Setup

Follow these steps for initial setup:

1. Ensure the appliance is unplugged from the power outlet.
2. Place the motor unit (Body) on a stable, flat surface.
3. Press the Fasten Button and insert the Feed Tube into the machine.
4. Turn the Feed Tube counter-clockwise to tighten and secure it in place.
5. Select the desired cutting accessory (cone) and insert it into the Feed Tube, ensuring it is firmly seated.
6. Place a bowl or plate under the output chute to collect processed food.

Operating Instructions

Once assembled, you can begin processing food:

1. Plug the appliance into a suitable power outlet.
2. Prepare your ingredients: Wash and peel vegetables or fruits as needed. Cut larger items into pieces that fit easily into the Feed Tube.
3. Place the prepared food into the Feed Tube.
4. Press the On/Off/R Switch to the "On" position to start the motor.
5. Use the Vegetable Pusher to gently guide the food down into the rotating blade. Do not force the food.
6. Once processing is complete, switch the appliance to the "Off" position and unplug it.
7. If food gets stuck, switch to "Off", unplug, and then use the "R" (Reverse) function briefly to clear the obstruction, or carefully remove the cone and clear manually.

Tips for Best Results:

- For optimal slicing/shredding, ensure food items are firm. Softer foods may yield less consistent results.
- Do not overload the feed tube. Process food in smaller batches if necessary.
- The 250W motor provides efficient and fast processing, making food preparation quicker and safer than manual methods.

Maintenance and Cleaning

Proper cleaning ensures the longevity and hygiene of your appliance:

1. Always unplug the appliance before cleaning.
2. Remove the Feed Tube and the selected cutting cone.
3. The Feed Tube and all stainless steel cones are dishwasher safe for instant cleaning.

4. Alternatively, wash them by hand using warm, soapy water and a soft brush to remove any food residue. Rinse thoroughly.
5. The motor unit (Body) should be wiped clean with a damp cloth.**Do not immerse the motor unit in water.**
6. Dry all parts completely before reassembling or storing.

Troubleshooting

Problem	Possible Cause	Solution
Appliance does not turn on.	Not plugged in; power switch off; power outage.	Ensure plug is securely in outlet; turn switch to "On"; check household power.
Food is not processing or getting stuck.	Feed tube/blade not properly installed; food too large/hard; overloaded.	Re-install feed tube and blade correctly; cut food into smaller pieces; do not overload; use reverse function briefly.
Motor stops during operation.	Overheating due to continuous use or overload.	Turn off and unplug. Let the appliance cool down for 15-20 minutes before resuming use. Reduce load.
Unusual noise during operation.	Blade or feed tube not properly seated; foreign object.	Turn off and unplug. Check assembly of all parts. Remove any foreign objects.
