

HHH PONY 50

HHH 49cc/50cc Gas Street Legal Scooter Moped Instruction Manual

Model: PONY 50

1. SAFETY INFORMATION

Read this entire manual carefully before operating the HHH 49cc/50cc Gas Street Legal Scooter Moped. Failure to follow instructions and safety precautions may result in serious injury or property damage. Always wear appropriate safety gear, including a helmet, eye protection, and protective clothing, when operating the scooter. Ensure all local and state regulations for scooter operation and registration are met.

- **Operator Age:** This scooter is intended for youth and adults.
- **Weight Limit:** Do not exceed the maximum weight recommendation of **225 pounds**.
- **Fuel:** Use only the recommended type of gasoline for the 49cc 4-stroke engine.
- **Ventilation:** Operate the scooter in well-ventilated areas only. Carbon monoxide is a colorless, odorless, poisonous gas.
- **Pre-Ride Check:** Always perform a pre-ride inspection, including checking tire pressure, brake function, and fluid levels.

2. SETUP AND INITIAL ASSEMBLY

The HHH 49cc/50cc Gas Street Legal Scooter Moped arrives approximately 75% assembled within a metal crate and box. Final assembly is required before operation. This typically includes attaching the tires, handlebars, mirrors, and other components. Power tools may be required for assembly.

Important: Step-by-step assembly videos are available from the seller and will be emailed to you by Amazon. Refer to these videos for detailed instructions.

2.1 Included Components

- 50cc street scooter (partially assembled)
- LED lights
- Matching trunk with keys
- Mirrors
- Title and all documents required for registration

Note on Registration: The product includes the title and all documents required for registration. However, vehicle registration requirements vary by state and locality. It is the owner's responsibility to verify and comply with all applicable laws and regulations in their area before operating the scooter on public roads.

3. OPERATING INSTRUCTIONS

The HHH 49cc/50cc Gas Street Legal Scooter Moped features a fully automatic CVT (Continuously Variable Transmission) and is belt-driven, making operation straightforward.

3.1 Starting the Scooter

1. Insert the key into the ignition and turn it to the 'ON' position.
2. Ensure the fuel tank contains sufficient gasoline.
3. The scooter features both a keyed electric start and a kickstart backup. To use the electric start, press the start button while applying the brake lever.
4. If the electric start does not work, use the kickstart lever located on the side of the engine.

3.2 Controls and Features

- **Throttle:** A twist-grip throttle on the right handlebar controls acceleration.
- **Brakes:** Front and rear hand brakes provide stopping power. The front brake is a hydraulic disc, and the rear is a mechanical drum brake.
- **Dashboard:** The dash-mounted controls include a speedometer, fuel gauge, and switches for lights and turn signals.
- **Storage:** The scooter includes a matching trunk with keys and under-seat storage for personal items.

4. MAINTENANCE

Regular maintenance is crucial for the longevity and safe operation of your scooter. Consult a qualified technician for complex repairs or if you are unsure about any maintenance procedure.

- **Oil Changes:** Follow the manufacturer's recommendations for engine oil type and change intervals.
- **Tire Pressure:** Regularly check and maintain correct tire pressure for optimal performance and safety.
- **Brake Inspection:** Inspect brake pads and fluid levels periodically. Ensure brakes are responsive and free of excessive wear.
- **General Inspection:** Check all fasteners, lights, and electrical connections regularly.

5. TROUBLESHOOTING

If you encounter issues with your HHH scooter, consider the following basic checks. For persistent or complex problems, contact customer support.

- **Engine Not Starting:** Check fuel level, ensure the key is in the 'ON' position, and confirm the electric start button is pressed while a brake lever is engaged. Try the kickstart backup.
- **Loss of Power:** Verify adequate fuel supply. Check for any obvious obstructions or loose connections.
- **Brake Issues:** If brakes feel spongy or ineffective, they may require adjustment or fluid top-up. Do not operate the scooter with faulty brakes.

6. SPECIFICATIONS

Feature	Detail
