## SETUP GUIDE

### Connecting to your Device

The Ozeino ZW1 Gaming Headset connects via a 3.5mm audio jack. For devices like PC, PS4, PS5, Xbox One S/X, Switch, Laptops, Tablets, and Mobile Phones, simply plug the 3.5mm jack into the corresponding audio port.

For PC setups that require separate audio and microphone inputs, use the included 1-to-2 3.5mm audio jack splitter cable.

The USB cable is solely for powering the RGB LED lights on the headset. Plug the USB connector into an available USB port on your console, PC, or a USB power adapter to activate the lights.

*Note: An extra Microsoft Adapter may be required when connecting with an old version Xbox One controller.*

## OPERATING INSTRUCTIONS

### Volume Control and Microphone Mute

The headset features an inline control unit for convenient audio management. Use the scroll wheel to adjust the volume up or down. The switch next to the volume wheel allows you to quickly mute or unmute the microphone.

## Microphone Adjustment

The microphone is 360° omnidirectionally rotatable. Adjust its position to optimize voice pickup and comfort during communication.

## MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the headset. Avoid using harsh chemicals or abrasive materials.
- **Storage:** Store the headset in a cool, dry place away from direct sunlight and extreme temperatures.
- **Cable Care:** Avoid sharp bends or excessive pulling on the cables to prevent damage.

## TROUBLESHOOTING

### No Sound or Low Volume

- Ensure the 3.5mm audio jack is fully inserted into your device's audio port.
- Check the volume control wheel on the headset cable and ensure it is turned up.
- Verify your device's audio output settings and volume levels.
- If using a PC, ensure the correct audio output device is selected in your sound settings.

### Microphone Not Working

- Ensure the microphone mute switch on the inline control is in the 'unmuted' position.
- Check your device's microphone input settings and ensure the headset is selected as the default input device.
- For PC, ensure the 1-to-2 splitter cable is correctly connected to both the microphone and audio jacks.
- Adjust the microphone's position closer to your mouth.

### LED Lights Not On

- Ensure the USB connector is securely plugged into a powered USB port on your device or a USB power adapter.
- The USB connection is only for the LED lights and does not transmit audio.
