MAINTENANCE

Cleaning

To maintain optimal performance, keep the fan clean.

- Gently wipe the exterior of the fan with a soft, dry cloth.
- Do not use abrasive cleaners, solvents, or immerse the fan in water.
- Ensure the air inlets and outlets are free from dust and debris.

Storage

When not in use, store the fan in a cool, dry place away from direct sunlight and extreme temperatures.

TROUBLESHOOTING

- **Fan not turning on:**
Ensure the battery is charged. Connect the fan to a power source using the Type-C cable and allow it to charge for at least 30 minutes before attempting to power on again.
- **Weak airflow:**
Check the current speed setting and increase it if necessary. Ensure that the air inlets and outlets are not blocked by clothing, hair, or debris.
- **Unusual noise:**
If the fan produces an unusual or loud noise, power it off and check for any obstructions in the air vents. If the noise persists, contact customer support.
- **Charging issues:**
Verify that the Type-C cable is securely connected to both the fan and the power source. Try using a different Type-C cable or power adapter to rule out cable/adapter issues.
