5. MAINTENANCE

6. TROUBLESHOOTING

6.1 Keyboard Not Responding

- Ensure the keyboard is powered on (check the ON/OFF switch).
- Verify that the batteries are correctly installed and have sufficient charge. Replace if necessary.
- Confirm the 2.4G USB receiver is securely plugged into a working USB-C port on your device. Try a different USB port if available.

6.2 Incorrect Characters or Layout Issues

- This keyboard features a French-English bilingual layout. Ensure your operating system's keyboard input language is set to French (France) or French (Canada) as appropriate, to correctly access all characters.
- To type the third character on some keys, you typically use the **Alt Gr** key (located to the right of the spacebar) in combination with the key.
