

Neumann NDH 30

Neumann NDH 30 Open-back Studio Headphones User Manual

Comprehensive instructions for setup, operation, and maintenance of your Neumann NDH 30 headphones.

1. INTRODUCTION

The Neumann NDH 30 are circumaural, open-back studio headphones designed for demanding audio applications such as mixing and mastering. They offer high detail resolution, precise stereo imaging, and a linear soundstage for accurate audio reproduction.

This manual provides essential information for the proper use and care of your NDH 30 headphones.

Please read it thoroughly before initial use.

2. PACKAGE CONTENTS

Verify that all items are present in the package:

- Neumann NDH 30 Open-back Studio Headphones
- Detachable Audio Cable (3.5mm jack with 6.35mm adapter)
- User Manual (this document)

Image: Neumann NDH 30 headphones neatly packed in their retail box, showcasing the product and its presentation.

3. SETUP AND CONNECTION

Follow these steps to set up your NDH 30 headphones:

1. **Unpack the Headphones:** Carefully remove the headphones and the audio cable from their packaging.
2. **Connect the Audio Cable:**
 - Locate the 3.5mm jack input on the left earcup of the headphones.
 - Insert the smaller end of the detachable audio cable into this input. Ensure it is securely screwed in to prevent signal issues.
 - Connect the other end of the cable (3.5mm or 6.35mm adapter) to your audio source (e.g., audio interface, amplifier, mixing console).

Image: A detailed view of the detachable audio cable being connected to the 3.5mm jack on the left earcup of the NDH 30 headphones.

Image: The detachable audio cable, showing both the 3.5mm connector and the screw-on 6.35mm adapter for versatile connectivity.

3. Adjust for Comfort: Extend or retract the headband to fit your head comfortably. The earcups

should fully enclose your ears without excessive pressure.

4. OPERATING INSTRUCTIONS

The NDH 30 headphones are designed for critical listening tasks. Here are some guidelines for optimal use:

- **Volume Control:** Always start with a low volume level on your audio source and gradually increase it to a comfortable listening level. Avoid excessively high volumes to protect your hearing.
- **Open-Back Design:** As open-back headphones, the NDH 30 allows some sound to escape and some ambient sound to enter. This design contributes to a natural, spacious soundstage, ideal for mixing and mastering in quiet environments. They are not designed for noise isolation.
- **Intended Use:** These headphones are optimized for professional audio monitoring, editing, and mixing. Their linear frequency response and transient accuracy provide a reliable reference for sound engineers and producers.
- **Folding Mechanism:** The headphones feature a foldable design for easy storage and transport. Carefully fold the earcups inwards towards the headband when not in use.

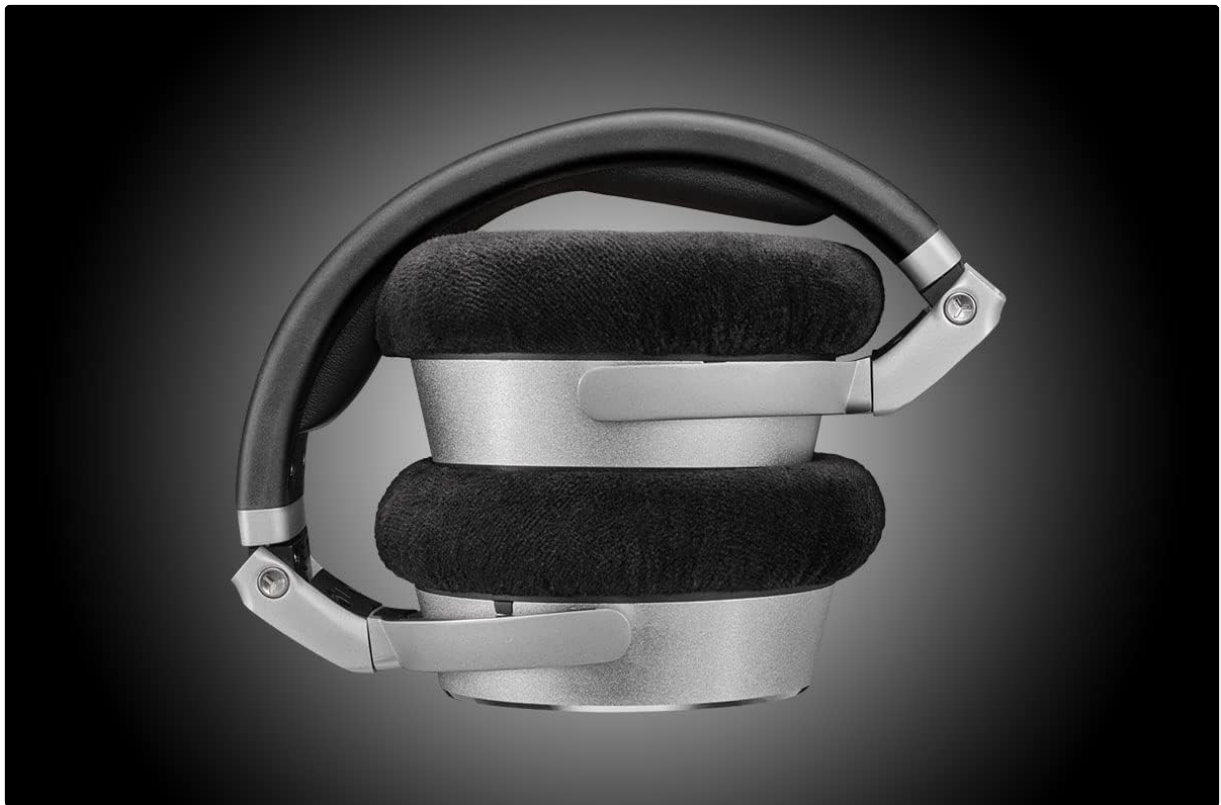

Image: The Neumann NDH 30 headphones shown in their folded configuration, highlighting their portability and compact storage design.

Image: A user wearing the Neumann NDH 30 headphones, engaged in audio work at a computer workstation, demonstrating typical usage.

5. MAINTENANCE AND CARE

To ensure the longevity and optimal performance of your NDH 30 headphones, follow these maintenance guidelines:

- **Cleaning:** Use a soft, dry cloth to clean the exterior surfaces of the headphones. For ear pads, gently wipe with a slightly damp cloth if necessary, and allow to air dry completely. Do not use harsh chemicals or abrasive cleaners.
- **Storage:** When not in use, store the headphones in a clean, dry place, preferably in their original box or a protective case. Avoid exposing them to extreme temperatures, humidity, or direct sunlight.
- **Cable Care:** Handle the detachable cable with care. Avoid sharp bends or excessive pulling. Always grasp the connector, not the cable, when plugging or unplugging.
- **Earpad Replacement:** Over time, ear pads may show wear. Replacement ear pads are available from authorized Neumann dealers. Refer to the Neumann website for instructions on how to replace them.

6. TROUBLESHOOTING

If you encounter issues with your NDH 30 headphones, refer to the following common problems and solutions:

- **No Sound or Intermittent Audio:**
 - Ensure the audio cable is securely connected to both the headphone earcup and the audio source. The cable connector on the headphone side should be screwed in properly.
 - Check the volume level on your audio source and ensure it is not muted.
 - Test the headphones with a different audio source or device to rule out issues with the source.
 - Inspect the audio cable for any visible damage. If damaged, replace it with an official Neumann replacement cable.

- **Distorted Sound:**

- Reduce the volume level on your audio source. Distortion can occur if the signal is too strong.
- Ensure the audio cable is fully inserted and securely connected. A loose connection can cause distortion or phase issues.
- Test with another audio source to determine if the distortion originates from the source device.

- **Uncomfortable Fit:**

- Adjust the headband length until the earcups sit comfortably over your ears.
- Ensure the earcups are positioned correctly, fully enclosing your ears.

If the problem persists after trying these steps, please contact Neumann customer support.

7. SPECIFICATIONS

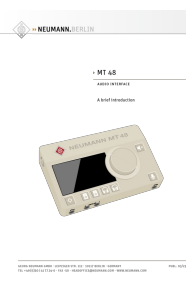

Feature	Detail
Model Name	NDH 30
Brand	Neumann
Ear Placement	Open Ear (Circumaural)
Form Factor	Over Ear
Connectivity Technology	Wired
Headphones Jack	3.5 mm Jack (with 6.35 mm adapter)
Cable Feature	Detachable
Special Feature	Foldable Design
Audio Driver Type	Dynamic Driver
Item Weight	962 Grams (2.12 pounds)
Product Dimensions	10 x 9.62 x 3.37 inches
Material	Titanium (components)
Recommended Uses	Music, Recording, Podcast

8. WARRANTY AND SUPPORT

Neumann products are manufactured to high-quality standards. For warranty information, please refer to the warranty card included with your product or visit the official Neumann website. Keep your proof of purchase for warranty claims.

For technical support, spare parts, or service inquiries, please contact Neumann customer service through their official website or an authorized dealer. You can find contact information and FAQs on the [Neumann Store page](#).

AESNY 2022: Neumann, DearReality and Merging Technologies present high-quality and innovative solutions for all phases of the recording process including immersive applications

Old Lyme, October 6, 2022 - Sennheiser Group (Berth 129 / Dornow House 1005) will be presenting its recording tools on October 10th & 11th during the 150th AESNY Convention at the Javits Center. Highlights on display from Neumann.Berlin include KH line monitors with the recently released KH 120, NDH 30 open-back headphones, and the highly anticipated release of the legendary M 49. Meantime, Dear Reality will showcase its spatializer, monitoring and mixing plugins.

Neumann will feature various demonstrations over the course of the exhibition. Experience how Neumann microphones, loudspeakers, electronics and software are able to form premium systems, where each component complements and improves the sound quality of conventional and immersive productions.

Immersive Demonstration Room 3001

The Sennheiser demo room will be equipped with a full 7.1.4 Immersive system, including several pairs of monitors for demonstrating the new AMBEO 3-Channel Spatial Audio. Here, Neumann will host 6 different presentations featuring Grammy award-winning engineers/producers discussing their most recent immersive mixes on the Neumann Immersive KH monitor system. Additionally, there will be product presentations on KH monitors, Dear Reality software and plugins, and Merging Technologies interfaces.

ODP-Powered Studio Monitor KH 120

With having a compact format, the KH 120 surprises with outstanding clarity, even at high volume, and extended low-end. Recommended for all applications from broadcast to music production, including styles that require a powerful, deep low-end and/or extended listening levels such as other music, EDM, and film scoring. Other monitors featured will include the KH 80, KH 120, and KH 750.

Neumann RIME Plug-In

Dienstag, 01. Juli 2025 07:00

Neumann RIME

Binauralisierungs-Plug-In für Neumann Kopfhörer NDH 20 und NDH 30

Autor und Fotos: Peter Kaminski

Immersive Audio wird immer wichtiger. Der Aufwand ein Studio mit einer entsprechenden Lautsprecheraufstellung einzurichten ist für kleinere Produktionsstudios oder im mobilen Einsatz aber häufig nicht möglich. Daher wird das Produzieren mit Hilfe von Kopfhörern und binauralisiertem 3D-Audio immer beliebter und es wird auch qualitativ immer besser.

Bereits vor einiger Zeit hatte Sennheiser die Firma DearReality übernommen, ein Spezialist für binaurales Hören und 3D-Audio. Mit dem "DearVR Monitor" hatten man auch einen sehr universell einsetzbaren Binauralisierungs-Plug-In im Portfolio. Im Frühling 2025 hatte Sennheiser aber die Auflösung von DearReality und die Integration in die Sennheiser Gruppe angekündigt. Erfahrung und know-how waren also vorhanden und das Tochterunternehmen Neumann stellte dann zur gleichen Zeit sein neues Plug-In RIME vor: ein Binauralisierungs-Plug-In speziell für die Neumann Kopfhörer NDH 20 (geschlossener Kopfhörer) und NDH 30 (akustisch

Sennheiser & Neumann bei 38. NAMM TEC Awards ausgezeichnet

Sennheiser und Neumann wurden am 13. April bei der Verleihung der 38. NAMM TEC Awards im kalifornischen Anaheim für herausragende technische Leistungen ausgezeichnet. Das In-Ear-Monitoring-System XS Wireless IEM von Sennheiser gewann den TEC Award in der Kategorie Wireless Technology, während der Referenz-Kopfhörer NDH 30 von Neumann in der Kategorie Headphone/Earpiece Technology die höchste Auszeichnung erhielt.

„Die Sennheiser-Gruppe ist dankbar, erneut von der NAMM für herausragende technische Leistungen ausgezeichnet worden zu sein“, kommentierte Greg Beebe, Executive Vice-President für Professional Audio bei Sennheiser. Ralf Dahl, CEO von Neumann Berlin, fügte hinzu: „Die Innovationskraft unserer Marken NRE Anwendern auf der ganzen Welt, ihre künstlerischen Ziele zu erreichen, sowohl im Live- als auch im Recording-Bereich.“

Die TEC Awards gelten als die höchste Auszeichnung der Pro-Audio- und Recording-Branche und würdigen herausragende Leistungen von Personen, Unternehmen und technischen Innovationen in den Bereichen Recording, Live, Film, TV, Games und multimedialen Produktionen.

Experience audio content creation with Sennheiser, Neumann and Dear Reality at IBC 2022

Wednesday, 17 August 2022 18:58

Sennheiser, Neumann and Dear Reality at IBC 2022

Today, content creation serves a multitude of media and channels from 'prosumer' to pro and traditional to new. Whether you are planning a full-blown TV production or are looking for an external smartphone microphone, one thing remains the same: Excellent audio will make your work stand out and establish a real connection with the audience. At IBC 2022, Sennheiser, Neumann, and Dear Reality will reveal how their audio solutions can lift your projects to the next level. Visitors to stand B020 can experience AMBEO 2-Channel Spatial Audio, learn more about Sennheiser's upcoming EW-DX wireless system, experience the new Neumann KH 150 monitors in an immersive set-up or listen to the new, open-back Neumann NDH 30 studio headphone.

IBC will be the first European show to give visitors a first-hand impression of the upcoming DW-DX line. As part of the DW-D family, DW-DX will boast family features such as lowest latency on the market, convenient and spectrum-saving equidistant frequency spacing, and ultra-wide input dynamic range.

At the same time, DW-DX will add exciting new options such as two- and four-channel receivers, new handheld, bodypack and table stand transmitters, and new benefits such as its wider switching bandwidth of 88 kHz, AES 256 encryption, e-ink displays and many more.

Foto: Jesse Grant/WireImage

Im Studio A der legendären Village Studios in Los Angeles konnten die VIP-Teilnehmer am Mittwoch, den 1. Februar, die legendären Neumann-Mikrofone, darunter den Kunstkopf KU100, aus nächster Nähe sehen. Zu den ausgestellten Exponaten zählten außerdem die neuesten Produktions-Tools von Neumann, darunter das neu aufgelegte Kondensatormikrofon M 49 V, der dynamische Kopfhörer NDH 30 sowie das neue Miniatur-Clip-Mic-System (MCM), das speziell für die Nahabnahme von Instrumenten in Live-Anwendungen entwickelt wurde.

„Wir waren überwältigt von der positiven Resonanz, die uns im Rahmen des diesjährigen P+G-Wing-Events erreichte, das von den Village Studios ausgerichtet wurde“, sagt Ralf Oehl, CEO von Neumann.Berlin. „Mit unseren Referenzlösungen für Recording, Monitoring und Live-Performance tragen wir seit 1928 dazu bei, die Grenzen der Audietechnik zu verschieben und Künstlern auf ihrem Weg zur kreativen Erfüllung zu begleiten. Wir freuen uns, den eingeschlagenen Weg mit dem Producers & Engineers Wing fortzusetzen.“

Sennheiser brings latest products to The Media Production & Technology Show
Tuesday, 10 May 2022 13:55

Sennheiser at The Media Production & Technology Show

Launched in 2016, in just six short years The Media Production & Technology Show has cemented its position as one of UK's largest events and a must-attend for the media and broadcast industries. This year, the show's visitors will be able to experience Sennheiser's Evolution Wireless Digital (EWD), a wireless microphone system with a rich feature set and app-based workflow integration that makes it a unique solution at its price point. Neumann's Miniature Clip Mic System (MCM) for close miking acoustic instruments in live applications raises the bar of electret capsules. It will be demoed at the show together with the recently announced NDH 30, a reference-class open-back studio headphones for editing, mixing, and mastering, and Neumann's Automatic Monitor Alignment (MA 1), ensuring the best possible sound quality in any room.

Providing the highest dynamic range of any wireless system currently on the market, EWD utilizes advanced features that simplify users' setup and guarantee the most reliable connection. With EWD, any speaker can maximize efficiency by taking full control with the Sennheiser Smart Assist app and automatically coordinate frequencies with ease, increased bandwidth and the lowest latency of any digital wireless system currently available make Evolution Wireless Digital the most powerful tool for those who put quality and performance above all else.

DEAR REALITY

COMMUNIQUE DE PRESSE CP

Le salon IBC 2022 fait la part belle aux nouveautés audio pour les créateurs de contenus

Sennheiser, Neumann et Dear Reality exposent leurs derniers outils pour la prise son, le mixage et le monitoring

Mardi 27 août 2022 - Tous médias et canaux de diffusion confondus, la création de contenu traditionnelle et innovante est aujourd'hui l'élément, la destination des professionnels comme des consommateurs individuels (YouTubeur). Quel qu'il soit, la réalisation d'un programme TV ou de choisir le meilleur microphone externe pour un smartphone, une chose est sûre : une excellente qualité audio fait systématiquement la différence. Sennheiser, Neumann et Dear Reality sont présents au salon IBC 2022 pour exposer leurs meilleures solutions audio. Les visiteurs du stand B550 pourront expérimenter le rendu immersif AMBEO 3-Channel Spatial Audio, découvrir le système sans fil Sennheiser EW-D30 commercialisé prochainement, tester les options de monitoring Neumann KH 150 en environnement immersif ou encore porter le nouveau casque de studio ouvert Neumann NDH 30.

L'audio sans fil Sennheiser

C'est au salon IBC que Sennheiser a choisi d'offrir la première, en Europe, de sa prochaine gamme EW-D30, un système sans fil basé sur les technologies de la famille EW-D1, déjà très appréciée du marché, grâce de nombreuses applications permettant de configurer plus de canaux dans une fenêtre de bande et gamme dynamique d'entrée ultra large.

La nouvelle gamme EW-D30 inclut plusieurs nouvelles options : des microphones à deux et quatre canaux, des micros à main, des insertions de poche et de table, une large de bande caractéristique maximale de 90 kHz, le chiffrement AES 256 ou encore l'affichage «-IN».

Tonmeistertagung 2023: Sennheiser-Gruppe präsentiert Produktportfolio

Mittwoch, 08. November 2023 17:42

Tonmeistertagung 2023: Sennheiser-Gruppe präsentiert Produktportfolio

Auf der 32. Tonmeistertagung präsentieren Sennheiser, Neumann, Merging Technologies und Dear Reality vom 08. bis zum 11. November (Stand 28) das vielfältige Portfolio aus professionellen Audioanlagen der Sennheiser-Familie.

Allen voran liegt Sennheiser die neue EW-D30-Serie, die als digitales UHF-System seit ihrer Markteinführung durch ihre Vielseitigkeit überzeugt. Die Produkte der Linie EW-D30 verfügen unter allen auf dem Markt erhältlichen Funkmikrofonangeboten über den höchsten Dynamikbereich, und das im Frühjahr 2023 eingeführte EW-D30 plant den anderen Mitgliedern der Evolution Wireless Digital-Familie in nichts nach. Mit ergonomischem Design, magnetisch stabilisierten Empfängern und einem den NutzerInnen zugewandten OLED-Display richtet sich das EW-D30 in erster Linie an freiberufliche Videographen und unterstützt sie mit dem besten Sound – schnell, leicht und unkompliziert.

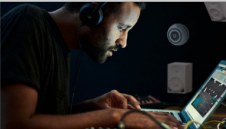

Neu im Produktportfolio von Sennheiser darf auch das HF-Kondensatormikrofon MKH 8020 mit der Charakteristik auf der Tagung nicht fehlen. Es ermöglicht M-S, Doppel-M-S- und Bümlen-Stereo-Aufnahmen und erlaubt es Tontechnikern dank der kleinen, bei Orchester-Aufnahmen beachtliche Schallquellen bestmöglich "auszubündeln". Schließlich vereint es die Qualitäten der MKH 8000-Serie und das HF-Kondensatormikrofon mit den Fähigkeiten eines Push-Pull-Verstärkers. Dazu gehören etwa eine hohe Widerstandsfähigkeit gegen Feuchtigkeit, ein symmetrisch erdrees Ausgangssignal, ein einseitiger Frequenzgang im unteren und oberen

Everything you need to start producing immersive audio

Dear Reality updates its dearVR MONITOR multi-channel mix room plugin and releases a new IMMERSIVE BUNDLE

Onward! 17 January 2023 - Dear Reality introduces the latest version of dearVR MONITOR and the new IMMERSIVE BUNDLE, combining two powerful plugins that experience any spatial mixing workflow. dearVR MONITOR provides access to an immersive mixing room through regular headphones to create great mixes anytime, anywhere, and in any format. The latest V1.3 update adds two new headphone profiles, Dear Reality's home usage, and the "Tues" M1 native support. In combination with Dear Reality's dearVR PRO spatializing solution, users have everything at their fingertips to start producing immersive audio.

Spatial audio technology is constantly shaping the way audio is created and consumed. With the latest dearVR MONITOR update and the new IMMERSIVE BUNDLE, users benefit from the perfect recipe to do mix professional spatial audio production. The new IMMERSIVE BUNDLE combines two of our most-used professional plugins, dearVR MONITOR and dearVR PRO, that expand your creative and technical horizons and provide an easy transition into the immersive world, whether for Live, Post-Production or Dear Reality VR production studio headphones like the recently integrated Sennheiser HD 800 S or the Neumann NDH 30. Users will mix with greater accuracy and ease in a personal acoustic reference room they can rely on.

Sennheiser Group brings UK-first audio innovations to MPT2025

Sennheiser, Neumann and Merging Technologies will present their latest audio solutions for broadcast and content production at London's leading industry event.

London, UK, May 2025: The Sennheiser Group is returning to MPT25, the UK's premier event for the media and entertainment industry, taking place on 14-16 May at Olympia London. Visitors to Stand C25 will have the opportunity to experience Sennheiser, Sennheiser's revolutionary wireless, individual digital wireless ecosystem, alongside a range of premium broadcast and content creation tools from Neumann and Merging Technologies.

Ornamented globally at the last year's IBC and now officially shaping, Spectra's wireless flexibility and efficiency professional audio transmission. The system combines wireless microphones, in-ear monitoring (IEM), and remote control capabilities into a single RF channel, dramatically reducing spectrum use and system complexity. A single U2 Spectra Core unit can manage up to eight bidirectional channels, with intuitive web-based management and automated frequency coordination, making it ideal for dynamic and demanding production environments. The ultra-compact Spectra base station, standard access and IEM use, sets a new benchmark in wireless audio reliability.

Neumann and Merging Technologies will also have a major presence at MPT25 2025. Demonstrations will include the acclaimed NT 120 studio monitors, NT 121 and NT 123 reference headphones, and the iconic U 67 condenser microphone. Neumann's MT 48 interface will be featured in a full production workflow alongside Merging's cutting-edge Anika and Hapi 100 units, highlighting professional audio solutions tailored for today's broadcast applications.

The new line also includes Profira Wireless, a compact 2.4 GHz system designed for content creators. Building on the success of the Profira USB microphone, the wireless system delivers the same broadcast sound quality in a flexible, cable-free format - ideal for videographers, producers, and solo content producers.

Visitors can also explore the SoundBase platform, the industry's first comprehensive, manufacturer-agnostic, cloud-based platform that streamlines work flow efficiency for live

The Sennheiser Group at IBC 2025

Covering all bases in the audio signal chain

Wiesbaden, Berlin, 7 August 2025 – At IBC 2025, the Sennheiser Group will be showcasing its audio solutions for the creation of professional media content and entertainment experiences. Visitors to stand B060 in the Audio Hall will be able to see and experience the group's audio highlights, accompanying solutions for recording, monitoring and playback, including some new launches from Neumann.

The best from past and present

Celebrating the company's 80th anniversary, the Sennheiser showcase also with the fascinating contrast between historical images from Sennheiser's rich broadcast past and the latest advances in audio technology, including the wireless Spectra ecosystem and next-generation ETC-SD systems.

From past to present: Sennheiser intelligent transmitter from the 1950s and today's Spectra bidirectional SD system.

Welcome to the Sennheiser Group's Experience Booth at NAB 2024

Sennheiser, Neumann, and Merging Technologies will showcase their latest audio solutions for broadcasting, studio and live audio on an interactive booth.

Las Vegas, April 2024: The Sennheiser Group invites NAB visitors to embark on a remarkable sonic journey at Booth 4732 in Central Hall. The Experience Booth will be a fully integrated space where all microphones and headphones on show can be tried.

Experiences. This is the perfect opportunity to get immersed in rich sound - from Neumann studio microphone classics and Sennheiser's MKN 8000 RF condenser microphone series, to Merging Technologies' Anika and Hapi, as well as the group's complete professional headphone offering. Here's more information on the highlights of booth C4732:

Sennheiser MKN 8000 RF condenser microphone and new accessories for the MKN 8000 series

The long-awaited MKN 8000 RF series of eight RF condenser microphones (MKN 8000 M, S, and Dynamic) offers recording options for the recording professional. The most significant of the MKN 8000 has been carefully engineered to blend in harmoniously with the sound of the other MKN 8000 series microphones. The MKN 8000 is also a great choice wherever the highest attention of neighbouring sound sources is required - but it's the system where sound needs to be eliminated or an adjacent instrument that must not be picked up. Their special RF condenser principle and the symmetrical capsule design ensures the MKN 8000 series microphones with a combination of advantages that can only be found in this series.
