MAINTENANCE

Proper care and maintenance will ensure the longevity of your headset.

- **Cleaning:** Use a soft, dry cloth to wipe down the earcups and headband. For stubborn dirt, a slightly damp cloth can be used, but ensure no moisture enters the speaker grilles or microphone. Avoid harsh chemicals or abrasive cleaners.
- **Cable Care:** Do not pull on the cable to disconnect the headset. Always grasp the plug. Avoid sharp bends or kinks in the cable, as this can damage internal wiring.
- **Storage:** When not in use, store the headset in a clean, dry place away from extreme temperatures and direct sunlight. Avoid placing heavy objects on top of the headset.
- **Microphone Care:** Keep the microphone clean and free from dust. If the microphone is detachable or retractable, handle it gently.

TROUBLESHOOTING GUIDE

If you encounter issues with your headset, refer to the following common solutions.

Problem	Solution
No Sound from Headset	Ensure the 3.5mm jack is fully inserted into the device. Check the inline volume control on the headset and increase it. Verify your device's audio output settings are configured to use the headset. Test the headset with another device to rule out a device-specific issue.
Microphone Not Working	Ensure the 3.5mm jack is fully inserted. A partial connection can sometimes provide audio but no mic. Check your device's microphone input settings to ensure the headset is selected and not muted. Confirm the microphone boom is positioned correctly near your mouth. Test the microphone with another device or application.
Sound is Distorted or Unclear	Lower the volume on both the headset and your device. Ensure the audio jack is clean and free of debris. Test with another device to determine if the issue is with the headset or the source device.
Headset is Uncomfortable	Adjust the headband to fit your head size. Ensure the earcups are properly seated over your ears. Take breaks during long sessions to relieve pressure.
