Setup

1. Power Connection

Connect the provided AC adapter to the DC input port on the back of the clock and plug it into a standard wall outlet. The clock will power on and the display will light up.

2. Backup Battery

The clock comes with a built-in CR2032 coin-type lithium battery for backup. This battery retains time settings during a power outage but does not power the clock for normal operation. The clock cannot be used with the battery only.

Operating Instructions

1. Setting Time

Refer to the detailed instructions in the included paper manual for specific button functions to set the time. The clock supports both 12-hour and 24-hour display formats.

2. Setting Alarm

The QA-04 features a dual alarm function. Consult the paper manual for step-by-step instructions on setting Alarm 1 and Alarm 2. The snooze function can be activated by pressing the SNOOZE button when the alarm sounds.

3. Display Brightness Adjustment

The LCD display brightness can be adjusted to 4 levels: Strong, Medium, Weak, and Off. This allows you to customize the display visibility for day or night, ensuring it doesn't disturb your sleep.

4. Bed Light Operation

The integrated bed light provides gentle, indirect illumination. Its brightness can also be adjusted in 4 levels: Strong,

Medium, Weak, and Off. This feature is perfect for providing subtle lighting around your bed at night.

5. Wireless Charging

The QA-04 is equipped with a Qi-compatible wireless charging pad (5W). To charge your smartphone or other compatible mobile device, simply place it on the charging pad. An indicator light will confirm charging status.

The image shows the wireless charging pad with a smartphone, indicating the charging status via a small light. Red light indicates charging, green light indicates charging complete.

Important Notes for Wireless Charging:

- Ensure your device is Qi-compatible.
- Charging may not be possible if your smartphone case is thicker than 3mm or made of certain materials.
- While this product complies with the Qi standard, compatibility with all Qi-standard devices is not guaranteed.
- For optimal charging, ensure your device is centered on the charging pad.

Maintenance

To ensure the longevity of your ADESSO QA-04 clock:

- Clean the device with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- Keep the charging pad free of dust and debris.
- Avoid dropping the device or subjecting it to strong impacts.

Troubleshooting

Problem	Possible Cause	Solution
Device not powering on.	AC adapter not properly connected or power outlet issue.	Ensure AC adapter is securely plugged into the clock and a working power outlet.
Wireless charging not working.	Phone not centered, case too thick, or device not Qi-compatible.	Reposition phone on the charging pad. Remove phone case. Verify phone is Qi-compatible.
Alarm sound is too low.	Alarm volume setting is low or user is wearing earplugs.	Adjust alarm volume (refer to manual). Consider alternative alarm methods if wearing earplugs.
Time/settings reset after power outage.	Backup battery depleted or not functioning.	The internal CR2032 battery is for backup only. If it's depleted, settings may reset. Replace if necessary (refer to manual for battery replacement).
