional if issues persist.
No audio output.	Incorrect speaker wiring, volume too low, mute activated, DSP settings.	Verify speaker connections. Increase volume. Check mute status. Adjust DSP settings.
GPS signal lost or inaccurate.	GPS antenna not properly connected or obstructed, outdated map data.	Ensure GPS antenna is securely connected and has a clear view of the sky. Update navigation software if necessary.
Bluetooth connectivity issues.	Device not paired, Bluetooth off on either device, interference.	Ensure Bluetooth is enabled on both devices and they are paired correctly. Try re-pairing. Reduce interference.
Screen freezing or unresponsive.	Software glitch, excessive background applications, overheating.	Perform a soft reset (refer to manual for specific button combination). Close unnecessary applications. Ensure proper ventilation.
