4. ASSEMBLY INSTRUCTIONS

Assembly is designed to be straightforward. It is recommended to have two people for easier assembly. An Allen wrench is typically included in the hardware pack.

Step-by-Step Guide:

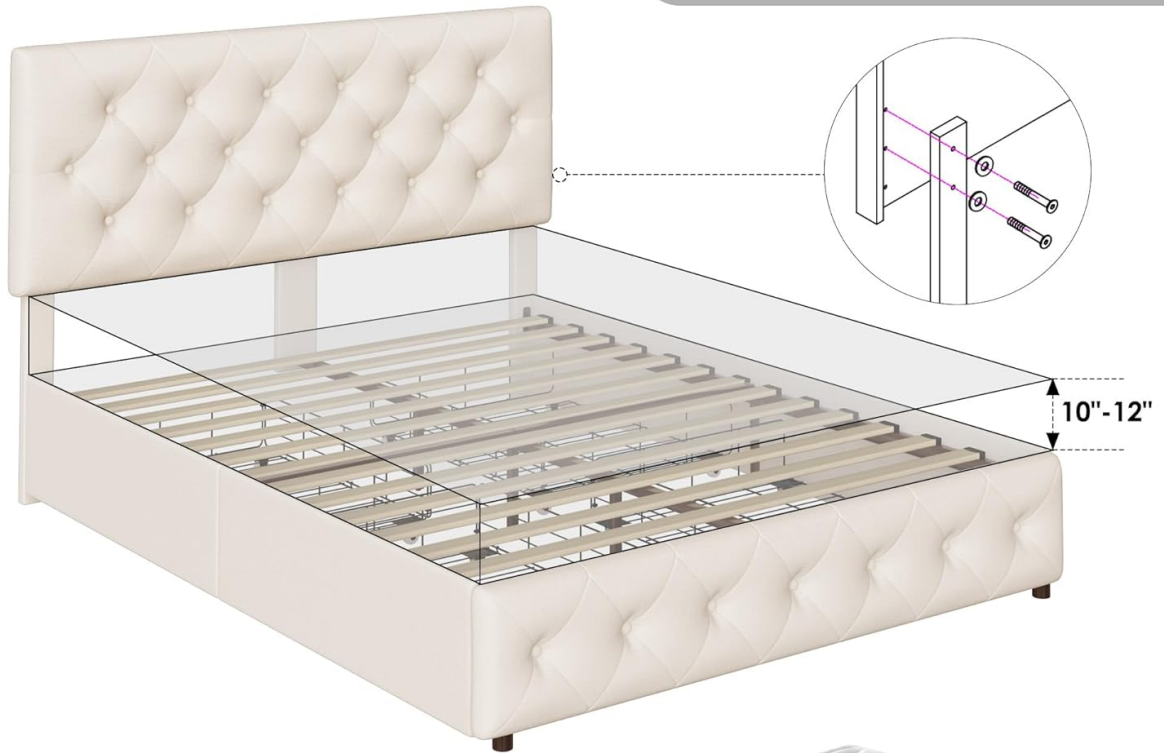

1. **Unpack and Organize:** Carefully remove all components from the packaging. Lay them out on a clean, soft surface to prevent scratches. Identify each part using the provided parts list.
2. **Attach Side Rails to Headboard:** Connect the side rails to the headboard using the designated bolts and washers. Do not fully tighten bolts until all major components are connected.
3. **Attach Side Rails to Footboard:** Connect the other end of the side rails to the footboard. Ensure all connections are aligned before gently tightening the bolts.
4. **Install Center Support Beam:** Secure the center support beam to the designated points on the headboard and footboard, or to the side rails if applicable. This provides crucial support for the slats.
5. **Place Wooden Slats:** Position the wooden slats evenly across the bed frame. Many slats include pre-drilled holes for securing them to the frame with screws or plastic caps. Ensure all slats are firmly in place.

- **Check Connections:** Periodically inspect all bolts and connections. Tighten any loose hardware to maintain stability and prevent squeaking.
- **Clean Frame:** Wipe down the frame with a damp cloth as needed.
- **Slat Inspection:** Ensure all wooden slats are properly seated and undamaged. Replace any broken slats immediately to maintain mattress support.

- **Squeaking Noises:**
 - Ensure all bolts are securely tightened. Loose connections are a common cause of squeaking.

- **Drawers Not Sliding Smoothly:**
 - Inspect the drawer wheels for any obstructions (e.g., carpet fibers, debris).
 - Verify that the drawers are correctly aligned with the bed frame's base.
