User Manual: Generic Kashmiri Kangri/Kanger Traditional Kashmiri Heating Pot

Model: kk1234

1. INTRODUCTION

The Kashmiri Kangri, also known as Kanger or Kangid, is a traditional Kashmiri heating pot designed to provide warmth during cold weather. It consists of an earthenware pot encased in a decorative wicker and wood basket. This manual provides essential information for the safe and proper use, maintenance, and care of your Kangri.

2. IMPORTANT SAFETY INFORMATION

Please read all safety warnings before using the Kangri. Failure to follow these instructions may result in fire, burns, or other serious injury.

- **Fire Hazard:** The Kangri contains hot embers. Always use with extreme caution to prevent accidental fires. Keep away from flammable materials, fabrics, and surfaces.
- **Burn Hazard:** The earthenware pot and embers become extremely hot. Avoid direct contact with the inner pot. Use protective gloves if handling the hot pot.
- **Ventilation:** Ensure adequate ventilation when using the Kangri to prevent carbon monoxide buildup, especially if using charcoal or other fuel that produces smoke.
- **Skin Burns:** Prolonged direct contact with the heated Kangri against skin can cause burns. Use it with a protective layer, such as traditional Kashmiri clothing (Pheran) or a thick blanket, to prevent direct skin exposure.
- **Children and Pets:** Keep the Kangri out of reach of children and pets at all times.
- **Stable Surface:** Always place the Kangri on a stable, non-flammable surface.
- **Supervision:** Never leave a lit Kangri unattended.
- **Fuel Type:** Use only appropriate, non-toxic fuel sources such as dried charcoal or traditional embers. Do not use flammable liquids.

3. PRODUCT COMPONENTS

Your Kashmiri Kangri consists of the following main parts:

- **Earthenware Pot:** The inner pot made of clay, designed to hold hot embers.
- **Wicker & Wood Casing:** The outer decorative basket woven from wicker and wood, providing insulation and a handle for carrying.

4. SETUP

The Kangri is typically ready for use upon arrival. No assembly is required.

1. **Inspect:** Before first use, inspect the earthenware pot for any cracks or damage. Inspect the wicker casing for any loose parts. Do not use if damaged.
2. **Placement:** Choose a safe, non-flammable location for use, away from any combustible materials.

5. OPERATING INSTRUCTIONS

Follow these steps to safely use your Kashmiri Kangri:

1. **Prepare Fuel:** Obtain suitable fuel, such as dried charcoal or traditional embers. Ensure the fuel is fully ignited and glowing before placing it into the Kangri.
2. **Load Embers:** Carefully place the hot embers into the earthenware pot. Do not overfill the pot. Use tongs or a small shovel to avoid direct contact.
3. **Positioning:** Once loaded, the Kangri can be placed under traditional Kashmiri clothing (Pheran) or inside a blanket to provide warmth. Ensure there is always a layer of clothing or fabric between the Kangri and your skin to prevent burns.
4. **Monitoring:** Periodically check the embers and ensure they are burning safely. Do not allow the wicker casing to come into direct contact with the hot embers.
5. **Extinguishing:** To extinguish the embers, carefully remove the earthenware pot from the wicker casing (if possible and safe to do so) and place it on a non-flammable surface. Allow the embers to cool completely or douse them with sand. Do not use water directly on hot earthenware as it may crack.

6. MAINTENANCE AND CARE

Proper care will extend the life of your Kangri:

- **Cleaning:** The earthenware pot should be cleaned of ash after each use once it has completely cooled.
- **Wicker Care:** The wicker casing should be kept dry. Avoid getting it wet.
- **Washing:** Hand wash only. Do not use a dishwasher.
- **Microwave:** Do not place in a microwave.
- **Storage:** Store the Kangri in a dry place when not in use.
- **Inspection:** Regularly inspect the wicker for any signs of charring or damage. If the wicker is damaged, discontinue use to prevent fire hazards.

7. TROUBLESHOOTING

Common issues and their solutions:

Problem	Possible Cause	Solution
Kangri not producing enough heat	Insufficient embers; embers not fully lit; poor quality fuel.	Ensure embers are fully glowing before placing them. Use more embers if safe to do so. Use high-quality, dry fuel.
Wicker casing appears to be burning or charring	Embers are too close to the wicker; pot is overfilled; wicker is damaged.	Reduce the amount of embers. Ensure embers are centered in the pot. Discontinue use if wicker is damaged and replace the unit.
Earthenware pot cracks	Thermal shock (sudden temperature change); physical impact.	Avoid dousing hot pot with water. Handle with care. A cracked pot should not be used.

8. SPECIFICATIONS

Model Number	kk1234
Brand	Generic
Material	Earthenware (pot), Wicker & Wood (casing)
Color	Multicolor
Dimensions (W x H)	24W x 35H Centimeters (Approximate)
Weight	2 Kilograms (Approximate)
Capacity	3 Cubic Centimeters (Output Capacity)
Care Instructions	Hand Wash Only

9. WARRANTY INFORMATION

The outer part of the Kangri wicker craft is under warranty for 1 month from the date of purchase. The inner earthenware pot does not have any warranty, as it is made of mud and may be broken during transit; it cannot be refunded or returned if broken upon arrival.

10. CUSTOMER SUPPORT
