

RORIOS AA-SY005

RORIOS Men's Analog Quartz Watch

User Manual

1. PRODUCT OVERVIEW

The RORIOS Men's Analog Quartz Watch is a versatile timepiece designed for daily wear, combining classic aesthetics with modern functionality. It features a durable silicone strap, a high-quality quartz movement, and a mineral crystal glass for scratch resistance and clear visibility.

Key features include:

- Multifunctional sub-dials supporting stopwatch and date calendar.
- Luminous hands for clear time visibility in low-light conditions.
- 3ATM daily water resistance, suitable for splashes and light rain.
- High-quality silicone band for comfort and durability.
- Premium mineral crystal glass for enhanced scratch resistance.

2. SETUP

2.1 Unboxing and Initial Inspection

Upon receiving your RORIOS watch, carefully open the exquisite gift leather box. Verify that the package includes:

- 1x RORIOS Watch
- 1x User Manual and Warranty Card
- 1x Exquisite Gift Watch Leather Box

Figure 2: The RORIOS watch presented in its elegant gift box.

2.2 Setting the Time and Date

To set the time and date on your RORIOS watch, follow these steps:

1. **Pull out the crown:** Gently pull the crown (the knob on the side of the watch) to the first or second gear position.
2. **Set the date (First Gear):** If your watch has a date function, pull the crown to the first gear. Turn the crown clockwise or counter-clockwise to adjust the date. Push the crown back in once the date is set.
3. **Set the time (Second Gear):** Pull the crown to the second gear. Turn the crown to move the hour and minute hands to the correct time. Ensure you differentiate between AM and PM for the 24-hour indicator if present.
4. **Push the crown back in:** Once the time is set, push the crown fully back into its original position to start the watch movement and ensure water resistance.

Figure 3: Diagram illustrating the watch crown positions for setting time and calendar, along with sub-dial functions (Minutes, Second, Hour Hand Dial, Calendar).

3. OPERATING INSTRUCTIONS

3.1 Using the Chronograph Function

Your RORIOS watch features a chronograph (stopwatch) function. To use it:

1. **Start/Stop:** Press the top button (often labeled "Start/Stop Button" or similar) to begin timing. Press it again to stop the timer.
2. **Reset:** Press the bottom button (often labeled "Reset") to reset the chronograph hands back to zero.

Refer to Figure 3 for the location of the Start/Stop and Reset buttons.

3.2 Luminous Function

The hands and hour markers on your RORIOS watch are designed with a luminous coating. This allows you to

read the time clearly in dark environments.

The luminous material absorbs light during the day and emits a glow in the dark. For optimal luminescence, expose the watch to bright light (natural or artificial) for a period before entering a dark area.

Figure 4: The practical luminous function of the watch, showing hands and markers glowing in the dark after absorbing light.

3.3 Water Resistance

This RORIOS watch is 3ATM (30 meters) water resistant. This means it is suitable for daily use and can withstand splashes, rain, and hand washing. It is *not* suitable for showering, bathing, swimming, snorkeling, or diving.

Important: Do not operate the crown or buttons while the watch is wet or submerged in water, as this can compromise the water resistance seal.

Daily Life Waterproof

Don't need to Worry about Water Drops

Rain

Sweat

Hand-wash

Figure 5: Illustration of the watch's daily life water resistance, showing its ability to withstand rain, sweat, and hand-washing.

4. MAINTENANCE

4.1 Cleaning Your Watch

To maintain the appearance and longevity of your RORIOS watch:

- Wipe the watch case and silicone strap regularly with a soft, dry cloth.
- For stubborn dirt on the silicone strap, a slightly damp cloth with mild soap can be used, but ensure to dry it thoroughly afterwards.
- Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the watch's finish or strap material.

4.2 Storage

When not wearing your watch, store it in a cool, dry place, away from direct sunlight, extreme temperatures,

and strong magnetic fields. The original gift box is ideal for storage.

4.3 Battery Replacement

The watch is powered by a high-quality quartz movement, which uses a battery. The battery life typically lasts for several years. When the watch stops or the second hand starts skipping, it indicates a low battery. Battery replacement should be performed by a qualified watch technician to ensure proper sealing and water resistance.

5. TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running or running intermittently.	Low battery; Crown not fully pushed in.	Replace battery (professional service recommended); Push crown fully in.
Date not changing correctly.	Date set during prohibited hours (typically 9 PM - 3 AM); Incorrect crown position.	Avoid setting date during prohibited hours; Ensure crown is in the first gear for date adjustment.
Chronograph hands not resetting to zero.	Requires calibration.	Consult a watch technician for chronograph hand calibration.
Condensation inside the watch.	Exposure to extreme temperature changes; Water resistance compromised.	Seek professional service immediately to prevent damage. Avoid extreme temperature changes.

6. SPECIFICATIONS

Model Number	AA-SY005
Movement	High-Quality Quartz Movement
Dial Diameter	44 MM
Dial Thickness	11 MM
Band Width	24 MM
Strap Length	255 MM

Weight	80g
Water Resistance	3ATM (30 meters) - Daily waterproof, not for swimming or diving.
Case Material	Stainless Steel
Strap Material	Silicone
Glass Material	Mineral Crystal Glass
