## TUPEED Women's US Size 5-9

# TUPEED Shoe Crease Preventers Instruction Manual

Model: Women's US Size 5-9

## PRODUCT OVERVIEW

---

The TUPEED Shoe Crease Preventers are designed to maintain the pristine condition of your sneakers and casual shoes by preventing unsightly creases in the toe box area. Crafted from durable and comfortable PE and TPR materials, these protectors offer long-lasting support and are washable for easy maintenance. Each pack includes 4 pairs (2 black, 2 white) suitable for Women's US Size 5-9.

Key features include a patented design for strong toe box support, 36 Y-shaped and 14 linear venting holes for breathability, raised small stripes for a secure fit, and clear 'R' and 'L' markings for correct placement. These protectors can be trimmed for a customized, comfortable fit and are versatile enough for both new shoes to prevent creases and older shoes to restore their appearance.

## SETUP AND INSTALLATION

---

Follow these steps to correctly install the shoe crease preventers into your footwear:

1. **Prepare Your Shoe:** Loosen the laces of your shoe and, if present, remove the insoles. This provides easier access to the toe box.
2. **Insert the Protector:** Take one shoe crease protector. Identify the 'R' (Right) or 'L' (Left) marking on the protector to ensure it matches the correct shoe. Gently insert the protector into the toe box of the shoe, pushing it firmly to ensure it sits snugly against the front of the shoe.
3. **Re-insert Insole (Optional):** If you removed the insole, carefully place it back into the shoe, ensuring it sits smoothly over the installed protector.
4. **Smooth and Adjust:** Smooth out any wrinkles in the insole or lining. The protector should feel secure and not shift inside the shoe.

1. Loosen the laces and remove the insoles;

2. Put it in the shoe and make sure it is left or right;

3. Put the insole in the shoe;

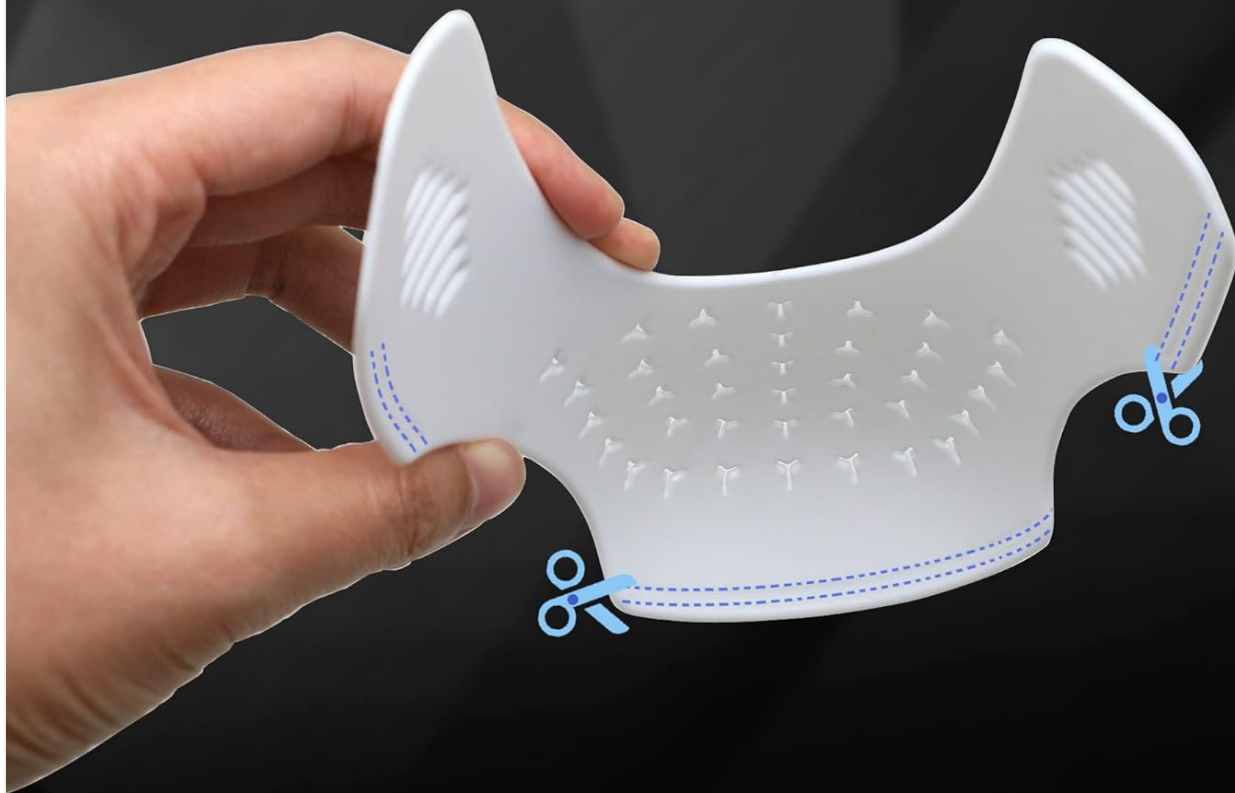

4. Smooth the insole

Image: Visual guide demonstrating the four steps for installing the shoe crease preventers: loosening laces, inserting the protector, replacing the insole, and smoothing.

### Trimming for Comfort

The shoe crease preventers feature cut lines designed inside the protector, allowing you to customize the size for optimal comfort. If you experience any discomfort or a tight fit, you can trim the protector along these lines using scissors. Start with small adjustments and test the fit until it feels comfortable in your shoe.

# TRIM THE SIZE FREELY

Cut lines designed inside of the shoe crease protector, you can trim the size by yourself to make your foot more comfortable

## OPERATING AND USAGE

---

Once installed, the TUPEED Shoe Crease Preventers work by providing a rigid yet flexible barrier within the toe box of your shoe. This support prevents the material from collapsing and forming creases during wear, helping to maintain the shoe's original shape and appearance.

### Key Features in Use:

- **Anti-Crease Protection:** The primary function is to provide strong support at the toe box, effectively preventing creases from forming as you walk or bend your foot.
- **Breathable Design:** Featuring 36 Y-shaped venting holes and 14 linear venting holes, the protectors promote air circulation, helping to keep your shoes dry and breathable, reducing moisture buildup.
- **Non-Slip Stability:** Raised small stripes on the surface ensure the protectors stay firmly in place within the shoe's toe box, preventing shifting during movement.
- **Universal Application:** These protectors are suitable for a wide range of sneakers and casual shoes, including popular models like Air Force, Jordan, Dunks, Yeezy, Kobe, and Smith series. They can be used in new shoes to prevent creases or in older shoes to help restore their shape.

**MAINTENANCE**

The TUPEED Shoe Crease Preventers are made from durable and washable PE and TPR materials. To clean them, simply remove them from your shoes and wash them with mild soap and water. Allow them to air dry completely before re-inserting them into your footwear. Regular cleaning will help maintain hygiene and prolong the life of the protectors.

## TROUBLESHOOTING

---

- **Discomfort or Tight Fit:** If the protectors feel uncomfortable or make your shoes too tight, refer to the "Trimming for Comfort" section under Setup and Installation. You can trim the protectors along the designated cut lines to achieve a more comfortable fit.
- **Protector Shifting Inside Shoe:** Ensure the protector is pushed firmly into the toe box. The raised small stripes are designed to help it stay in place. If it continues to shift, ensure the shoe size is appropriate for the protector (Women's US Size 5-9).
- **Creases Still Forming (Minor):** While designed to prevent major creasing, some minor creasing might still occur depending on shoe material, fit, and walking style. Ensure the protector is correctly positioned and consider if trimming has removed too much material, reducing its supportive area.

## SPECIFICATIONS

---

Attribute	Detail
Product Dimensions	5.5 x 4.1 x 0.04 inches
Item Weight	4.16 ounces
Material	PE (Polyethylene) and TPR (Thermoplastic Rubber)
Quantity	4 Pairs (2 Black, 2 White)
Compatibility	Women's US Shoe Size 5-9
Manufacturer	TUPEED
