

iTolvee XL100

iTolvee LED Pet Nail Clipper (Model XL100) Instruction Manual

Professional Pet Nail Trimmer for Dogs & Cats

INTRODUCTION

The iTolvee LED Pet Nail Clipper is designed to make pet nail trimming safer and easier for both pets and owners. This professional-grade trimmer features an integrated LED light to illuminate the quick in light-colored nails, extra-sharp stainless steel blades for clean cuts, a safety guard to prevent over-cutting, and a built-in nail file for finishing touches.

Safety Information

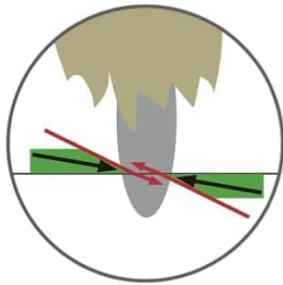

- Do not use this product for any purpose other than pet nail trimming.
- Keep the clipper out of reach of children.
- Always engage the safety lock when the clipper is not in use to prevent accidental opening.

SETUP

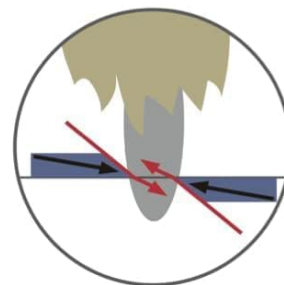

1. **Unpack the Clipper:** Carefully remove the iTolvee LED Pet Nail Clipper from its packaging.
2. **Disengage Blade Lock:** Locate the blade lock mechanism (a small toggle switch) and slide it to the 'unlock' position to allow the blades to open.
3. **Check LED Light:** Press the LED light button to ensure it illuminates. The clipper requires 1 CR2 battery for the LED light. If the light does not turn on, check the battery compartment for proper installation or replace the battery.

ULTRA-SHARP BLADES

Prevent nail splitting for easier trimming of hard and thick claws

OPERATING INSTRUCTIONS

Follow these steps for safe and effective nail trimming:

1. **Prepare Your Pet:** Ensure your pet is calm and comfortable. Hold their paw gently but firmly.
2. **Activate LED Light:** Press the button to turn on the LED light. This will illuminate the nail, helping you identify the quick.
3. **Identify the Quick:**
 - For **light-colored nails**, the quick appears as a pink area within the nail, containing nerves and blood vessels. Avoid cutting into this area.
 - For **dark-colored nails**, the quick is harder to see. Trim small, thin slices from the tip of the nail until you see a small, round, smooth area in the center. Stop immediately if you see a black dot or pinkish center, as this indicates you are close to the quick.

ILLUMINATES NAILS FOR SAFE TRIMMING

The LED light illuminates light colored nail's delicate bloodline so you can trim in the right spot

The LED light helps to clearly show the quick in light-colored nails, guiding safe trimming.

4. **Position the Clipper:** Place the nail within the clipper's opening. The safety guard, located behind the blade, helps regulate the cutting length and prevents the nail from going too far into the blades.
5. **Trim the Nail:** Squeeze the handles firmly and quickly to make a clean cut. Cut perpendicular to the nail, avoiding extreme angles.

Important trimming tips: locate the quick for white nails and cut small slices for black nails.

6. **Use the Nail File:** After trimming, pull out the integrated nail file from the handle. Use it to smooth any sharp edges or rough spots on the trimmed nail.
7. **Engage Safety Lock:** Once finished, slide the blade lock toggle to the 'lock' position to secure the blades.

MAINTENANCE

- **Cleaning:** After each use, wipe the blades with a soft, dry cloth to remove any nail dust or debris. This helps maintain hygiene and blade sharpness.

- **Storage:** Store the clipper in a dry place, away from moisture and direct sunlight. Always ensure the safety lock is engaged during storage.
- **Blade Sharpness:** The stainless steel blades are designed for durability and sharpness. If you notice the blades becoming dull or crushing the nail instead of cutting cleanly, consider replacing the clipper for optimal performance and your pet's comfort.
- **Battery Replacement:** The LED light is powered by 1 CR2 battery. If the light dims or stops working, replace the battery. To replace, open the battery compartment (usually located near the LED light) and insert a new CR2 battery, ensuring correct polarity.

TROUBLESHOOTING

Clipper not cutting cleanly:

Ensure the blades are free of debris. If the blades feel dull, they may need replacement to ensure a clean, precise cut and prevent discomfort for your pet.

LED light not working:

Check if the CR2 battery is correctly installed. If it is, the battery may need to be replaced. Ensure the battery compartment is securely closed.

Pet shows resistance during trimming:

Introduce nail trimming gradually, using positive reinforcement and treats. If your pet is highly anxious, consider consulting a professional groomer or veterinarian for advice or assistance.

Accidental over-cutting (cutting the quick):

If you accidentally cut the quick, apply styptic powder or cornstarch to the bleeding nail to stop the bleeding. Comfort your pet and monitor the paw. If bleeding persists or you are concerned, contact your veterinarian.

SPECIFICATIONS

Feature	Detail
Model Number	XL100
Product Dimensions	6.38 x 2.36 x 1.1 inches
Item Weight	4.62 ounces (131 g)
Material Type	Stainless Steel (Blades)
Blade Edge	Straight
Battery Requirement	1 CR2 battery (for LED light)
Target Audience	Cat, Dog
