KENNETH COLE KRWGJ2191101

Kenneth Cole Reaction Digital Watch Ace KRWGJ2191101 User Manual

Model: KRWGJ2191101

1. PRODUCT OVERVIEW

The Kenneth Cole Reaction Digital Watch Ace KRWGJ2191101 is a digital timepiece featuring an IP black case, a 47mm dial, and a stainless steel bracelet. It is designed for daily wear with a water resistance rating of 3 ATM (30 meters).

This image displays the front of the Kenneth Cole Reaction Digital Watch Ace KRWGJ2191101, highlighting its digital display, button layout, and key specifications such as a 47mm dial size, 13mm case thickness, deployment clasp, digital display type, and 30 meters water resistance.

2. SETUP

2.1 Initial Power-On

Your watch comes with a pre-installed Lithium Ion battery. If the display is blank upon receipt, press any button to activate the display. The watch is ready for use once the display is active.

2.2 Setting Time and Date

1. Press the **MODE** button repeatedly until the time setting mode is displayed (usually indicated by flashing digits).
2. Use the **START** button to adjust the hour.
3. Press the **RESET** button to move to the minute setting. Use the **START** button to adjust the minutes.
4. Continue pressing **RESET** to cycle through year, month, and day settings, adjusting each with the **START** button.

5. Once all settings are correct, press the **MODE** button to exit the setting mode.

2.3 Adjusting the Bracelet

The stainless steel bracelet can be adjusted to fit your wrist. This typically involves removing links. It is recommended to have this adjustment performed by a professional jeweler to prevent damage to the watch or bracelet.

3. OPERATING INSTRUCTIONS

The watch features four primary buttons: **LIGHT**, **MODE**, **START**, and **RESET**.

- **LIGHT Button:** Press to illuminate the display for a few seconds, improving visibility in low-light conditions.
- **MODE Button:** Cycles through different display modes such as Time, Date, and potentially other functions like a stopwatch or alarm (if available on your specific model).
- **START Button:** Used for adjusting values during setting modes or for starting/stopping functions like a stopwatch.
- **RESET Button:** Used for selecting items during setting modes or for resetting functions like a stopwatch.

4. MAINTENANCE

4.1 Cleaning

To clean your watch, wipe it gently with a soft, dry cloth. For the stainless steel bracelet, a slightly damp cloth can be used, followed by a dry cloth. Avoid using harsh chemicals, solvents, or abrasive cleaners, as these can damage the watch's finish or internal components.

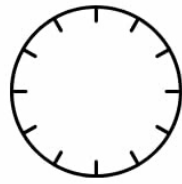

4.2 Water Resistance (3 ATM / 30 Meters)

This watch is water resistant up to 3 ATM (30 meters). This rating means the watch is suitable for everyday use and can withstand splashes or brief immersion in water. It is **not** suitable for swimming, showering, diving, or any water sports where it would be subjected to continuous water pressure or submersion.

- Do not operate buttons while the watch is wet or submerged.
- Ensure the crown (if applicable) is pushed in completely after setting the time.

4.3 Battery Replacement

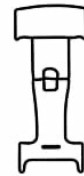

The watch uses a CR2032 Lithium Ion battery. When the display becomes dim or stops functioning, the battery may need replacement. It is highly recommended to have the battery replaced by a qualified watch technician to ensure proper sealing for water resistance and to prevent damage to the watch's delicate internal mechanisms.

The rear view of the watch, showing the stainless steel caseback with 'REACTION KENNETH COLE', 'MOVEMENT CHINA', 'BATTERY CR2032', and '3 ATM' markings. This area is where the battery can be accessed by a qualified technician.

5. TROUBLESHOOTING

- **Display is blank:** The battery may be depleted. Replace the battery (refer to Section 4.3). If the battery is new, ensure it is inserted correctly.
- **Time is incorrect:** Reset the time and date according to Section 2.2. If the time consistently loses accuracy, the battery may be low or the movement may require service.

- **Buttons are unresponsive:** Ensure the watch is not in a locked mode (if applicable). If the issue persists, the watch may require professional inspection.
- **Condensation inside the watch:** This indicates a breach in the water resistance seal. Stop using the watch immediately and seek professional service to prevent further damage.

6. SPECIFICATIONS

Model Name	Ace
Model Number	KRWGJ2191101
Display Type	Digital
Movement Type	Quartz
Case Material	IP Black Case (Metal)
Case Diameter	47 Millimetres
Case Thickness	13 Millimetres
Band Material	Stainless Steel
